the importance of context in defining how habits and practices of citizenship are constructed and understood within communities The book demonstrates how conceptualizations derived from philosophical pragmatism facilitate identification of the dynamics of incremental change in citizenship It also provides a definition of learning as reformulation of habits which helps to understand the difficulties in promoting change This book will be of interest to scholars within the fields of development governance and educational philosophy Practitioners and policy makers working on inclusive citizenship and interventions to strengthen civil society will also find the concepts explored in this book useful to their work The Open Access version of this book available at <https://www.taylorfrancis.com/books/e/9780429279171> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
