Recycling and the Politics of Urban Waste Matthew Gandy,2014-06-03 The affluence of western society has given rise to unprecedented quantities of waste presenting one of the most intractable environmental problems for contemporary society This book examines recycling and municipal waste management in three major cities London New York and Hamburg A range of political and economic issues are examined to illustrate how any reduction in the size of the waste stream in order to achieve more equitable and environmentally sustainable patterns of resource use is incompatible with the current emphasis in the use of the market for environmental protection The case studies show how contrary to the hopes of many environmentalists and policy makers municipal waste management is moving steadily towards the profitable option of incineration with energy recovery rather than the recycling of materials or waste reduction at source The evidence suggests that the achievement of a more sustainable pattern of recycling and waste management policy would demand a fundamental change in public policy to give government a more active role in environmental protection

Municipal Solid Wastes Robert E. Landreth,Paul A. Rebers,2020-07-26 Environmental scientists and engineers are faced with the challenge of how to manage increasing amounts of solid waste Furthermore waste management officials are constantly faced with the question Which option is the most appropriate one in this situation and how does it compare to other options For these individuals and for the general public *Municipal Solid Wastes Problems and Solutions* helps to

answer this and other questions by presenting the issues of waste handling and disposal from general management concepts to specific techniques Each topic is carefully reviewed problems are presented and possible solutions are discussed Legislation that affects recycling and disposal is covered *Proceedings of the Green Materials and Electronic Packaging Interconnect Technology Symposium* Mohd Arif Anuar Mohd Salleh, Dewi Suriyani Che Halin, Kamrosni Abdul Razak, Mohd Izrul Izwan Ramli, 2023-07-02 This book presents peer reviewed articles from the Green Materials and Electronic Packaging Interconnect Technology Symposium EPITS 2022 held in Langkawi Malaysia on 14th and 15th of Sept 2022 It brings together packaging experts to share and exchange ideas in electronics technology Topics covered in this volume include but are not limited to 1 Green materials and technology 2 Emerging interconnect materials and technologies 3 Non solder interconnect materials at chip and package levels 4 Fundamental materials behavior for electronic packaging materials 5 Advanced characterization methods as applied to electronic packaging technology 6 Developments in high temperature Pb free solders and associated interconnects for automotive and power electronics 7 Surface coating materials 8 Advanced materials **Improving Recycling Markets** OECD, 2006-11-13 Markets for many classes of recyclable materials are growing but market failures and barriers are constraining some markets This report presents the case for the use of industrial policies which address such market failures and barriers *Mixed Plastics Recycling Technology* Bruce Hegberg, 1992-12-31 Presents an overview of mixed plastics recycling technology In addition it characterizes mixed plastics wastes and describes collection methods costs and markets for reprocessed plastics products *Bibliography of Municipal Solid Waste Management Alternatives* , 1989 **Conversion And Utilization Of Waste Materials** M. Rashid Khan, 2023-01-13 This text identifies the problems and opportunities of converting wastes into useful materials or fuels Chapters cover such issues as waste Utilization And Recycling Plastics Polymers Tyres And Automotive wastes and the potential usage of coal conversion by products **Decision-makers Guide to Solid Waste Management** United States. Environmental Protection Agency. Office of Solid Waste and Emergency Response, 1989 **Environmental Infrastructure Management** J.J. Boland, M.E. Bell, Eugene Z. Stakhiv, 2013-06-29 Environmental issues continue to burden governments and economies throughout the post communist countries of Central and Eastern Europe and the newly independent states of the former Soviet Union Severe environmental degradation is endemic to the region the existing environmental infrastructure is often inadequate significant new investment is perhaps decades away and there is little knowledge of advanced techniques for impact assessment project evaluation and project financing The first two papers of Environmental Infrastructure Management survey available cost effective technology for solid waste treatment and air pollution control providing guidance for possible incremental additions to existing infrastructure There is also a discussion of transferable pollution credits as an instrument in regulating air quality The discussion of economic incentives also embraces user fees and other pollution control instruments A range of methods is presented for the evaluation and comparison of alternative projects where data are

poor or scarce Canadian experience with specific capital budgeting techniques is given comprehensive attention Debt financing strategies are addressed in the context of present day Ukraine Finally an outline is given of a general framework for making decisions about environmental projects including the use of environmental impact assessments

Plastic value chains: Case: WEEE (Waste Electrical and Electronic Equipment) John Baxter, Margareta Wahlstrom, Malin Zu Castell-Rüdenhausen, Anna Fråne, 2015-03-02 This project identifies improvements in plastics recycling from Nordic electronic waste Limited improvement is possible through modest changes in the existing value chain such as ensuring that wastes are directed as intended But for the most part enhanced plastics recycling implies higher costs The necessary changes could be driven in part through revised policy and regulatory instruments These changes might in turn encourage more positive engagement from electronics producers The report is part of the Nordic Prime Ministers overall green growth initiative The Nordic Region leading in green growth Read more in the web magazine Green Growth the Nordic Way at www.nordicway.org or at www.norden.org/greengrowth
