Economics And Politics Of Industrial Policy The United States And Western Europe:

Economics And Politics Of Industrial Policy Steven A. Shull, 2019-03-08 Industrial policy is a good example of the growing economic and political interdependency between Europe and the United States The contributors to this volume which compiles the proceedings of the seventh conference sponsored by the Institute for the Comparative Study of Public Policy examine the ways in which national and supranational in the case of the European Community industrial policies are implemented It is thought that diversity within the country is the primary reason why the United States does not have a comprehensive national policy There is a consensus among the authors that the U S economy is less subject or amenable to central government planning than the economies of Europe In Europe there is more interest in coordinating industrial policy throughout the European Community but here too the failure to adopt a comprehensive policy reveals the enormous diversity and parochialism that conflict with supranational goals The contributors conclude that while a centrally planned and implemented industrial policy may be desirable we do not have the means to achieve it Acknowledging the major industrial and trade problems facing the United States and Western Europe the authors feel that it is not clear whether these problems can be resolved by government intervention

Routledge Revivals: Industrial Dislocation (1991) Daniel Todd, 2018-05-08 First published in 1991 this book offers a thorough examination of the decline of heavy industry in industrialised countries in the West which focuses on problems in the shipbuilding industry Todd argues that three points are central to its demise industrial life cycles the international division of labour and the energy crises of 1973 His work begins with despondency in western shipbuilding going back as early as 1956 when Japan usurped Britain as the pre eminent ship producer The book goes on to explore international trade and industry in the second half of the 20th century with analysis on industrial reorganisation and East Asian conglomerates diversification with the marine industries and shipbuilding in Brazil India and China

Industry and Politics in West Germany Peter J. Katzenstein, 1989 Under the editorship of Peter J Katzenstein thirteen distinguished scholars from both sides of the Atlantic here provide an original interpretation of the political economy of the Bonn Republic during the forty years since its founding and explore in particular its extraordinary capacity for accommodating change

Domestic Structures and International Trade Candido Garcia Molyneux, 2001-02-09 This book places international trade law within an economic political and sociological context contending that globalisation is characterised by both homogeneity and diversity However while implying changes within contracting parties globalisation only results in a thin homogeneity Furthermore globalisation is the result of the interaction negotiations and policies between states From this perspective the book attempts to explain trade policy as resulting from domestic factors Thus if globalisation is characterised by diversity how do such differences affect the trade policy of states in an era where nearly everything is subject to commerce The book focuses on the US and the EC analysing different institutional and substantive aspects of

unfair trade instruments such as anti dumping and countervailing measures and market access instruments Domestically it focuses on both constitutional and socio economic constraints The book considers political action prescribed by formal constitutions in a wider socio economic context rejecting the a historical and structurally blind normative idea of free trade

Industrial Policy in Europe after 1945 C. Grabas,A. Nützenadel,2014-03-31 Bringing together renowned scholars in the field with younger researchers this interdisciplinary study of the history of post war industrial policy in Europe investigates transfers across borders and locates industrial policy in the context of the Cold War from a global perspective

International Governance Oran R. Young,2018-05-31 How can the global environment be safeguarded in the absence of a world government In the vanguard of efforts to address this critical question Oran R Young draws on environmental issues to explore the nature of international governance Young s analysis invokes the distinction between governance a social function involving the management of interdependent individuals or groups and government a set of formal organizations that makes and enforces rules

European Integration, 1950-2003 John Gillingham,2003-06-02 Integration is the most significant European historical development in the past fifty years eclipsing in importance even the collapse of the USSR Yet until now no satisfactory explanation is to be found in any single book as to why integration is significant how it originated how it has changed Europe and where it is headed Professor Gillingham s work corrects the inadequacies of the existing literature by cutting through the genuine confusion that surrounds the activities of the European Union and by looking at his subject from a truly historical perspective The late twentieth century has been an era of great though insufficiently appreciated accomplishment that intellectually and morally is still emerging from the shadow of an earlier one of depression and modern despotism This is a work then that captures the historical distinctiveness of Europe in a way that transcends current party political debate

