The Encyclopedia of Public Choice Charles Rowley, Friedrich Schneider, 2008-01-25 The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice However the title would not convey sufficiently the breadth of the Encyclopedia's contents which can be summarized better as the fruitful interchange of economics political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume Adam Ferguson and Adam Smith contributed to all these fields and more However as intellectual specialization gradually replaced broad based scholarship from the nineteenth century onwards it became increasingly rare to find a scholar making major contributions to more than one Once Alfred Marshall defined economics in neoclassical terms as a narrow positive discipline the link between economics political science and moral philosophy was all but severed and economists redefined their role

 Okeoghene Odudu,2006 This monograph addresses two problems surrounding the interpretation and application of Article
 81 of the EC Treaty what is competition and how does Article 81 ensure that competition is protected After over 40 years of
 application and a period of modernisation decentralisation and reflection it is possible to understand Article 81 and what it
 seeks to achieve The monograph s aim is to reveal the intellectual order and rational structure underlying the law so as to
 enable the reader to understand Article 81 in a clear and rigorous manner This is done by breaking Article 81 down into its
 constituent elements and examining the function that each element serves Arguing that jurisdiction rests on a public private
 distinction both the substantive and the justificatory rules are cast to generate obligations appropriate for private actors to
 perform Actors and activities falling within the scope of Article 81 are subject to the substantive element prohibiting
 contrived reductions in output Since output reduction can co exist with cost reduction innovation and that these latter
 features are desirable cost reduction and innovation operate to justify infringement of the substantive obligation Thus this
 monograph argues that output cost and innovation are the only legitimate issues in an Article 81 analysis It is in this sense
 that the monograph is concerned with the boundaries of Article 81 EC
