The IMF and Economic Development James Raymond Vreeland, 2003-03-03 Why do governments turn to the International Monetary Fund IMF and with what effects This book argues that governments enter IMF programs for economic and political reasons and finds that the effects are negative on economic growth and income distribution By bringing in the IMF governments gain political leverage via conditionality to push through unpopular policies Note that if governments desiring conditions are more likely to participate estimating program effects is not straightforward one must control for the potentially unobserved political determinants of selection This book addresses the selection problem using a dynamic bivariate version of the Heckman model analyzing cross national time series data The main finding is that the negative effects of IMF programs on economic growth are mitigated for certain constituencies since programs also have distributional consequences But IMF programs doubly hurt the least well off in society they lower growth and shift the income distribution upward

The Oxford Handbook of the Politics of Development Carol Lancaster, Nicolas van de Walle, 2018-05-01 In many discussions of nations development we often focus on their economic and social development Is it becoming wealthier Is its society modernizing Is it becoming more technologically sophisticated Are social outcomes improving for the broad mass of the public The process of development policy implementation however is always and inevitably political Put simply regime type matters when it comes to deciding

on a course of development to follow Further political institutions matter When a government's institutional capacity is low the chances of success severely decline regardless of the merits of the development plan In The Oxford Handbook of the Politics of Development two of America's leading political scientists on the issue Carol Lancaster and Nicolas van de Walle have assembled an international cast of leading scholars to craft a broad state of the art work on this vitally important topic This volume is divided into five sections major theories of the politics of development organized historically e.g. modernization theory dependency theory the Washington consensus of policies without politics etc key domestic factors and variables key international factors and variables political systems and structures and geographical perspectives inclusive of regional dynamics A comprehensive and cross regional examination on key issues of political development this Handbook not only provides an authoritative synthesis of past scholarship but also sets the agenda for future research in this discipline

Economic Crises and the Breakdown of Authoritarian Regimes Thomas B. Pepinsky, 2009-08-17 Why do some authoritarian regimes topple during financial crises while others steer through financial crises relatively unscathed In this book Thomas B. Pepinsky uses the experiences of Indonesia and Malaysia and the analytical tools of open economy macroeconomics to answer this question Focusing on the economic interests of authoritarian regimes supporters Pepinsky shows that differences in cross border asset specificity produce dramatically different outcomes in regimes facing financial crises When asset specificity divides supporters as in Indonesia they desire mutually incompatible adjustment policies yielding incoherent adjustment policy followed by regime collapse When coalitions are not divided by asset specificity as in Malaysia regimes adopt radical adjustment measures that enable them to survive financial crises Combining rich qualitative evidence from Southeast Asia with cross national time series data and comparative case studies of Latin American autocracies Pepinsky reveals the power of coalitions and capital mobility to explain how financial crises produce regime change

Reforms at Risk Eric M. Patashnik, 2024-11-01 A fascinating account of why some general interest policy reforms stick and others fall apart This is political science at its best Julian Zelizer Princeton University Winner of the Louis Brownlow Book Award National Academy of Public Administration Reforms at Risk is the first book to closely examine what happens to sweeping and seemingly successful policy reforms after they are passed Most books focus on the politics of reform adoption yet as Eric Patashnik shows here the political struggle does not end when major reforms become enacted Why do certain highly praised policy reforms endure while others are quietly reversed or eroded away Patashnik peers into some of the most critical arenas of domestic policy reform including taxes agricultural subsidies airline deregulation emissions trading welfare state reform and reform of government procurement to identify the factors that enable reform measures to survive He argues that the reforms that stick destroy an existing policy subsystem and reconfigure the political dynamic Patashnik demonstrates that sustainable reforms create positive policy feedbacks transform institutions and often unleash the creative destructiveness of market forces Reforms at Risk debunks the argument that reforms inevitably fail

because Congress is prey to special interests and the book provides a more realistic portrait of the possibilities and limits of positive change in American government. It is essential reading for scholars and practitioners of U S politics and public policy offering practical lessons for anyone who wants to ensure that hard fought reform victories survive. In this penetrating and important book Eric Patashnik explores the political circumstances that enable reforms to endure. Paul J Quirk, University of British Columbia. Decentralization and Local Governance in Developing Countries Pranab Bardhan, Dilip Mookherjee, 2006-06-16. Over the past three decades the developing world has seen increasing devolution of political and economic power to local governments. Decentralization is considered an important element of participatory democracy and along with privatization and deregulation represents a substantial reduction in the authority of national governments over economic policy. The contributors to Decentralization and Local Governance in Developing Countries examine this institutional transformation from comparative and interdisciplinary perspectives offering detailed case studies of decentralization in eight countries: Bolivia, Brazil, China, India, Indonesia, Pakistan, South Africa and Uganda. Some of these countries witnessed an unprecedented big bang shift toward comprehensive political and economic decentralization: Bolivia in 1995 and Indonesia after the fall of Suharto in 1998. Brazil and India decentralized in an uneven and more gradual manner. In some other countries such as Pakistan, devolution represented an instrument for consolidation of power of a nondemocratic national government. In China, local governments were granted much economic

but little political power South Africa made the transition from the undemocratic decentralization of apartheid to decentralization under a democratic constitution The studies provide a comparative perspective on the political and economic context within which decentralization took place and how this shaped its design and possible impact Contributors Omar Azfar Gianpaolo Baiocchi Pranab Bardhan Shubham Chaudhuri Ali Cheema Jean Paul Faguet Bert Hofman Kai Kaiser Philip E Keefer Asim Ijaz Khwaja Justin Yifu Lin Mingxing Liu Jeffrey Livingston Patrick Meagher Dilip Mookherjee Ambar Narayan Adnan Qadir Ran Tao Tara Vishwanath Martin Wittenberg
