China Joseph Y.S. CHENG, 2012-05-01 This volume presents a timely assessment of the Hu Wen Administration at the juncture of preparing a change of China s leadership in 2012-13 The assessment is important because the

administration's apparent success tends to create a path dependent orientation on the part of its successor. Bringing together a collection of nineteen major essays, this book offers a fresh perspective of evaluating the performance and achievements of China in the Hu Wen era in terms of economic development, the establishment of a rudimentary social security system and her rising international status. The new opportunities and challenges facing China and how will the likely successors Xi Jinping and Li Keqiang handle those opportunities and challenges as well as new policy programmes will also be discussed in greater detail. Each essay is written by experts and scholars from different academic disciplines and backgrounds to provide readers with a unique overview of their respective areas of expertise.

The Curriculum of the Future Michael F. D. Young, 2002-01-04. In this important book, the author looks back on the knowledge question: What knowledge gets selected to be validated as school knowledge or as part of the school curriculum and why is it selected? Looking forward, Young discusses how most developed countries have high levels of participation in post-compulsory education but still use curricula designed for a time when only the elite pursued further education. He argues the need to rethink post-16 education to shift focus onto vocational education, school work issues and lifelong learning.

International Handbook of Educational Policy Nina Bascia, Alister Cumming, Amanda Datnow, Kenneth Leithwood, David Livingstone, 2008-05-14. This Handbook presents contemporary and emergent trends in educational policy research in over fifty chapters written by nearly ninety leading researchers from a number of countries. It is organized into five broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice. The chapters themselves are empirically grounded, providing illustrations of the conceptual implications contained within them as well as allowing for comparisons across them. The serendipity within chapters with respect to jurisdictional particularities and contrasts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places. The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy. They address in turn the contemporary strategic emphasis on large-scale reform, substantive emphases at several levels on leadership and governance, improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding finally with a contrasting topic: workplace learning, which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy.
