Economic Change in Precolonial Africa Philip D. Curtin, *Labour and Living Standards in Pre-Colonial West Africa* Klas Rönnbäck, 2015-11-19 Sub Saharan Africa is the poorest region in the world But its current status has skewed our understanding of the economy before colonization Rönnbäck reconstructs the living standards of the population at a time when the Atlantic slave trade brought money and men into the area enriching our understanding of West African economic development *Slavery, Colonialism and Economic Growth in Dahomey, 1640-1960* Patrick Manning, 2004-06-07 This book integrates into a single framework Dahomey's pre colonial colonial and post colonial economic history Africa's Development in Historical Perspective Emmanuel Akyeampong, Robert H. Bates, Nathan Nunn, James Robinson, 2014-08-11 Why has Africa remained persistently poor over its recorded history Has Africa always been poor What has been the nature of Africa's poverty and how do we explain its origins This volume takes a necessary interdisciplinary approach to these questions by bringing together perspectives from archaeology linguistics history anthropology political science and economics Several contributors note that Africa's development was at par with many areas of Europe in the first millennium of the Common Era Why Africa fell behind is a key theme in this volume with insights that should inform Africa's developmental strategies **The Oxford Handbook of Africa and Economics: Context and concepts** Célestin Monga, Justin Yifu Lin, 2015 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this handbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on Africa and Africa's contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers

political scientists and anthropologists Economic Growth and the Ending of the Transatlantic Slave Trade David Eltis, 1987 This is the first study to consider the consequences of Britain's abolition of the Atlantic slave trade for British imperial expansion and the world economy The Oxford Handbook of Modern African History John Parker, Richard Reid, 2013-10-10 The Oxford Handbook of Modern African History represents an invaluable tool for historians and others in the field of African studies This collection of essays produced by some of the finest scholars currently working in the field provides the latest insights into and interpretations of the history of Africa a continent with a rich and complex past An understanding of this past is essential to gain perspective on Africa's current challenges and this accessible and comprehensive volume will allow readers to explore various aspects political economic social and cultural of the continent's history over the last two hundred years Since African history first emerged as a serious academic endeavour in the 1950s and 1960s it has undergone numerous shifts in terms of emphasis and approach changes brought about by political and economic exigencies and by ideological debates This multi-faceted Handbook is essential reading for anyone with an interest in those debates and in Africa and its peoples While the focus is determinedly historical anthropology geography literary criticism political science and sociology are all employed in this ground-breaking study of Africa's past **A Different Vision** Thomas D Boston, 2002-01-04 This work brings together for the first time the ideas philosophies and interpretations of North America's leading African American economists demonstrating that racial inequality has had an immense impact on African Americans daily lives The Atlantic Slave Trade Herbert S. Klein, 1999-04-13 6 The Middle Passage *Rethinking the African Diaspora* Edna G. Bay, Kristin Mann, 2013-09-13 As a result of new research we can now paint a more complex picture of peoples and cultures in the south Atlantic from the earliest period of the slave trade up to the present The nine papers in this volume indicate that a dynamic and continuous movement of peoples east as well as west across the Atlantic forged diverse and vibrant re-inventions and re-interpretations of the rich mix of cultures represented by Africans and peoples of African descent on both continents **British Imperialism and Globalization, C. 1650-1960** Gareth Austin, 2022 Examining the domestic politics of imperial expansion these essays question the role of the Industrial Revolution and British imperial leadership beyond the issue of hierarchy and The Great Divergence This volume brings together leading global economic historians to honour Patrick O'Brien's contribution to the establishment of global economic history as a coherent and respected field in the academy Inspired by O'Brien's seminal work on the British Industrial Revolution as a global phenomenon these essays expand the role of the Industrial Revolution and British imperial leadership beyond the issue of hierarchy and The Great Divergence The change from the protective Atlantic empire 1650-1850 to the free trade empire of the last half of the long nineteenth century is elaborated as are the conscious efforts of the free trade empire to develop markets and market economies in Africa British domestic politics associated with the change and the continuation to the recent politics of Brexit are fascinatingly narrated and documented including the economic rationale for imperial expansion

in the first instance The narrative continues to the crises of globalization caused by the world wars and the Great Depression which forced the free trade British Empire to change course Further the effects of the crises and the imperial reaction on the East African colonies and on New Zealand and Australia are examined Given current concerns about the environmental impact of economic activities it is noteworthy that this volume includes the environmental impact of globalization in India caused by the free trade policy of the British free trade empire

Identity in the Shadow of Slavery Paul E. Lovejoy,2000-09-13 Addresses issues relating to the gender ethnic and cultural factors through which enslaved Africans and their descendents interpreted their lives under slavery thereby creating communities with a shared sense of identity The focus of the book is on the ways in which identities were formulated under slavery and the ways in which the struggle to escape slavery and its legacy continued to affect the lives of descendents of slaves The introductory essay explores an approach to the study of the African diaspora that looks outward from Africa and places the following chapters written by

leading authorities from Europe and North and South America in the context of the theoretical literature *Africans* John Iliffe, 1995-08-25 In a vast and all embracing study of Africa from the origins of mankind to the South African general election of 1994 John Iliffe refocuses African history on the peopling of an environmentally hostile continent Africans have been pioneers struggling against disease and nature and their social economic and political institutions have been designed to ensure survival and maximise numbers These institutions enabled them to survive the slave trade and colonial invasion but in the context of medical progress and other twentieth century innovations the same institutions have bred the most rapid population growth the world has ever seen This demographic growth has lain behind the collapse of colonial rule the disintegration of Apartheid and the instability of contemporary nations The history of the continent is thus a single story binding living Africans to their earliest human ancestors **Transactional Culture in Colonial Dakar, 1902-44** Rachel M. Petrocelli, 2024 Examines Dakar's transformation from a small colonial capital to a dynamic city highlighting how its resourceful residents challenged French control by forging adaptive economic relationships During a transformative era in the first half of the twentieth century Dakar former capital of French West Africa and present day capital of Senegal evolved from a small colonial capital meant to serve the French administration to a dynamic city shaped not solely by colonial planners but also by its resourceful inhabitants In this important book historian Rachel Petrocelli introduces the concept of transactional culture a set of norms and practices forged by Dakar's residents to navigate life under colonial rule A central element of that culture was transience a defining feature permeating various facets of life in Dakar from commerce and employment to housing and interactions with the state The book uncovers a central dynamic economic relationships in Dakar were continually molded by the ebb and flow of diverse individuals each pursuing their own objectives despite the relentless efforts of the French state to exert control Both Europeans and Africans embraced adaptability in Dakar over fixed residence while immigrant communities implanted themselves and became integral to the city's transactional culture In this examination based on court records and other sources Petrocelli shows that as the French colonial state sought to shape and control Dakar it enacted policies to intentionally limit city dwellers resources Strategies like pawning possessions and taking out credit creatively devising housing and mobilizing identities and affiliations emerged as a result integrating Dakarois of every background These practices persisted long after French rule ended underscoring the enduring impact of Dakar's colonial history
