## **Economic Organization Of East Asian Capitalism:**

**The Economic Organization of East Asian Capitalism** Marco Orru, Nicole Woolsey Biggart, Gary Hamilton, 1997 East Asia's dynamic entrance into the global economy has provided a fruitful avenue for research in economic sociology. In this perceptive and timely volume, authors Nicole Woolsey Biggart, Gary G. Hamilton, and the late Marco Orru theorize Asian capitalism and analyze the economic organization of East Asia. Presenting differing dimensions of a Weberian perspective, the authors first provide a theoretical grounding, then consider capitalism in East Asia comparatively, and finally contrast the economies of East Asia and Europe. *The Economic Organization of East Asian Capitalism* shows how radically different social and cultural institutions can lead to economies that are organized and work in remarkably similar ways. This thought-provoking volume will be essential for students and professionals in the fields of political science, management, third world studies, sociology, international relations, international business, and cross-cultural studies.

**Asian Economic and Political Issues** Frank H. Columbus, 1998 It is predicted by some observers that the 21st century will be remembered as the Asian Century. Many of the countries in the region seem to be able to take the economic and trade baton when one of the others experiences problems. The region in general continues to grow economically, politically, and militarily. The articles presented in this volume examine the current political and economic situations in nations across Asia, particularly focusing on economic developments.

**The Rise and Fall of the East Asian Growth System, 1951-2000** Huang Xiaoming, 2004-11-10 Huang gives important and high quality research on the economic growth in East Asia from 1945 to the present, assessing the various theories put forward to explain the phenomenon and appraising the various factors which have contributed to economic growth in East Asia.

**The Oxford Handbook of Asian Business Systems** Michael A. Witt, Gordon Redding, 2014 The Handbook explores institutional variations across the political economies of different societies within Asia. It includes empirical analysis of 13 major Asian business systems between India and Japan and examines these in a comparative historical and theoretical context.

*Chinese Business in Southeast Asia* Terence E. Gomez, Hsin-Huang Michael Hsiao, 2013-12-19 Presents empirical findings from different South East Asian countries to demonstrate that Chinese businessmen employ a variety of strategies in their networking, entrepreneurship, and organisational and firm development, and concludes that much more research is needed in order to provide a full understanding of Chinese business success.

**Rules and Networks** Richard Appelbaum, William Felstiner, Volkmar Gessner, 2001-12-21 International business transactions are heavily influenced by culture, practice, and rule. The pursuit of business relationships within nation states can be subject to differences in the generation of norms and the processing of disputes, but these conflicts are magnified many times over in cross-border transactions where nation-state control and support is weak or absent. This book seeks different explanations of the ways in which business people and their legal advisers try to minimise the effect of these magnified difficulties. At the outset, the editors suggest four sources through which the international business community might be

considered to have supplemented nation state conflict prevention and dispute resolution institutions an international legal order the development of a private normative order based on common business practices denominated the *lex mercatoria* through the efforts and work product of internationalised law firms and by means of extensive thick personal relationships often referred to by their Chinese term *guanxi* Since most explanations are dominated by North American and European legal scholarship and practice a second concern of this book is to open up the discussion to competing explanatory frameworks Specifically it develops the notion that global legal convergence may not be the immediate inevitable result of increased global economic interaction Rather less formal mechanisms for achieving normative understanding and predictability in business dealings may also flourish

*The Chinese Communist Party and China's Capitalist Revolution* Lance Gore, 2010-11-08 The Chinese Communist Party and China's Capitalist Revolution examines issues of political change and development in China In the last 30 years China has experienced a profound political transformation and a degree of political progress but these are largely mired in the assumption that the free market is inherently incompatible with communism and the perceived lack of political reforms in China Indeed there has not been much in the sense of democratization multi party competition freedom of speech and association but as this book demonstrates political development is not limited to these factors Based on extensive empirical investigations of the impact of the market on the communist party with a particular focus on its grassroots organisations this book finds that the Chinese communist party is undergoing profound changes in a host of important areas By analyzing the impact of China's socioeconomic transformation on the CCP and the adaptations of the Party to the new environment the book takes stock of the nature and dynamics of political change underway in China The author concludes that the Chinese communist party we knew no longer exists it is evolving into something quite different which must have political implications for both China and the rest of the world Professor Lance L P Gore is a political scientist specializing in contemporary Chinese politics at The East Asian Institute National University of Singapore

