Ecology Christian Reflections:

Ecology Forward Movement Publications,1994-08-01 **Creation as Sacrament** John Chryssavgis,2019-06-27 John Chryssavgis explores the sacred dimension of the natural environment and the significance of creation in the rich theological history and spiritual classics of the Orthodox Church through the lens of its unique ascetical liturgical and mystical experience The global ecological crisis affecting humanity s air water and land as well as the planet s flora and fauna has resulted in manifest fissures on the image of God in creation Chryssavgis examines from an Orthodox Christian perspective the possibility of restoring that shattered image through the sacramental lenses of cosmic transfiguration cosmic interconnection and cosmic reconciliation The viewpoints of early theologians and contemporary thinkers are extensively explored from a theological and spiritual perspective including countering those who deny that God s creation is in crisis Presenting a worldview advanced and championed by the Orthodox Church in the modern world this book encourages personal and societal transformation in making ethical and economic choices that respect creation as sacrament

Creation and Hope Nicola Hoggard Creegan,Andrew Shepherd,2018-04-25 We live in an ecological age Science in the last few hundred years has given us a picture of nature as blind to the future and mechanical in its workings even while ecology and physics have made us aware of our interconnectedness and dependency upon the web of life As we witness a possible sixth great mass extinction there is increasing awareness too of the fragility of life on this planet In such a context what is the nature of Christian hope St Paul declares that all of creation will be set free from its bondage to decay and will obtain the freedom of the glory of the children of God How are we to imagine this freedom when death and decay are essential to biological life as we currently experience it and when the scientific predictions for life are bleak at best This book explores these questions reflecting on how our traditions shape our imagination of the future and considering how a theology of hope may sustain Christians engaged in conservation initiatives The essays in this volume are partly in dialogue with the ground breaking work of Celia Deane Drummond and are set in the context of global and local Aotearoa New Zealand ecological challenges *Christianity and Ecological Theology* E. M. Conradie,2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa **An Ecological Christian Anthropology** Ernst M. Conradie,2017-03-02 What is the place and vocation of human beings in the earth community This is the central question that this contribution towards a Christian ecological anthropology addresses In ecological theology this question is often answered by the affirmation that We are at home on earth This affirmation rightly responds to the widespread sense of alienation from nature to the anthropocentrism that pervades much of the Christian tradition and to concerns about the scope of environmental devastation This book

challenges the affirmation that we are at home on earth examining natural suffering anxieties concerning human finitude and especially the pervasiveness of evil The book investigates contributions to ecological theology South African and African theology reformed theology and contemporary dialogues between theology and the sciences in search of a thoroughly ecological Christian anthropology Ecology of Vocation Kiara A. Jorgenson, 2020-05-15 Critically surveying various approaches to Christian ecological ethics alongside the vexing moral ambiguities of the Anthropocene Ecology of Vocation offers an integrative approach to responsible living vis vis one of Protestantism's key theological resources the doctrine of vocation Drawing on H Richard Niebuhr's germinal ethical framework with a decidedly ecofeminist perspective Kiara A Jorgenson demonstrates how vocation's emphasis on right relationship practically speaks to the embodied realities of planetary interrelatedness By excavating the ecological promise of the early Reformers democratized renderings of calling and linking their concerns to the contemporary context she argues that vocation cannot be reduced to the particular aim of monetized work nor to an elitist escape from it Rather vocation must be recast as the dynamic and vibrant space among the myriad roles any of us inhabits at any given time in a particular place When understood in this light vocation signals much more than a job a passion or a quest for self discovery An alternative understanding of vocation's very ecology can extend Christian conceptions of the neighbor beyond the human and lead the church to more faithfully pursue lives characterized by humility restraint wisdom justice and love Ecological Hermeneutics David G. Horrell, Cheryl Hunt, Christopher Southgate, Francesca Stavrakopoulou, 2010-06-02 Leading scholars reflect critically on the kinds of appeal to the Bible that have been made in environmental ethics and ecotheology and engage with biblical texts with a view towards exploring their contribution to an ecological ethics The essays explore the kind of hermeneutic necessary for such engagement to be fruitful for contemporary theology and ethics Crucial to such broad reflection is the bringing together of a range of perspectives biblical studies historical theology hermeneutics and theological ethics The thematic coherence of the book is provided by the running focus on the ways in which biblical texts have been or might be read This volume is not about ecotheology but is instead about ecological hermeneutics Indeed some essays show where biblical texts or particular approaches in the history of interpretation represent anthropocentric or even anti ecological moves One of the overall aims of the book is to suggest how and why an ecological hermeneutic might be developed and the kinds of interpretive choices that are required in such a development The Wiley Blackwell Companion to Religion and Ecology John Hart, 2017-03-24 In the face of the current environmental crisis which clearly has moral and spiritual dimensions members of all the world's faiths have come to recognize the critical importance of religion's relationship to ecology The Wiley Blackwell Companion to Religion and Ecology offers a comprehensive overview of the history and the latest developments in religious engagement with environmental issues throughout the world Newly commissioned essays from noted scholars of diverse faiths and scientific traditions present the most cutting edge thinking on religion's relationship to the environment Initial readings explore the

