Green Economics Molly Scott Cato, 2012-05-16 The world as we know it needs a new economics Climate change financial crisis and out of control globalization all the major problems facing the world have their root in the dominant economic system The globalised marketplace is the prevailing force in our lives undermining the real importance of our human communities and our planet Green Economics argues that society should be embedded within the ecosystem and that markets and economies are social structures that should respond to social and environmental priorities This highly readable text provides an introduction to green economics including views on taxation welfare money economic development and employment through the work of its inspirational figures including Schumacher Robertson and Douthwaite It also explores the contributions and insights of schools of thought critical of the dominant neo classical economic paradigm including ecofeminism views from the global South and the perspective of indigenous peoples Examples of effective green policies that are already being implemented across the world are presented as well as policy prescriptions for issues including climate change localization citizens income economic measurement ecotaxes and trade *Chinese Economists on Economic Reform - Collected Works of Ma Hong* Ma Hong, 2013-12-04 This book is part of a series which makes available to English speaking audiences the work of the individual Chinese economists who were the architects of China's economic reform The series provides an inside view of China's economic reform revealing the thinking of the reformers themselves unlike many other books on China's economic reform which are written by outside observers Ma Hong 1920 2007 was one of the leading advocates for China's market oriented reforms one of the earliest scholars to adopt the concept of a socialist market economy Politically active from the 1930s when he campaigned against the Japanese occupation he held many important posts notably President of the Chinese Academy of Social Sciences in the 1980s He was particularly influential in the field of industrial economics putting to use his own experiences of managing industrial enterprises and a strong advocate of the need for China's economic development to be stable The book is published in association with China Development Research Foundation one of the leading economic and social think tanks in China where many of the theoretical foundations and policy details of economic reform were formulated **The 1979 economic report of the President** United States. Congress. Joint Economic Committee, 1979 **Pope Francis, Evangelii Gaudium, and the Renewal of the Church** Duncan Dormor, Alana Harris, 2017 Focuses exclusively on Evangelii Gaudium as interpreted from a variety of interdisciplinary and

denominational perspectives with a sharper focus on the ecclesiological as well as the ecumenical potentialities for the reform and renewal of the church contained within this reorientation and reappreciation of the church's primary mission to evangelization in the modern world Globalisation and Economic Security in East Asia Helen E. Nesadurai, 2012-09-11

What is the relationship between globalization and economic security Globalisation and Economic Security in East Asia is an incisive new engagement with this important question that uses detailed conceptual exploration and fresh empirical analysis Viewing traditional neorealist conceptions of economic security as overly narrow this new study suggests that any conception of economic security in the contemporary era needs to also pay close attention to the nature of global capitalism and the insecurities it generates for societies and individuals This uniquely open ended approach to conceptualizing economic security is supported by the East Asian experience The country case studies included here reveal that while economic security has largely been posed as one of ensuring sustainable economic growth and equitable social development particularly following the 1997 to 1998 Asian financial crisis other more realist conceptions of economic security have not become irrelevant This is also an exploration of whether and how national regional and multilateral institutions as well as non state regional mechanisms help policy makers meet the task of governing in the interests of economic security This book will be of great interest to all students and scholars of international relations international political economy of East Asia globalization and security studies **Disabled People and Economic Needs in the Developing World** Majid

Turmusani, 2018-04-17 This book explores the economic situation of disabled people in developing countries focusing on rehabilitation and uses participatory framework to community development Although dealing specifically with a case study from Jordan this needs assessment study provides comparisons with other developing societies The author considers the prospect for future improvement in disability policy at a time when state budgets are already over stretched by widespread poverty unemployment and poor health conditions The book is divided into three parts Part one explores disability and economic rehabilitation within global context and sets the scene for understanding what disability is and the impact of having disability across cultures with emphasis on the experience of discrimination Part two deals with disability theory and practice in Jordan in terms of economic policies and provisions available for disabled people Part three presents concluding remarks on the rise of disability politics in developing countries and the development of a participatory policy agenda **The**

