educational research and teaching and working in educational leadership *New Perspectives in Educational Leadership* Sonya Douglass Horsford, 2010 *New Perspectives in Educational Leadership* examines educational administration and leadership within the complex social political and community contexts that inform and influence the work of today's educational leaders. With particular attention to the implications and larger contexts of shifting demographics, high stakes accountability, and globalization on schools and society in the twenty-first century, this volume seeks to advance lines of inquiry presented in other areas of education research that have yet to be fully explored or imagined in the field of educational leadership. This unique blend of empirical, theoretical, and conceptual research by both established and emerging scholars in the field directly acknowledges and addresses the demands of leading increasingly diverse and complex school communities. Topics include the social and cultural dynamics of leadership, reflective practice, politics of equity and adequacy, critical servant leadership, and the possibilities of transformative leadership within these dynamic educational contexts. As a primary or supplementary text in educational administration, leadership, and foundations courses, *New Perspectives in Educational Leadership* provides a much-needed complement to the traditional topics of instructional leadership and education management given the expanding and increasingly complex conditions that face educational administrators and school leaders today.

Global Perspectives on Education Research, Vol. II Liesel Ebersöhn, Ingrid Gogolin, 2023-05-31 Presenting a wide range of new research from World Education Research Association (WERA) affiliated scholars pertaining to democracy and education, this volume includes topics such as school readiness in Mongolia, high-stakes teacher evaluation policy in Japan, and family and community involvement in global educational advocacy. This collection arrives at a time of extreme global challenges, leaving researchers, teachers, students, families, and policymakers without a baseline of how to act, react, and be proactive to stem the chronic flow of disruption to global education systems. These challenges require researchers worldwide to consider how evidence can support individuals and systems to buffer against extreme global health distress and conflict whilst simultaneously supporting the continued functioning of education systems and processes. Such processes must allow students, teachers, leaders, administrators, and members of the educational communities to retain positive self-esteem and maintain supportive relationships and systems that provide the appropriate conditions for such processes. *Global Perspectives on Education Research* pulls together contributions from different contexts and cultures to distill vistas and research results that can enlighten a worldwide community of researchers, education professionals, and practitioners as well as policymakers and local, national, or supra-national decision makers. This text is also the ideal companion for educators and leaders alike as they navigate the uncertainty within global health and social justice.
