Economic Justice and Democracy Robin Hahnel, 2013-05-13

In *Economic Justice and Democracy* Robin Hahnel puts aside most economic theories from the left and the right from central planning to unbridled corporate enterprise as undemocratic and instead outlines a plan for restructuring the relationship between markets and governments according to effects rather than contributions This idea is simple provocative and turns most arguments on their heads those most affected by a decision get to make it It's uncomplicated unquestionably American in its freedom reinforcement and essentially what anti globalization protestors are asking for Companies would be more accountable to their consumers polluters to nearby homeowners would be factory closers to factory town inhabitants Sometimes what's good for General Motors is bad for America which is why we have regulations in the first place Though participatory economics as Robert Heilbroner termed has been discussed more outside America than in it Hahnel has followed discussions elsewhere and also presents many of the arguments for and against this system and ways to put it in place

Getting Past Capitalism Cynthia Kaufman, 2012-08-24

Getting Past Capitalism begins with a critique of the impacts of capitalism on human society and the environment It looks in new ways at what capitalism is and at how it is reproduced That investigation opens the door to fresh ways of looking at how to challenge it Cynthia Kaufman looks at some fundamental questions about how capitalism comes to look like a system that is unbeatable

and how people come to have desires that work to reinforce capitalism Kaufman uses this analysis to develop ideas about how to challenge capitalism She argues that rather than looking for the fulcrum point in a system that will make it able to be overthrown we should try to understand what kinds of practices open more spaces for stopping the reproduction of capitalist processes and what kinds of structures need to be developed to make capitalism a less important part of our world Getting Past Capitalism includes a critique of capitalism and presentation of alternatives to capitalism many of which already exist It explores strategies for developing and strengthening those alternatives

The Contradictions of "Real Socialism":

The Conductor and the Conducted Michael A. Lebowitz,2012 In this concise volume noted scholar and economist Michael A. Lebowitz considers the legacy of twentieth century socialist societies or what some have termed real socialism While these societies were able to claim major achievements in areas from health care to education to popular culture they nonetheless met limited success in eroding what Marx called the opposition of the worker as direct producer and the proprietor of the means of production That this opposition between workers and managers continued to exist in one form or another under real socialism means that according to L

represented by emergent visions of ecological civilization and planned degrowth on the other The product of contemporary ecosocialist debates The Dialectics of Ecology builds on earlier works by Foster including Marx's Ecology and The Return of Nature aimed at the development of a dialectical naturalism and the formation of a path to sustainable human development