*The Oxford Handbook of Comparative Institutional Analysis* Glenn Morgan, John Campbell, Colin Crouch, Ove Kaj Pedersen, Richard Whitley, 2010-04-09 It is increasingly accepted that institutions matter for economic organization and outcomes The last decade has seen significant expansion in research examining how institutional contexts affect the nature and behaviour of firms the operation of markets and economic outcomes Yet institutions conceal a multitude of issues and perspectives Much of this research has been comparative and followed different models such as varieties of capitalism national business systems and social systems of production This Handbook explores these issues perspectives and models with the leading scholars in the area contributing chapters to provide a central reference point for academics scholars and students

*Chinese Entrepreneurship in a Global Era* Raymond Sin-Kwok Wong, 2008-06-18 As we enter the 21st century it is clear that the economic growth China has enjoyed has been extraordinary Although Western countries continue to dominate the world economy and financial markets the capital markets of Hong Kong Singapore

Shanghai and Shenzhen have matured considerably and are eager to become major global players As business own

*Chinese Enterprise, Transnationalism and Identity* Terence Gomez, Hsin-Huang Michael Hsiao, 2004-03 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company *Chinese Business in Malaysia* Terence Gomez, 2012-12-06 Chinese companies have managed to perform well in Malaysia especially after the recession in the mid 1980s due to a clear change in the Malay dominated government's attitude to Chinese capital Despite the problems that prevail among UMNO politicians the government has provided a stable economic environment and offers opportunities for domestic private investment even for the Chinese Given these circumstances it does appear that Chinese capital in Malaysia has reasonable prospects for further growth in the immediate future This study examines the dominant role of Chinese capital in the economy providing in depth empirical research on its mode of development and styles of operation Covering the period from colonial times to the present day this study identifies key issues pertaining to Chinese business operations in Malaysia ownership and control patterns style of growth relations with the state politicians and other Chinese businessmen and the manner of development of business abroad whilst debunking the theory that large scale Chinese capital is not very entrepreneurial in nature **Reflections on Multiple Modernities** Dominic Sachsenmaier, S. Shmuel Noah Eisenstadt, Jens Riedel, 2002-01-01 Multiple Modernities is a departure from the classic sociological homogenization theories The edition presents an interdisciplinary discussion of the topic in sociological historical and economic dimensions It explores culturally specific forms of modernity with a focus on China and Europe *Readings in Economic Sociology* Nicole Woolsey Biggart, 2008-04-15 These articles over thirty in total reflect the best and latest thought in the exciting field of economic sociology Beginning with the foundation of Smith Marx Engels and Polanyi the volume gathers some of the best writings by economic sociologists that consider national and world economies as both products and influences of society Contains over twenty articles by classical and contemporary economic social theorists Covers important topics on economic action states and markets Includes insightful editorial introductions and further reading suggestions Handbook of Research on Asian Business Henry Wai-Chung Yeung, 2007 This volume is excellent Students who are interested in Asian business should read it and will find the comprehensive bibliography offered by the different contributors very helpful In light of the recent global financial crises it is time to re examine the Asian miracles as well as the Western models of business organizations and regulations This volume offers great insights not just on Asian business but also on Western economies and business It is also time to adopt an integrative approach recommended by Yeung through comparative research of businesses and economies in different institutions and cultures Yifei Sun Economic Geography An absolute must have for college library reference shelves filled cover to cover with keen analyses that any businessperson seeking to make inroads in an Asian market needs to study at length Midwest Book Review This book serves as an important guide to the many fascinating research questions about Asian business waiting to be addressed The study of Asian business has reached equality in importance to the study of

business in Europe and North America Researchers who study any of these regions have an incentive to follow the study of business in the other regions if for no other reason than that many global firms from each region operate in all regions now Nonetheless the more important reason for knowledge transfer among researchers of each region is that these exchanges can only advance everyone's research Henry Yeung and the contributors are to be thanked for setting out a rich agenda for research on Asian business that will elevate this study to equality with research elsewhere in the world Eurasian Geography and Economics This book is extremely comprehensive and well researched It will be of particular interest to scholars in the fields of international business development studies economic geography regional studies as well as international and national policymakers Science Technology Society The rise of Asia as an important region for global business has been widely recognized as one of the most significant economic phenomena in the new millennium This accessible and comprehensive Handbook brings together state of the art reviews of Asian business in an expansive range of areas including business organizations strategic management marketing state business relations business and development business policy issues It is argued that whilst academic studies on Asian business have been in existence for over two decades there is relatively little systematic integration of our knowledge and research on Asian business The contributors drawn from a variety of disciplines within the social sciences aim to redress the balance with their lively cutting edge discussion Serving as a timely overview of more than two decades of scholarly research this Handbook will be an essential resource for academics students and researchers interested in Asian business