ways traditional concepts of nature in Christianity Judaism Islam Buddhism and other religious traditions have been shaped by the environmental crisis Readings then address the changing nature of theology and religious thought in response to the challenges of protecting the environment Various conceptual issues and themes that transcend individual traditions climate change bio ethics social justice ecofeminism and more are then analyzed before a final section examines some of the immediate challenges we face in caring for the Earth while looking to the future of religious environmentalism Timely and thought provoking Companion to Religion and Ecology offers illuminating insights into the role of religion in the ongoing struggle to secure the future well being of our natural world With a foreword by Ecumenical Patriarch Bartholomew I and an Afterword by John Cobb Religion and Ecology in the Public Sphere Celia Deane-Drummond, Heinrich Bedford-Strohm, 2011-06-30 **Christianity and Ecology** Dieter T. Hessel, Rosemary Radford Ruether, 2000 What can Christianity as a tradition contribute to the struggle to secure the future well being of the earth community This collaborative volume the third in the series on religions of the world and the environment announces that an ecological reformation an eco justice reorientation of Christian theology and ethics is prominent on the ecumenical agenda The authors explore problematic themes that contribute to ecological neglect or abuse and offer constructive insight into and responsive imperatives for ecologically just and socially responsible living **Routledge Handbook of Religion and Ecology** Willis J. Jenkins, Mary Evelyn Tucker, John Grim, 2016-07-22 The moral values and interpretive systems of religions are crucially involved in how people imagine the challenges of sustainability and how societies mobilize to enhance ecosystem resilience and human well being The Routledge Handbook of Religion and Ecology provides the most comprehensive and authoritative overview of the field It encourages both appreciative and critical angles regarding religious traditions communities attitude and practices It presents contrasting ways of thinking about religion and about ecology and about ways of connecting the two terms Written by a team of leading international experts the Handbook discusses dynamics of change within religious traditions as well as their roles in responding to global challenges such as climate change water conservation food and population It explores the interpretations of indigenous traditions regarding modern environmental problems drawing on such concepts as lifeway and indigenous knowledge This volume uniquely intersects the field of religion and ecology with new directions within the humanities and the sciences This interdisciplinary volume is an essential reference for scholars and students across the social sciences and humanities and for all those looking to understand the significance of religion in environmental studies and policy **Biodiversity and Ecology as Interdisciplinary Challenge** Denis Edwards, Mark Worthing, Mark William Worthing, 2004 This book examines the interface between biodiversity and theology *Saving the Earth?* E. M. Conradie, 2013 Christians seeking to save the Earth have to relate creation to salvation by doing justice to both themes This study explores the ambiguous legacy of the ways in which this challenge has been approached in the reformed tradition of Swiss Dutch and German origins and in the reception of this tradition in South Africa The book focuses on the

