Regional Convergence in the European Union Juan R. Cuadrado-Roura,Marti Parellada,2013-03-14 The introduction of the single currency in the European economic space constitutes without doubt the most visible step towards monetary and economic integration in the EU Those who boosted the birth of the Common Market in 1957 dreamt that this would one day come about as a logical consequence of the integration process However things have gone much more slowly than possibly imagined although if

taken in an adequate historic perspective it is undeniable that the agreements that have led to European Monetary Union signify a really formidable jump in the process of political and economic integration in Europe This is something many doubted would ever happen but which is already a reality although still in need of a period of consolidation The most general economic consequences of the EMU have already been analysed in considerable depth Proof of this is the literature already available In general there is coincidence in affirming that the balance of the results expected is clearly positive Firstly as a result of the anticipated gains in efficiency a consequence of reduction of transaction costs associated to the previous existence of different currencies and of the elimination of exchange rate uncertainties *Handbook of Transportation Policy and Administration* Jeremy Plant,2007-02-22 In the past few decades the field of transportation has changed dramatically Deregulation and greater reliance on markets and the private sector has helped to reconfigure the transport industries while the rise of intermodal goods and global commerce has produced efficiencies of operation and a greater interdependence among transport modes In a [International Bibliography of Economics](#) Compiled by the British Library of Political and Economic Science,2001-11-22 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences
