Conservation of the Cactus Ferruginous Pygmy-owl in Arizona Jean-Luc E. Cartron, 2000 This report is the result of a cooperative effort by the Rocky Mountain Research Station and the USDA Forest Service Region 3 with participation by the Arizona Game and Fish Department and the Bureau of Land Management It assesses the state of knowledge related to the conservation status of the cactus ferruginous pygmy owl in Arizona The population decline of this owl has been attributed to the loss of riparian areas before and after the turn of the 20th century Currently the cactus ferruginous pygmy owl is chiefly found in southern Arizona in xeroriparian vegetation and wellstructured upland desertscrub The primary threat to the remaining pygmy owl population appears to be continued habitat loss due to residential development Important information gaps exist and prevent a full understanding of the current population status of the owl and its conservation needs

Neotropical Owls Paula L. Enriquez, 2017-07-24 This book presents a comprehensive biological and ecological information about owls in the neotropic area In addition the book covers topics such as threats and conservation strategies for these nocturnal birds of prey from 18 Neotropical countries Owls are a good example of diversification processes and have developed evolutionary characteristics themselves These species are found almost everywhere in the world but most of them are distributed in tropical areas and about a third of them live in the Neotropics This biogeographic region has a high biodiversity and even share lineages of species from other continents because at some point all were part of Pangea Although we still have much to know and understand about this diverse scarcely studied and threatened group this work aims to be a precedent for future and further research on the subject Barn Owls Iain Taylor, 2003 This book discusses the relationship between barn owls their prey and prospects for conservation **Owls of North America and the Caribbean** Scott

Gehlbach,2009-06 The eastern screech owl widespread over the eastern half of North America and noticeably tolerant of human activity is one of America s most familiar birds Residing naturally in wooded environs with tree cavities

this owl lives well in suburbia and can be found nesting in mailboxes porch columns and purple martin houses Based on a twenty five year study biologist Frederick R Gehlbach tells the life story of the eastern screech owl focusing on case studies of suburban and rural study plots in Central Texas This is the first thorough study of major life history behavioral and ecological features of the species Indeed it is the first concurrent comparative study of an urban and a rural population of any New World animal Told in a personal voice the story of these birds will interest all who have not lost touch with their ancestral world However Gehlbach has also included quantitative data and analysis of interest to ecologists wildlife biologists and ornithologists Photographs including color shots of the gray and rufous phases figures and tables provide further detail Gehlbach s investigations have been those of not only an academic ecologist but a suburbanite curious about his natural surroundings The result is a model of research on species population dynamics and adaptation yielding an emerging picture of what the eastern screech owl needs for successful coexistence with human neighbors **The Action Plan for**

Australian Birds 2020 Stephen T. Garnett,G Barry Baker,2021-12-01 The Action Plan for Australian Birds 2020 is the most comprehensive review of the status of Australia s avifauna ever attempted The latest in a series of action plans for Australian birds that have been produced every decade since 1992 it is also the largest The accounts in this plan have been authored by more than 300 of the most knowledgeable bird experts in the country and feature far more detail than any of the earlier plans This volume also includes accounts of over 60 taxa that are no longer considered threatened mainly thanks to sustained conservation action over many decades This extensive book covers key themes that have emerged in the last decade including the increasing impact of climate change as a threatening process most obviously in Queensland s tropical rainforests where many birds are being pushed up the mountains However the effects are also indirect as happened in the catastrophic fires of 2019 20 Many of the newly listed birds are subspecies confined to Kangaroo Island where fire destroyed over half the population But there are good news stories too especially on islands where there have been spectacular successes with predator control Such uplifting results demonstrate that when action plans are followed by action on the ground threatened species can indeed be recovered and threats alleviated *The Eagle Owl* Vincenzo Penteriani,María del Mar Delgado,2019-06-27 SHORTLISTED FOR THE 2021 TWS WILDLIFE PUBLICATION AWARDS The definitive work on Europe s largest and most spectacular owl The Eagle Owl is one of the largest owls in the world and is considered the most eclectic in terms of habitat nest site and diet An undisputed top predator it can prey on a range of mammals up to the size of a fox and almost every species of bird reptile amphibian and fish as well as a wide spectrum of invertebrates Surprisingly this owl can breed almost anywhere the female laying her eggs on a variety of natural and artificial structures over an array of altitudes Despite being so adaptable however it is still a vulnerable species and has suffered widely from persecution as well as other threats including electrocution on power lines decreasing prey availability the effects of pesticides and pollutants and habitat alteration Vincenzo Penteriani and Mar a del Mar Delgado have studied this fascinating bird extensively across

its vast Eurasian range In this book they detail its intriguing ecology covering distribution foraging and breeding behaviour interspecific interactions dispersal and conservation issues The final two chapters provide a remarkable insight into vocal and visual communication Scientists have long believed that owls and other crepuscular and nocturnal birds forgo the visual signals found in other avian species but recent research on the Eagle Owl has suggested otherwise Bringing together more than 30 years of research The Eagle Owl tells a story rich in detail of one of the most thrilling and magnificent birds in the world

Wildlife of the Box-Ironbark Country Chris Tzaros,2021-10 Victoria s Box Ironbark region is one of the most important areas of animal diversity and significance in southern Australia The forests and woodlands of this region provide critical habitat for a diverse array of woodland dependent animals including many threatened and declining species such as the Squirrel Glider Brush tailed Phascogale Regent Honeyeater Swift Parrot Pink tailed Worm Lizard Woodland Blind Snake Tree Goanna and Bibron s Toadlet Wildlife of the Box Ironbark Country gives a comprehensive overview of the ecology of the Box Ironbark habitats and their wildlife and how climate change is having a major influence This extensively revised second edition covers all of the mammals birds reptiles and frogs that occur in the region with a brief description of their distribution status ecology and identification together with a detailed distribution map and superb colour photograph for each species The book includes a Where to watch section featuring a selection of national parks state parks and nature conservation reserves where people can experience the ecosystem and its wildlife for themselves This book is intended for land managers conservation and wildlife workers fauna consultants landholders teachers students naturalists and all those interested in learning about and appreciating the wildlife of this fascinating and endangered ecosystem