Bioregional Economy Molly Scott Cato, 2013 In a world of climate change and declining oil supplies what is the plan for the provisioning of resources Green economists suggest a need to replace the globalised economy and its extended supply chains with a more local economy But what does this mean in more concrete terms How large is a local economy how self reliant can it be and what resources will still need to be imported The concept of the bioregion developed and popularised within the disciplines of earth sciences biosciences and planning may facilitate the reconceptualisation of the global economy as a system of largely self sufficient local economies A bioregional approach to economics assumes a different system of values to

that which dominates neoclassical economics The global economy is driven by growth and the consumption ethic that matches this is one of expansion in range and quantity Goods are defined as scarce and access to them is a process based on competition The bioregional approach challenges every aspect of that value system It seeks a new ethic of consumption that prioritises locality accountability and conviviality in the place of expansion and profit it proposes a shift in the focus of the economy away from profits and towards provisioning and it assumes a radical reorientation of work from employment towards livelihood This book by leading green economist Molly Scott Cato sets out a visionary and yet rigorous account of what a bioregional approach to the economy would mean and how to get there from here The Sustainability Curriculum John Blewitt, Cedric Cullingford, 2013-06-17 The links between education and sustainable development are deepening although subject to much controversy and debate The success of the sustainability discourse depends both on the pedagogic and research functions of higher education Similarly for higher education itself to remain relevant and engaged it faces pressure not only to integrate the insights and lessons drawn from the perspective of sustainable development but also to be responsive to scrutiny of its own practices in relation to sustainability Among professionals in higher education sustainable development has its supporters and detractors It is embraced by some individuals and departments while being perceived by others as a threat to the coherence of particular disciplines Although it is not currently an academic discipline in its own right increasing public and professional familiarity with the term and the increasing urgency of global calls for the implementation of sustainable development mean that this is rapidly changing This volume analyses the impact of the concepts and practices of sustainability and sustainable development on various academic disciplines institutional practices fields of study and methods of enquiry The contributors drawn from a wide range of disciplines perspectives educational levels and institutional contexts examine the purpose of the modern university and the nature of sustainable education which includes exploring links to social movements for sustainability projects curriculum change culture and biodiversity values relating to gender equality and global responsibility and case studies on the transformation or otherwise of some specific disciplines *Neoliberalism or Neocollective Rural China* Xinyu Lu, 2024-12-01 This book presents a groundbreaking critique of neo liberal interpretations of global agricultural development challenging dominant narratives with nuanced analyses rooted in historical and theoretical frameworks It delves into diverse paths of agrarian transformation from the American Path to the Prussian Path examining the complexities of state intervention land ownership and socio political dynamics Furthermore it introduces an alternative vision for agricultural development the construction of Neo collective Rural China Through meticulous examination of case studies spanning China Russia and beyond it unveils the intricacies of rural economies migrant worker trends and grassroots innovations Emphasizing the need for inclusive policies and international collaboration this work reimagines strategies for sustainable growth in the Global South advocating for sovereignty equity and solidarity A compelling synthesis of scholarship it offers fresh insights into the multifaceted

challenges facing contemporary agricultural development

The Heart of Justice Daniel Engster, 2007-04-26 The Heart of Justice proposes a new framework of political justice based upon the practice of caring Integrating the insights of earlier care theorists with the concerns of traditional justice theorists Engster forges a new synthesis between care and justice and further argues that the institutional and policy commitments of care theory must be recognized as central to any adequate theory of justice Engster begins by offering a practice based account of caring and a theory of obligation that explains why individuals should care for others He then systematically demonstrates the implications of this account of caring for domestic politics economics international relations and culture In each of these areas he reviews the contributions of earlier care theorists and then extends their arguments to provide a more complete description of the institutions and policies of a caring society Care ethics is further put in dialogue with diverse cultural and religious traditions and used to address the challenges of multicultural justice cultural relativism and international human rights More fully than other works on care theory this book provides an over arching account of the institutions and policies of a caring society The Heart of Justice provides the first full account of a theory of justice based upon care ethics and should be of interest to anyone interested in thinking about the nature of our moral obligations and the institutions of a just society

Implications of the Euro Mark Baimbridge, Brian Burkitt, Philip Whyman, 2006-05-02 To date critical analysis of the EMU project has largely been advanced from the centre right spectrum of British politics Comparable questions from the centre left have failed to find a coherent voice Although the European fault line cannot be characterized as a neat Left Right issue there are noticeable divisions in opinion across British business the trade union movement and within the Labour Party Offering a unique insight into this key debate from the centre left eurosceptic view point this book provides a rigorous analysis of all the salient economic and political issues of concern such as the economics of a single currency employment and social implications sovereignty political determination The arguments presented in this volume highlight the emergence of a coherent alternative to deepening economic integration as a platform to build a just and equitable society Contributions are drawn from leading academics trade union leaders and prominent politicians both from the Labour Party and the wider progressive Left in British politics This informative and thought provoking book will be indispensable reading for students and practitioners in economics politics and international relations as well as those interested in this highly contentious topic
