El-Ayouty, H.C. Brooks, 2012-12-06 As an emerging Continent with a rich past dynamic present and promising future Africa has an important role to play in the development of international organization Well before Africa Year 1960 when several African States attained their independence and their rightful place in the community of nations the various movements for unity and co operation strove towards the creation of regional international organization Now more than ever before nearly two scores of African States members of the United Nations the Organization of African Unity and several other sub regional organizations and arrangements look upon international organization as an important means for safeguarding their independence enhancing African identity forging collaborative bonds amongst themselves and with the outside world and

raising the standard of living for their populations. It should also be noted that the age of science and technology which is and should be based on international co-operation stimulates further Africa's desire to strengthen and work through international inter-governmental organizations. As Africa faces the 1970s confronting the core problems of colonialism and apartheid in its southern parts, she looks upon the United Nations and the Organization of African Unity as the main vehicles for thought and action. For these considerations, the present book resulting from the St *Human Security Studies: Theories, Methods And Themes* Sorpong Peou, 2014-03-31. *Human Security Studies: Theories, Methods and Themes* examines the concept of human security from different theoretical and methodological perspectives and shows how they help shed light on the different themes of global intervention. Liberal perspectives represented by global legalism and developmentalism share the optimism that human security can be ensured and enhanced through strengthening global governance. Realists remain skeptical about this liberal vision. While also critical of the liberal promise, critical theorists and feminists offer radical perspectives on human security. All these perspectives help explain the challenges of military intervention for human protection, micro-disarmament, international criminal justice, smart sanctions, human rights and democracy promotion and human development.

The Asian Yearbook of International Economic Law AYIEL 2024 addresses the rapidly evolving field of international economic law with a special focus on Asia and the Pacific. With the rapidly changing geopolitical situation, protectionist measures have been taken by many countries which has caused significant impact on international economic governance. Given the importance of Asia and the Pacific, it is necessary to study on trade protectionism and its impacts especially from a regional perspective. The AYIEL 2024 therefore focuses on Protectionism and International Economic Law, exploring the recent trade measures taken by leading economies amid the changing geopolitical and geoeconomic situation as well as the potential impacts of these changes on Asian countries and beyond. *American Book Publishing Record Cumulative, 1950-1977* R.R. In the early decades of European integration, the enforcement of EU competition law was highly centralised. Virtually all enforcement actions under Articles 101 and 102 TFEU were initiated by the European

Commission More recently the enforcement of EU competition law has become less centralised many would say even decentralised In 2004 essentially in an effort to increase enforcement capacity in the wake of EU enlargement the involvement of Member State competition authorities was significantly reinforced by national authorities being given power to pursue infringements of EU competition law largely on the basis of their domestic enforcement regimes This combination of decentralisation and enforcement autonomy raises questions about the relationship between EU law and national law as well as about the costs of enforcement This new book links these questions by analysing how competences in the area of sanctions are distributed between EU and national law and how this influences the costs of enforcement The author's conclusions which highlight the economic implications of the choices made by competition authorities courts and legislators will be of use to all the above in further developing EU competition policy The PhD thesis on which this book is based was declared runner up in the 2013 Concurrences Awards