The Political Economy and Media Coverage of the European Economic Crisis Julien Mercille,2014-08-27 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent it has failed to revive economies The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter s aim has been to shift the burden of adjustment onto citizens This book explains how and why using a critical political economic perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe s peripheral countries Through a systematic analysis of Ireland s main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis

The International Economy Peter B. Kenen,2000-01-13 This text is an introduction to international economics for upper level undergraduates and above The first half examines the causes and effects of international trade how tariffs and other trade policies affect the

gains from trade and the ways in which governments try collectively to regulate those policies The second half deals with monetary matters the behavior of exchange rates how trade and capital flows affect the functioning of monetary and fiscal policies the causes and management of currency crises and the new European monetary union This fourth edition assesses the outcome of the Uruguay Round of trade negotiations the work of the new World Trade Organization WTO and the challenges posed by regional trade blocs A problem set follows each chapter European Power and The Japanese Challenge William R. Nester, 1993-06-18 Analyzing relations amidst the European Community's growing unity and Japan's ever more dynamic economy this book compares the processes means ends successes and failures of European and Japanese industrial trade and foreign policies Nester has also written Japan and the Third World **Business and the State in Developing Countries** Sylvia Maxfield, Ben Ross Schneider, 2018-09-05 Much of the debate about development in the past decade pitted proponents of unfettered markets against advocates of developmental states Yet in many developing countries what best explains variations in economic performance is not markets or states but rather the character of relations between business and government The studies in Business and the State in Developing Countries identify a range of close collaborative relations between bureaucrats and capitalists that enhance elements of economic performance and defy conventional expectations that such relations lead ineluctably to rent seeking corruption and collusion All based on extensive field research the essays contrast collaborative and collusive relations in a wide range of developing countries mostly in Latin America and Asia and isolate the conditions under which collaboration is most likely to emerge and survive The contributors highlight the crucial roles played by capable bureaucracies and strong business associations Trade and Transitions Marsha Chandler, Robert Howse, Michael Trebilcock, 2004-01-14 Faced with increased levels of international competition and mounting budget deficits some developed Western economies have responded by introducing trade restrictions This book uses a comparative analysis of eight leading industrial nations including Japan the United States West Germany and Britain to demonstrate that such policies are mistaken Alternatives to trade restrictions including subsidies for industries and labour market policy instruments are also shown to have their drawbacks and the book emphasises the need for countries to find and exploit policies which fulfil their own political and social needs but which are least injurious to their trading partners *Foreign Economic Trends and Their Implications for the United States*, 1969 **The Handbook of European Defence Policies and Armed Forces** Hugo Meijer, Marco Wyss, 2018-06-22 The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war A truly cross European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature The Handbook of European Defence Policies

and Armed Forces aims to fill this gap with fifty one contributions on European defence and international security from around the world The six parts focus on country based assessments of the evolution of the national defence policies of Europe s major medium and lesser powers since the end of the cold war the alliances and security partnerships developed by European states to cooperate in the provision of national security the security challenges faced by European states and their armed forces ranging from interstate through intra state and transnational the national security strategies and doctrines developed in response to these challenges the military capabilities and the underlying defence and technological industrial base brought to bear to support national strategies and doctrines and finally the national or multilateral military operations by European armed forces The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe

Government and Economic Growth in the 21st Century Juan E. Castañeda, 2024-12-26 This book offers an alternative view of the economy and indeed society that does not rely on an ever expanding government to address the problems which individuals typically face during their lives The book is a Classical Liberal response to the way leading economies have been mis managed in the last three decades and the principles and models that have guided such policies particularly since the outbreak of the Global Financial Crisis in 2007 09 which has resulted in enlarged government deficits and public debt as well as more intrusive government regulation and virtually no economic growth The book does not only criticise the current dominant view which favours ever growing governments but also puts forward an alternative set of policies and institutions compatible with long term growth in a free er economy The book is structured around three major themes 1 what classical liberalism is or should be and why it still matters 2 how state sponsored capitalism hinders the well functioning of the market economy as well as being a bad recipe for economic growth and individual freedom and 3 which are the essential Classical Liberal institutions necessary for a free market economy to flourish This volume will be accessible not only to specialists in the subject but also to a well informed audience interested in current economic issues the role of government in the economy and how history traditions the political system and economics shape the institutions that help us to explain how markets function and their outcomes

National Diversity and Global Capitalism Suzanne Berger, Ronald Dore, 2018-10-18 How does globalization change national economies and politics Are rising levels of trade capital flows new communication technologies and deregulation forcing all societies to converge toward the same structures of production and distribution Suzanne Berger and Ronald Dore have brought together a distinguished group of experts to consider how the international economy shapes and transforms domestic structures Drawing from experience in the United States Europe and Asia the contributors ask whether competition imitation diffusion of best practice trade and financial flows are reducing national diversities The authors seek to understand whether the sources of national political autonomy are undermined by changes in the international system Can distinctive varieties of capitalism that incorporate unique and valued institutions for achieving social welfare survive in a

global economy The contributions to the volume present a challenge to conventional views on the extent and scope of globalization as well as to predictions of the imminent disappearance of the nation state s leverage over the economy

Governing Ideas J. Nicholas Ziegler,2019-05-15 Despite increasingly open markets and a pervasive move toward international production methods national governments continue to pursue remarkably distinctive policies for promoting innovation in industry J Nicholas Ziegler analyzes this apparent paradox by comparing government efforts to promote technological advance in Germany and France His findings reveal a great deal about the roots and limits of public strategies for economic growth Through close comparison of three technologies digital telephone exchanges computer controlled machine tools and semiconductors Ziegler shows how each country displays predictable strengths and weaknesses in promoting innovation These distinctive capacities depend more upon the links among different skill and knowledge bearing elites than on the structure of the state or the industrial sector in question As business outcomes hinge less on economies of scale and more on knowledge based competition the politics of contending interest groups steadily gives way to a competition for status and jurisdiction among more specialized professional groups As a result Germany s strengths stem directly from what Ziegler calls an ethos of competence whereas France s strengths stem from an order of state created elites More generally Ziegler contends neo institutional approaches to public policy need to pay far more attention to the professional identities of different occupational groups

Models of Capitalism David Coates,2014-12-01 The contemporary debate on economic policy is dominated by the issue of which model of capitalism works best

Why Syria Goes to War Fred H. Lawson,2018-09-05 Rejecting conventional explanations for Syrian foreign policy which emphasize the personalities and attitudes of leaders cultural factors peculiar to Arab societies or the machinations of the great powers Fred H Lawson describes key shifts in Damascus s response to regional adversaries in terms of changes in the intensity of political struggles at home Periodic eruptions of domestic conflict have inspired Syria s ruling coalition to adopt a wide range of programs designed to buy off domestic rivals and perpetuate the predominance of individual coalition members These programs have undermined the unity of the Ba thi regime increasing the chances that opponents will overturn the established order Challenges to the Ba thi regime become most threatening whenever crises of accumulation shake the domestic political economy Lawson contends Opposition forces gain strength when the state cannot sustain new investment or when competition increases between public and private enterprises Political and economic trends inside Syria have determined why Damascus has since 1963 alternately escalated tensions with regional rivals and adopted more accommodating postures Lawson traces this dynamic through five major episodes the 1967 war with Israel limited intervention in Jordan in 1970 the widening conflict in Lebanon in 1976 the defusing of conflict with Iraq in 1982 and the rapprochement with Turkey over Kurdish separatism in 1994 These patterns Lawson suggests may be characteristic of nations changing from one domestic economic system to a radically different one as Syria has in the transition from state

socialism to a privatized political economy