**A World of Regions** Peter J. Katzenstein, 2015-11-16 Observing the dramatic shift in world politics since the end of the Cold War Peter J Katzenstein argues that regions have become critical to contemporary world politics This view is in stark contrast to those who focus on the purportedly stubborn persistence of the nation state or the inevitable march of globalization In detailed studies of technology and foreign investment domestic and international security and cultural diplomacy and popular culture Katzenstein examines the changing regional dynamics of Europe and Asia which are linked to the United States through Germany and Japan Regions Katzenstein contends are interacting closely with an American imperium that combines territorial and non territorial powers Katzenstein argues that globalization and internationalization create open or porous regions Regions may provide solutions to the contradictions between states and markets security and insecurity nationalism and cosmopolitanism Embedded in the American imperium regions are now central to world politics

**Theoretical Developments and Future Research in Family Business** Philip Phan, John E. Butler, 2008-03-01 Until recently research in family business has been confined to a sub group of entrepreneurship scholars labor economists and sociologists Family business employment is often the only economic option available to migrants the first entrepreneurial experience for young people and a source of an economy's new business creation activities These issues are typically framed in terms of the generational transfer of wealth management succession or the interplay between the economic system of a family and its sociopolitical system The phenomenon is clearly widespread

but for some reason continues to be poorly understood We believe that progress on the empirical front has been hampered by a lack of accepted theoretical frameworks For example attempts to employ agency theory geographic agglomeration and spill overs social networks sense making bargaining and other frameworks have been scattered In our view the extant research has not created the theoretic ballast that can withstand repeated empirical verification More fundamentally researchers are beginning to ask Is family business theoretically distinctive or a convenient phenomenon for exploiting familiar theories with new data We believe the time is ripe for a focused look at the theoretical history and prospects of family business research Review articles grounded in economics sociology psychology and political economy and that offer multidisciplinary implications are especially sought Theory based empirical papers are also welcomed We believe that there are exciting opportunities for theory development and so encourage authors to focus on this in their submissions In sum the focus of this volume is on showcasing and advancing the latest research in family business

Oxford Handbook of Sociology, Social Theory and Organization Studies Paul S. Adler, Paul du Gay, Glenn Morgan, Michael Reed, 2014-10-16 Sociology and social theory has always been a major source of new perspectives for organization studies Access to a series of authoritative accounts of theorists and research themes in sociology and social theory which have influenced developments in organization studies is essential for those wishing to deepen and extend their knowledge of the intersection of sociology and organization studies This goal is achieved by drawing on a group of internationally renowned scholars committed in their own work to strengthening these links and asking them to provide critical accounts of particular theorists and research themes which have straddled this divide This volume aims to strengthen ties between organization studies and contemporary sociological work at a time when there are increasing institutional barriers to such cooperation potentially generating a myopia that constricts new developments Used in conjunction with its companion volume *The Oxford Handbook of Sociology and Organization Studies* Classical foundations the reader is provided with a comprehensive account of the productive and critical interaction between sociology and organization studies over many decades Highly international in scope theorists and themes are drawn from both the USA and Europe in equal measure Similarly the authors of the chapters are drawn from both sides of the Atlantic The result is a series of chapters on individuals and key research themes and debates which will provide faculty and post graduate researchers with appreciative authoritative and critical accounts that can be drawn on to design courses or provided guided reading to the field

*A Weberian Analysis of Business Groups and Financial Markets* Sandro Segre, 2008-05-01 Moral economy as a set of rules which regulate market transactions has been the object of much research and debate since the 1980s it has also been the focus of classical sociological authors such as Weber Simmel and Toennies Weber in particular examined the rules of the moral economy in the financial markets and this volume sheds light on his contribution to the subject The book formulates two models of business relations one oligopolistic model the other based on free competition which are derived from Weber and Simmel's writings and which represent alternative instances of

the moral economy Empirical case studies in the form of South Korea and Taiwan are included to exemplify the two models and to highlight the consequences of adopting one model over the other The volume also examines the conduct of actors in some of the leading financial markets with reference to Weber s writings on the 19th century London and Berlin Stock Exchanges     *State Collaboration and Development Strategies in China* Alexius Pereira,2003-09-02 This book looks at Singapore and China to examine governmental collaboration on a foreign direct investment oriented strategy Focusing on the unique collaborative venture the Suzhou Industrial Park project the author explores the economic political and social relationships between Singapore and China throughout the course of the scheme as well as discussing why certain strategies were adopted how they were implemented and their outcomes     *The Resurgence of East Asia* Giovanni Arrighi,Takeshi Hamashita,Mark Selden,2004-02-24 The East Asian expansion since the 1960s stands out as a global power shift with few historical precedents The Resurgence of East Asia examines the rise of the region as one of the world s economic power centres from three temporal perspectives 500 years 150 years and 50 years each denoting an epoch in regional and world history and providing a vantage point against which to assess contemporary developments