diverging interpretations of the category of re creation in this regard Series Studies in Religion and the Environment Studien zur Religion und Umwelt Vol 8 **World Christianity and Ecological Theologies** Raimundo C Barreto,Graham McGeoch,Wanderley Pereira Da Rosa,2024 This volume showcases the intersection of religion and ecology as approached by scholars of religious studies and theology in the Global South and the Global North It points to what can be generated by these bodies of scholarship engaged as dialogue partners to investigate new patterns of religious environmentalism *The Spirit Shaped Church* Swarup Bar,2021-02-23 In *The Spirit Shaped Church* Swarup Bar argues that the church is defined by its relationship with others A relational church depends on the porousness of its borders which means that while a church has its distinctiveness it ought to be open to negotiate relational engagements with the world around it This sort of relationally distinct permeable church is found to be possible through the leading of the Spirit and the work of Christ Such engagement is found to be relevant in a plural religio cultural context and in situations of marginalization in India The Spirit Shaped Church reflects an ongoing commitment on the part of Fortress Press to engage the needs of Christian communities around the world The book is aimed at teachers clergy students and anyone with an interest in the lived experience of Christians in India Toward an Ecology of Transfiguration John Chryssavgis,Bruce V. Foltz,2013-06-03 Can Orthodox Christianity offer unique spiritual resources especially suited to the environmental concerns of today This book makes the case that yes it can In addition to being the first substantial and comprehensive collection of essays in any language to address environmental issues from the Orthodox point of view this volume with contributions from the most highly influential theologians and philosophers in contemporary world Orthodoxy will engage a wide audience in academic as well as popular circles resonating not only with Orthodox audiences but with all those in search of a fresh approach to environmental theory and ethics that can bring the resources of ancient spirituality to bear on modern challenges Environment, Economy, and Christian Ethics Alistair Young,2015 Economist Alistair Young urges Christians to support strong governmental and intergovernmental action to improve existing global economic systems and provide adequate environmental protection The book argues that environmental policy raises important ethical and theological issues around uncertainty inequality the rights of traditional communities and the obligation to respect nonhuman creation While theologians have not always shown awareness of the likely economic consequences of their own proposals a key aim of this book is to develop sound ethical foundations for environmental policy while providing concrete perspective on economic realities *Early Ecotheology and Joseph Sittler* Panu Pihkala,2017 When did Christians begin to address environmental questions What can be learned from these pioneering thinkers This study reveals that between 1910 and 1954 many theologians called for responsibility towards nature The focal point is the work of Joseph Sittler 1904 1987 an American Lutheran and ecumenical theologian The role of these early ecotheologians is discussed in relation to environmental history and education The findings show that ecotheology was not as strongly separated from other environmentalism as it was after the 1960s Series Studies in Religion

and the Environment Studien zur Religion und Umwelt Vol 12 Subject Religious Studies Environmental Studies Ecotheology Joseph Sittler *Law, Religion and the Environment in Africa* M. Christian Green, Muhammed Haron, 2020-06-03 This volume explores themes of ecotheology ecofeminism environmental pollution and degradation climate change human and environmental rights sustainable development human animal relations through totem and taboo sacred sites and spaces and other environmental topics in ways that add immeasurably to the study of African environmentalisms and the interaction of law and religion In terms of religion the capability of humans not only to sin and destroy the earth but also to repair and redeem it is very much in evidence across Christianity Islam and Africa s many indigenous religious and cultural traditions In terms of law the need for effective policies and for states and governments to work with indigenous groups and communities towards environmental solutions is also apparent **Readings in Christian Ethics** David K. Clark, Robert V. Rakestraw, 1994 Ethical interpretations meet real life Case studies and readings explore divergent views on morals in action
