Ecology In Ancient Civilizations:

Ecology in Ancient Civilizations Johnson Donald Hughes, 1975 Intended to serve as an introduction to the environmental history of the ancient world from preface **The Ancient Mediterranean Environment between Science and History** William V. Harris, 2013-07-25 Scientists historians and archaeologists are at last beginning to collaborate seriously on studies of the long term history of the environment The fruit of an international conference held in Rome in 2011 The Ancient Mediterranean Environment between Science and History brings together scientists and scholars who are interested in the interaction of their several disciplines as well as in specific problems such as the effects of climate change and other environmental factors on historical developments and events the sources of the energy and fuel used in ancient civilizations and the effects of humans on the lands around the Mediterranean The collection balances broad Mediterranean wide studies and tightly focused studies of particular regions in Italy and Jordan *Environmental Problems of the Greeks and Romans* J. Donald Hughes, 2014-02-15 How did ancient societies change the environment and how do their actions continue to affect us today In this dramatically revised and expanded second edition of the work entitled *Pan's Travail* J. Donald Hughes examines the environmental history of the classical period and argues that the decline of ancient civilizations resulted in part from their exploitation of the natural world Focusing on Greece and Rome as well as areas subject to their influences Hughes offers a detailed look at the impact of humans and their technologies on the ecology of the Mediterranean basin Evidence of deforestation in ancient Greece the remains of Roman aqueducts and mines and paintings on centuries old pottery that depict agricultural activities document ancient actions that resulted in detrimental consequences to the environment Hughes compares the ancient world's environmental problems to other persistent social problems and discusses attitudes toward nature expressed in Greek and Latin literature In addition to extensive revisions based on the latest research this new edition includes photographs from Hughes's worldwide excursions a new chapter on warfare and the environment and an updated bibliography *Ecology in ancient civilizations* J. Donald Hughes, 1975 **Ecocriticism, Ecology, and the Cultures of Antiquity** Christopher Schliephake, 2016-12-07 Although current environmental debates lay the focus on the Industrial Revolution as a sociopolitical development that has led to the current environmental crisis many ecocritical projects have avoided historicizing their concepts or have been characterized by approaches that were either pre historic or post historic while the environmental movement has harbored the dream of restoring nature to a state untouched by human hands there is also the pessimistic vision of a post apocalyptic world exhausted by humanity's consumption of natural resources Against this background the decline of nature has become a narrative template quite common among the public environmental discourse and environmental scientists alike The volume revisits Antiquity as an epoch which witnessed similar environmental problems and came up with its own interpretations and solutions in dealing with them This decidedly historical perspective is not only supposed to fill in a blank in ecocritical discourse but also to question problematize and

inform our contemporary debates with a completely different take on nature and humanity's place in the world. Thereby a productive dialogue between contemporary ecocritical theories and the classical tradition is established that highlights similarities as well as differences. This volume is the first book to bring ecocriticism and the classical tradition into a comprehensive dialogue. It assembles recognized experts in the field and advanced scholars as well as young and aspiring ecocritics. In order to ensure a dialogic exchange between the contributions, the volume includes four response essays by established ecocritics which embed the sections within a larger theoretical and practical ecocritical framework and discuss the potential of including the pre-modern world into our environmental debates. *The Decline of Nature* Gilbert F. LaFreniere, 2012-07

Ecology and Theology in the Ancient World Ailsa Hunt, Hilary F. Marlow, 2019-03-21 This multi-disciplinary volume brings together the voices of biblical scholars, classicists, philosophers, theologians, and political theorists to explore how ecology and theology intersected in ancient thinking, both pagan, Jewish, and Christian. Ecological awareness is by no means purely a modern phenomenon. Of course, melting icecaps and plastic bag charges were of no concern in antiquity; frequently, what made examining your relationship with the natural world urgent was the light this shed on human relationships with the divine. For in the ancient world to think about ecology was also to think about theology. This ancient eco-theological thinking, whilst in many ways worlds apart from our own environmental concerns, has also had a surprisingly rich impact on modern responses to our ecological crisis. As such, the voices gathered in this volume also reflect on whether and how these ancient ideas could inform modern responses to our environment and its pressing challenges. Through multi-disciplinary conversation, this volume offers a new and dynamic exploration of the intersection of ecology and theology in ancient thinking and its living legacy. *Ecology and Environment in European Drama* Downing Cless, 2010-05-11 Looking at European drama through an ecological lens, this book chronicles nature and the environment as primary topics in major plays from ancient to recent times. Cless focuses on the few yet well-known plays in which nature is at stake in the action or the environment is a dramatic force. Though theater predominantly explores human and cultural themes, these plays fully display the power of the other-than-human world and its endangerment during the history of Europe. While offering a broad overview, the book features extensive case studies of several playwrights' plays and eco-theater productions: Aristophanes' *The Birds*, Marlowe's *Doctor Faustus*, Shakespeare's *A Midsummer Night's Dream* and *The Tempest*, and Giraudoux's *The Madwoman of Chaillot*. In each case, Cless connects nature in the play to nature in the life of the playwright based on biographical research into the understanding of natural philosophy and awareness of the immediate environment that influenced the specific play. The book is one of the first of its kind in a growing field of ecocriticism and emerging eco-studies of theater. [Introduction to Water Resources and Environmental Issues](#) Karrie Lynn Pennington, Thomas V. Cech, 2021-08-19 Thoroughly updated and expanded, new edition introduces students to the complex world of water resources and environmental issues. **The Developing World and the Environment** Rajendra Ramlogan, 2004-09-28 The seeds of the demise of many early

civilizations Mesopotamian Greek Roman and Mayan found fertile ground in environmental conflicts The roots of environmental crises are also embedded in the industrial revolution the advent of the age of science and technology urbanization changes in agriculture the population explosion and the rise in consumerism It is no surprise that even today the global village is highly concerned with the issue of environmentalism In this study author Rajendra Ramlogan calls for a re examination of the legal and institutional framework for protection of the global environment within the context of the special needs of the developing world This unique third world perspective on international environmental law is suitable for college level courses

The Environmental Humanities and the Ancient World Christopher Schliephake, 2020-07-23 What can a study of antiquity contribute to the interdisciplinary paradigm of the environmental humanities And how does this recent paradigm influence the way we perceive human nature interactions in pre modernity By asking these and a number of related questions this Element aims to show why the ancient tradition still matters in the Anthropocene Offering new perspectives to think about what directions the ecological turn could take in classical studies it revisits old material including ancient Greek religion and mythology with central concepts of contemporary environmental theory It also critically engages with forms of classical reception in current debates arguing that ancient ecological knowledge is a powerful resource for creating alternative world views

Pan's Travail Johnson Donald Hughes, 1994 Many people express surprise writes J Donald Hughes when they are told that environmental problems existed in the ancient world they are used to thinking of the environment as an exclusively modern concern But an examination of the evidence shows that the Greeks and Romans not only suffered from some of the same predicaments that plague the present scene but in many cases they were aware of them and commented on them In Pan s Travail Hughes examines the environmental history of the classical period and argues that the decline of ancient civilizations resulted in part from exploitation of the natural world Focusing on Greece and Rome as well as on areas subject to their influences Hughes offers a detailed look at the impact of humans and their technologies on the ecology of the Mediterranean basin He explores the complex relationships of human culture and the environment with topics that include deforestation and overgrazing soil erosion depletion of wildlife and natural resources pollution and urban problems such as water supply and sewage disposal He also compares the ancient world s environmental problems to those of other eras and discusses attitudes toward nature expressed in Greek and Latin literature
