**for Primary Teachers in Science and Technology** Marc J. de Vries, Hanno van Keulen, Sylvia Peters, Juliette Walma van der Molen, 2012-01-01 This book presents the research output of the Dutch project VTB Pro an internationally oriented project that aimed at providing primary school teachers with the knowledge abilities and attitudes that are necessary to implement science and technology education in their classes An introductory chapter by Wynne Harlen and Pierre Lena positions this project in the international context From the Foreword by Dr Michel Rocard I have been pleased to discover the VTB Pro three years project carried in the Netherlands Broadening technological education in primary school Focusing on professional development of teachers and presenting first hand testimonies and research the present book demonstrates how to deal with this issue so critical for a renewed pedagogy With proper methods the knowledge of science the interest in science and technology the pedagogical skills can all be improved among teachers who often have no or little affection for science

**Learning and Teaching for Mathematical Literacy** Hugh Burkhardt, Daniel Pead, Kaye Stacey, 2024-02-19 Typically most people don't realize when and how they can use the mathematics they were taught in high school yet many of the mathematical ideas and skills can be a powerful tool for understanding how the world works Learning and Teaching for Mathematical Literacy addresses this situation offering practical strategies for developing a broader vision of mathematical literacy in the classroom and recognising the importance of maintaining these skills into adult life Linked to the material explored throughout this book classroom activities and lesson materials are freely available for use via the QR codes included in each chapter Filled with case studies and classroom activities chapters tackle several topics Describing a framework for a broader vision of mathematical literacy what is it and why is it important Teaching mathematical literacy in the classroom Applying mathematical literacy to real life scenarios My dad is buying a new dishwasher Should he buy the extended warranty on offer My phone works fine but I've been offered an upgrade How should I decide whether to take it The role of technology in teaching mathematical literacy Designing mathematical measures for real word quantities Firmly grounded by practical applications for the classroom and beyond this is an essential handbook for any teacher teaching assistant or mathematics subject lead who wishes to develop their students mathematical literacy skills This is also an ideal resource for those delivering or enrolled in teacher preparation courses

OECD Skills Studies The Assessment Frameworks for Cycle 2 of the Programme for the International Assessment of Adult Competencies OECD, 2021-04-30 The OECD's Programme for the International Assessment of Adult Competencies PIAAC represents a comprehensive international comparative assessment of the information processing skills of adults vital for the full participation in social and economic life in the 21st century PIAAC is now in its second cycle and continues a series of international assessments of adult skills that began in the mid 1990s with the International Adult Literacy Survey IALS

**Workplace Essential Skills**, 2000 **Organizing the Curriculum**, 2019-02-11 Contemporary American youth live in a culture that ignores or denigrates labor unions Mainstream media cover labor issues only sparingly and unions no longer play much of a role in popular culture texts films or images In our schools

labor has been limited to a footnote in textbooks instead of being treated seriously as the most effective force for championing the rights of working people the vast majority of the citizenry Teachers have been convinced that to bring up class or to teach about the labor movement may be construed as taking sides while the all pervasive presence of corporate America in our schools is rarely questioned So for all the talk of schools preparing young people for the work world we are failing to teach them even the basics of how that world is structured or how they can be empowered through collective action

Organizing the Curriculum Perspectives on Teaching the US Labor Movement is the first book length treatment of this blind spot in contemporary curriculum and pedagogy Contributors to this collection unionists activists teachers teacher educators and academics interrogate the ways in which knowledge is constructed in school discourses conceptualize pedagogical strategies and curricula that open discussions around class analysis and political economy via studies of the labor movement and put forward an activist vision of education that truly engages young people beyond the classroom walls

*Making Mathematics Work for Minorities* ,1989

Opening the Cage Ole Skovsmose,Brian Greer,2012-09-05 The picture on the front of this book is an illustration for Totakahini The tale of the parrot by Rabindranath Tagore in which he satirized education as a magnificent golden cage Opening the cage addresses mathematics education as a complex socio political phenomenon exploring the vast terrain that spans critique and politics Opening the cage includes contributions from educators writing critically about mathematics education in diverse contexts They demonstrate that mathematics education is politics they investigate borderland positions they address the nexus of mathematics education and power and they explore educational possibilities Mathematics education is not a free enterprise It is carried on behind bars created by economic political and social demands This cage might not be as magnificent as that in Tagore s fable But it is strong Opening the cage is a critical and political challenge and we may be surprised to see what emerges

