Brown, 2019-08-15 This powerful edited collection disrupts the deficit oriented discourses that currently frame the field of early childhood education ECE and illuminates avenues for critique and opportunities for change Researchers from across the globe offer their insight and expertise in challenging the logic within ECE that often frames children and their families through gaps risks and deficits across such issues as poverty language developmental psychology teaching and learning Chapters propose practical responses to these manufactured crises and advocate for democratic practices and policies that

enable ECE programs to build on the wealth of cultural and personal knowledge children and families bring to the early learning process Moving beyond a dependence on deficits this book offers opportunities for scholars researchers and students to consider their practices in early education and develop their understanding of what it means to be an educator who seeks to support all children      **Handbook of Critical Psychology** Ian Parker, 2015-04-17 Choice Recommended Read Critical psychology has developed over time from different standpoints and in different cultural contexts embracing a variety of perspectives This cutting edge and comprehensive handbook values and reflects this diversity of approaches to critical psychology today providing a definitive state of the art account of the field and an opening to the lines of argument that will take it forward in the years to come The individual chapters by leading and emerging scholars plot the development of a critical perspective on different elements of the host discipline of psychology The book begins by systematically addressing each separate specialist area of psychology before going on to consider how aspects of critical psychology transcend the divisions that mark the discipline The final part of the volume explores the variety of cultural and political standpoints that have made critical psychology such a vibrant contested terrain of debate The Handbook of Critical Psychology represents a key resource for researchers and practitioners across all relevant disciplines It will be of particular interest to students and researchers in psychology psychosocial studies sociology social anthropology and cultural studies and to discourse analysts of different traditions including those in critical linguistics and political theory      *The SAGE Handbook of Research on Teacher Education* D. York, Alan S. Tinkler, Barri E. Tinkler, 2018-11-01 Throughout the 90s and early 2000s service learning research was intensely focused on the student outcomes That body of research has effectively brought service learning from the fringes into the mainstream of institutionalized pedagogies In the past decade service learning research has experienced an infusion of exploration in three

distinct ways first large scale quantitative methodologies second a proliferation of research that has explored how different sub groups of students experience the pedagogy differently thusly resulting in variation among outcomes and third a focus on the experiences and outcomes associated for communities and community partners engaged in service learning In an effort to support these movements this volume of the Advances in Service Learning Research series Service Learning to Advance Access Success Bridging Institutional and Community Capacity focuses on how service learning can advance access and success Not simply access and success of students but the ways that service learning can advance access and success for all through bridging institutional and community capacity building The chapters in this volume serve as a testament to the ways in which service learning research continue to be advanced by thoughtful scholar practitioners The 12 chapters included in this volume are organized into three sections The first section focuses on how institutional and community partnerships can be leveraged to build community capacity The second section focuses on how institutions might build their own capacity to effect change for the good of society The third and final section focuses on six studies exploring the relationship service learning pedagogy has with access and success for students Of the six studies three are situated within the context of teacher preparation programs

Professional Practice Discourse Marginalia Joy Higgs, Franziska Trede, 2016-07-23 This is a book for practitioners university educators workplace learning educators researchers and the professions It draws together two key elements of the lives of these people professional practice what people do and practice discourse what they write and say about what they do And it focuses these discussions around two spaces the core and the margins of practice and discourse Writing in the margins of texts has a very long history People have always left part of themselves their ideas personality and reflections in the margins of texts In this book we have taken up the idea of such written marginalia and we have expanded it into writing into the texts of practice discourse as well as speaking and acting in the margins of professional practice Such deliberate practice changes in marginal practice spaces and in written practice discourse provides ways of shaping and critically appraising current and future professional practice This book provides a dialogue between two fascinating phenomena professional practice and discourse In the 21st century these two are facing challenges as they negotiate their contested spaces in a rapidly changing global society They draw on strong established traditions and expectations but they cannot be complacent in these illusory stabilities Rather they must be awake to the imperatives of their own re invention and re claimed relevance to today s society and today s professional class in the workforce Across the chapters we explore the core spaces of professional practice discourse from the vantage point of the margins of this space and the margin spaces as they interact with the core Marginalia serves as an architect of destabilisation challenge revolution reflection or sometimes affirmation of the central discourse space There are five sections in the book Section One Professional practice discourse Section Two Leading the practice discourse Section Three Writing from inside practice Section Four Writing onto and into practice and Section Five Marking trails and stimulating insights Readers are invited to contribute to our exploration of the

