**Restoring the Educational Dream. Rethinking Educational Transformation in Zimbabwe** Shizha, Edward,2013-12-07 The role of education in human well being and social development cannot be overestimated After a number of highly commendable policies on education in the first decade of independence the education system in Zimbabwe has taken a tumble that needs both examining and rectifying This volume analyses the challenges facing the education system in Zimbabwe and explores and scrutinises theoretical and practical possibilities for restoring the educational dream that was initiated at independence in 1980 The book is targeted at academics scholars college and university students policy makers and other stakeholders and advocates a multi pronged approach that must involve all stakeholders if educational retransformation reconstruction and restoration are to be achieved The authors provide a range of recommendations for a project that would restore the educational dream in Zimbabwe      The International Handbook of Educational Research in the Asia-Pacific Region J.P. Keeves,Ryo Watanabe,2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future

developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region

### **The Management Of Success**

Kernal Singh Sandhu,Paul Wheatley,Kernal Singh Sandhu (A),2019-06-19 A collection of analytical reflections

on how the island of Singapore has been transformed from a colony in a crumbling empire into a thriving modern secular independent republic These are the results of a five year project by the Institute of Southeast Asian Studies The 2nd Dubai International Conference in Higher Education Lulett Escarpe-Ibarra, *Educational Extension* Clarence Arthur Perry, 1916 Development Research Digest, 1968 Development Digest, 1968 **Towards a Theory of Educational Transmissions** Basil Bernstein, 2003-02-20 Illustrating the effect of class relationships upon the institutionalizing of elaborate codes in the school the papers in this volume each develop from the previous one and demonstrate the evolution of the concepts discussed **Class, Codes and Control: Towards a theory of educational transmission** Basil Bernstein, 2003 Illustrating the effect of class relationships upon the institutionalizing of elaborate codes in the school the papers in this volume demonstrate the evolution of the concepts discussed International Handbook of Educational Evaluation T. Kellaghan, D.L. Stufflebeam, 2012-12-06 Thomas Kellaghan Educational Research Centre St Patrick's College Dublin Ireland Daniel L Stufflebeam The Evaluation Center Western Michigan University MI USA Lori A Wingate The Evaluation Center Western Michigan University MI USA Educational evaluation encompasses a wide array of activities including student assessment measurement testing program evaluation school personnel evaluation school accreditation and curriculum evaluation It occurs at all levels of education systems from the individual student evaluations carried out by classroom teachers to evaluations of schools and districts to district wide program evaluations to national assessments to cross national comparisons of student achievement As in any area of scholarship and practice the field is constantly evolving as a result of advances in theory methodology and technology increasing globalization emerging needs and pressures and cross fertilization from other disciplines The beginning of a new century would seem an appropriate time to provide a portrait of the current state of the theory and practice of educational evaluation across the globe It is the purpose of this handbook to attempt to do this to sketch the international landscape of educational evaluation its conceptualizations practice methodology and background and the functions it serves The book's 43 chapters grouped in 10 sections provide detailed accounts of major components of the educational evaluation enterprise Together they provide a panoramic view of an evolving field Families, the State and Educational Inequality in the Singapore City-State Charleen Chiong, 2021-09-30 Focusing on Singapore's education system from an equity perspective Chiong's book describes the often unheard perspectives of socio economically disadvantaged families in Singapore The performance of Singaporean students on international education benchmarking tests has been widely recognised Relatively less known is how socio economically disadvantaged families negotiate Singapore's highly competitive stratifying and meritocratic system Yet families perspectives can provide crucial insight in understanding how policy is lived and experienced and its effects on people's lives Drawing on 72 interviews with 12 families this book traces the development of surprisingly close collaborative relations between the state schools and families on Singapore's socio economic margins It demonstrates that in the strong state of Singapore

families dependency on schools and the state facilitates the internalisation of individual and familial responsibility for future success However these very processes can injure and perpetuate inequality The analysis presented in this book has relevance in other contexts in times where advanced capitalist states face growing inequalities and challenging relationships between institutional authority and the wider populace As socio economic and educational inequalities widen this book asks timely questions and provides recommendations on what a more equitable state citizen compact might look like The book will appeal to researchers and students who are interested in the fields of the sociology and politics of education social policy and Asian culture and society
