Landscape Ecology in Theory and Practice Monica G. Turner, Robert H. Gardner, Robert V. O'Neill, 2007-05-08 An ideal text for students taking a course in

landscape ecology The book has been written by very well known practitioners and pioneers in the new field of ecological analysis Landscape ecology has emerged during the past two decades as a new and exciting level of ecological study Environmental problems such as global climate change land use change habitat fragmentation and loss of biodiversity have required ecologists to expand their traditional spatial and temporal scales and the widespread availability of remote imagery geographic information systems and desk top computing has permitted the development of spatially explicit analyses In this new text book this new field of landscape ecology is given the first fully integrated treatment suitable for the student Throughout the theoretical developments modeling approaches and results and empirical data are merged together so as not to introduce barriers to the synthesis of the various approaches that constitute an effective ecological synthesis The book also emphasizes selected topic areas in which landscape ecology has made the most contributions to our understanding of ecological processes as well as identifying areas where its contributions have been limited Each chapter features questions for discussion as well as recommended reading

Statistical Ecology in Practice Stephen Waite, 2000-01 This text combines principles of good field ecology research design with practical statistical analysis suited to the needs of advanced students taking Field Ecology courses or undertaking projects that contribute to their final degree classification

The Ecology of Practice A. Endre Nyerges, 1997 This pioneering work addresses the topic of hunger and food security in western Africa and the contributing authors are anthropologists who seek to understand the sociocultural factors involved in the environmental and economic aspects of food production Case studies from regions of Mauritania Senegal and Sierra Leone discuss how local farmers are responding to change and problems of food security The book focuses on technology and changing patterns of resource use in a social context This volume also has a comparative focus both within and across cultural areas and draws implications for planning and policy from the discussions of diverse agricultural systems The concept of ecology of practice which emphasizes the importance of local social arrangements in alleviating or aggravating problems of food security makes this book valuable to readers whose interests lie within as well as outside western Africa

Field Ecology Michael Mühlenberg, Thomas Waßmer, 2025-06-19 This book is a theoretical and practical guide to ecological work in the field focusing on concepts issues and practical applications in animal ecology By highlighting examples it provides students researchers and professionals with the tools to develop ecological questions and corresponding working hypotheses It offers guidelines to choose the appropriate methods for successful data collection and analysis The book focuses on methods for assessing biological diversity and habitats in a changing world relating specifically to conservation issues and concerns

, Resilience in Ecology and Urban Design S.T.A. Pickett, M.L. Cadenasso, Brian McGrath, 2013-01-13 The contributors to this volume propose strategies of urgent and vital importance that aim to make today's urban environments more resilient Resilience the ability of complex systems to adapt to changing conditions is a key frontier in ecological research and is especially relevant in creative urban design as urban areas exemplify complex systems

With something approaching half of the world's population now residing in coastal urban zones many of which are vulnerable both to floods originating inland and rising sea levels making urban areas more robust in the face of environmental threats must be a policy ambition of the highest priority The complexity of urban areas results from their spatial heterogeneity their intertwined material and energy fluxes and the integration of social and natural processes All of these features can be altered by intentional planning and design The complex integrated suite of urban structures and processes together affect the adaptive resilience of urban systems but also presupposes that planners can intervene in positive ways As examples accumulate of linkage between sustainability and building landscape design such as the Shanghai Chemical Industrial Park and Toronto's Lower Don River area this book unites the ideas data and insights of ecologists and related scientists with those of urban designers It aims to integrate a formerly atomized dialog to help both disciplines promote urban resilience

Landscape Ecology in Theory and Practice Monica G. Turner, Robert H. Gardner, 2015-11-03 This work provides in depth analysis of the origins of landscape ecology and its close alignment with the understanding of scale the causes of landscape pattern and the interactions of spatial pattern with a variety of ecological processes The text covers the quantitative approaches that are applied widely in landscape studies with emphasis on their appropriate use and interpretation The field of landscape ecology has grown rapidly during this period its concepts and methods have matured and the published literature has increased exponentially Landscape research has enhanced understanding of the causes and consequences of spatial heterogeneity and how these vary with scale and they have influenced the management of natural and human dominated landscapes Landscape ecology is now considered mainstream and the approaches are widely used in many branches of ecology and are applied not only in terrestrial settings but also in aquatic and marine systems In response to these rapid developments an updated edition of Landscape Ecology in Theory and Practice provides a synthetic overview of landscape ecology including its development the methods and techniques that are employed the major questions addressed and the insights that have been gained