phenomenon and practice of professional practice discourse marginalia      Employing Community-Based Experiential Learning in Teacher Education Gary Harfitt, Jessie Mei Ling Chow, 2020-07-18 This book positions itself at the intersection of the interrelationship between three key areas of initial teacher education constructivist learning theories teaching practicum and the promotion of reflective practices It presents an innovative approach to teacher preparation at undergraduate and postgraduate levels by critically examining the implementation of a mandatory experiential learning block across subject disciplines on undergraduate and postgraduate teacher preparation courses This book presents multiple examples and case studies of these varied experiential learning projects that will inform academics teachers and policymakers Through these rich examples the authors set out to address the theory practice dilemma in teacher education where teachers to be are often positioned as consumers of educational research in classrooms read reference books and academic papers on teaching and observe university and school experts before applying the same acquired theories and practices in their own classes In the book the authors argue for a shift away from this conventional teacher learning curriculum that is characterised by the separation of theory and practice choosing instead to promote pedagogy and methods courses where practice underpins all learning These pedagogical perspectives include the promotion of a diverse range of learning contexts including on and off campus learning sites for student teachers to experience during their time on teacher education courses      Practical Strategies to Reduce Childhood Trauma and Mitigate Exposure to the School-to-Prison Pipeline Alexander-Ashley, Belinda M., 2023-01-03 School closures due to the COVID 19 pandemic racial violence injustice and resource inequities highlight the need for multi disciplinary strategies and practices that support evidence based practices across a range of educational levels for leaders professors teachers educational professionals trauma survivors and youth and government programs for both in class and remote learning environments Practical Strategies to Reduce Childhood Trauma and Mitigate Exposure to the School to Prison Pipeline provides practical strategies and tools focused on reducing childhood trauma while mitigating exposure to the school to prison pipeline Covering a range of crucial topics such as social justice trauma mindfulness and coaching this reference work is ideal for researchers scholars practitioners academicians educators leaders administrators school staff youth programs government organizations students and trauma survivors      Deconstructing Doctoral Discourses Deborah L. Mulligan, Naomi Ryan, Patrick Alan Danaher, 2023-01-01 This book identifies and challenges assumptions about the doctorate and the discourses associated with it The editors and contributors subvert and transform the de facto assumptions that frame the ways in which the doctorate is spoken and written and thus underpin approaches to planning conducting and evaluating doctoral research Giving voice to doctoral students and supervisors the book opens a pathway for their own stories why students entered doctoral study the understandings and experiences they gleaned from it and the implications for their own character The book questions what kinds of discourses help to construct contemporary doctoral research and how these might be de and reconstructed and asks what doctoral study might look like in the future

Academics students and practitioners alike will find an avenue into rigorous research design from reflective and insightful scholars who provide a voice for doctoral strategies for success

**Deconstructing Social Psychology** Ian Parker, John Shotter, 2015-06-19 Since the early 1970s social psychology has been in crisis At the time Reconstructing Social Psychology Armistead provided a critical review of theories and assumptions in the discipline Originally published in 1990 this title not only updates that review but illustrates the ways in which assumptions had changed at the time The crisis is no longer seen as one which can be resolved within social psychology itself but rather as one more deeply rooted in modern society The contributors look at the issues raised by deconstruction in the other human sciences as well as investigating the claims made by social psychology as a discipline They examine the rhetoric and texts of social psychology analysing how the texts which hold the discipline together obtain their power The arguments include the political implications of deconstructive ideas focusing on particular issues such as research therapy and feminism Deconstructing Social Psychology presents a strong selection of new critical writing in social psychology It will still be a useful text for students of psychology social science and sociology and for those working in the area of language