*Maths in the Workplace* Sue Thomson,I. Forster,2011

*Mathematics Education* ,1989 More than 175 representatives from business industry government and educational institutions gathered to discuss shared concerns about quantitative and problem solving skills of the work force linking mathematics education to the health and competitiveness of U S business and industry The primary goals of the conference were to bring the perspectives of business and industry to those concerned with reform in mathematics education and to seek shared viewpoints that can serve as a collective focus for future collaborative actions This report includes 1 an introduction 2 a brief sketch of the changing U S workplace 3 a concise description of the changing American work force 4 an essay on the present state of affairs as well as prospects for change within mathematics education 5 a listing of some of the reported successful collaborative efforts in which business and industry have already supplied schools with talent enthusiasm expertise equipment and support 6 an enumeration of ideas for increased corporate advocacy of mathematical reform efforts beyond direct intervention with the professional development of teachers and administrators 7 a list of working papers that are available upon request from the Mathematical Sciences Education Board and 8 a list of participants

from this Wellspring Symposium JJK     Improving Workplace Learning Geraldine Castleton, Rodney Gerber, Hitendra Pillay, 2006 Closely linked to the concepts of growth and globalisation is the increasing recognition being given to the importance of the workplace as a site of learning The value of the book rests in the fact that this framework does not have its foundations in just one academic discipline but rather provides a range of perspectives drawn from psychology social psychology sociology and critical theory The purpose is to move away from a unidimensional understanding of workplaces and workplace learning to provide a different standpoint from which to better appreciate the diversity and complexity of learning in the workplace This significant book is divided into four inter related sections with each section contributing to the evidence base referred to earlier by offering informed considerations of the following questions What kinds of contextual issues impact on workplace learning and what are the implications of these for improving workplace learning What kinds of knowledge are required for contemporary work and what implications are derived from these for improving workplace learning What models and case studies exist that reflect practices for improving workplace learning and What consideration of directions for future action to improve workplace learning can be made     Learning Mathematics for a New Century Maurice Joseph Burke, 2000     **Schools, Mathematics, and Work** Mary Harris, 1991 From various perspectives authors in this volume discuss the way mathematics is applied to practical tasks and its place in modern culture There are essays on the role of mathematics in the workplace and the role of the computer as an expressive medium in education     **The Virginia Mathematics Teacher**, 1998     **Evidence-Based Inquiries in Ethno-STEM Research** Iman C Chahine, Josef de Beer, 2021-01-01 The purpose of the edited volume is to provide an international lens to examine evidence based investigations in Ethno STEM research Ethno science Ethno technology Ethno engineering and Ethno mathematics These themes grew out of multi national multi institutional and multi disciplinary efforts to preserve as well as epitomize the role that Indigenous Knowledge Systems IKS play in cognitive development and its vital contributions to successful and meaningful learning in conventional and non conventional contexts Principled by the Embodied Situated and Distributed Cognition ESDC this innovative book will provide evidence supporting the embeddedness of a thinking in acting model as a fundamental framework that explains and supports students acquisition of scientific knowledge So often western science curricula are experienced as irrelevant since it does not take cognizance of the daily experiences and world in which the learner finds himself This book takes a socio cultural look at IKS and applies research in neuroscience to make a case its incorporation in the STEM Science Technology Engineering and Mathematics classroom We use the Embodied Situated Distributed Cognition ESDC Model as conceptual framework in this book Although the value of IKS is often acknowledged in curriculum policy documents teachers are most often not trained in incorporating IK in the classroom Teachers lack of the necessary pedagogical content knowledge PCK in effectively incorporating IK in their classrooms is a tremendous problem internationally Another problem is that IK is often perceived as pseudo science and scholars advocating for the incorporation

of IK in the school curriculum often do not contextualize their arguments within a convincing theoretical and conceptual framework
