

# The economics of mental health

By Lord Richard Layard

In a typical country **one in five** people suffers from a mental illness

Mental illness accounts for up to half of all illnesses in rich countries up to age 45, making it the most prevalent of illnesses for working age people

Mental illness accounts for **38%** of all ill health in richer countries, 2008

Roughly **6%** of working-age adults are receiving disability benefits, and **more than a third** of these benefits are for

**Mental Health Economics** Denise Razzouk, 2017-08-26 The main objective of this work is to provide a book with high quality content that becomes a reference and support for graduate course Mental Health Public Health and Epidemiology and for research in the domain of health economics applied to mental health Also this book might be useful for policymakers on formulating mental health policies Key messages of this book are based on a mental illness represent a huge cost for society and for health care b health economics applied to mental health could help in the optimization of resource allocation for mental health care and for better decision making in terms of balancing costs and benefits c interventions and treatment should be also chosen in general medical practice and in public decision policy according to cost effectiveness burden of disease and equity principles d quality of care is related with better outcomes higher quality of life for clients and with lower costs for society and health system best value for money e it is possible to decrease the burden of mental disorders with cost effective treatments The book is divided in four main topics 1 Introduction to Health Economics applied to Mental Health this section is an overview of basic principles concepts and methods used in Economics and Health Economics to enable students to make critical appraisal of Health Economics texts and also to design research studies in this topic 2 Health Economics applied to the evaluation of quality and costs of Mental Health Services this section presents results of Brazilian studies on the costs of mental health care hospital outpatient care residential care informal care methods on the measurement of costs and it discusses issues related with public policies decisions and quality of mental health care in the low and middle income countries context There is also an overview of quality indicators of mental health care and instruments to evaluate mental health services and costs 3 Health Economics applied to evaluate treatment of mental disorders This section presents a review of cost effectiveness of pharmacological treatments and other interventions applied for treating the most burdensome mental disorders such as depressive and anxiety disorders bipolar disorders psychosis alcohol and drug disorders dementia and hyper attention deficit disorders 4 Health Economics burden and indirect costs of mental disorders This section highlights the social and economic burden caused by mental illness under societal perspective focusing on stigma unemployment indirect costs in the workplace absenteeism and presenteeism the relationship between poverty and mental disorders global health and social determinants of mental health and on the costs of mental disorders depression anxiety psychosis alcohol and drug disorders We present some instruments to measure indirect costs of mental disorders

Economics and Mental Health Thomas G. McGuire, 1999 This paper is concerned with the economics of mental health We argue that mental health economics is like health economics only more so uncertainty and variation in treatments are greater the assumption of patient self interested behavior is more dubious response to financial incentives such as insurance is exacerbated the social consequences and external costs of illness are formidable We elaborate on these statements and consider their implications throughout the chapter Special characteristics of mental illness and persons with mental illness

are identified and related to observations on institutions paying for and providing mental health services We show that adverse selection and moral hazard appear to hit mental health markets with special force We discuss the emergence of new institutions within managed care that address long standing problems in the sector Finally we trace the shifting role of government in this sector of the health economy *Economics and Mental Health* Richard G. Frank, Willard G. Manning, Jr., 1992-11-01 And they present case studies that outline experimental systems of delivering health care **Economics and Mental Health** Thomas G. McGuire, Burton Allen Weisbrod, 1981 Mental Illness and the Economy Meyer Harvey Brenner, 1973 By correlating extensive economic and institutional data from New York State for the period from 1841 to 1967 Harvey Brenner concludes that instabilities in the national economy are the single most important source of fluctuations in mental hospital admissions or admission rates This relation is shown to have been relatively stable from pre Civil War times to the present and has not been visibly affected either by changes in psychiatric theory and practice or by any other major social change occurring in society as a whole during that time span Copyright Libri GmbH All rights reserved The Economics of Mental Health Care Ruth Williams, Doessel, 2017-07-28 This title was first published in 2001 This original study of mental health care presents a conceptual approach to the nature of the industry's multiple outputs It pays special attention to the economic role of government and also uses conventional economic theory to analyze the fact that the needs and wants of people with mental illnesses and their care givers are frequently neglected *The FDA Follies* Herbert Burkholz, 1958-01 **Economics of Mental Illness** Rashi Fein, 1958 OECD Health Policy Studies Making Mental Health Count The Social and Economic Costs of Neglecting Mental Health Care Hewlett Emily, Moran Valerie, 2014-07-08 This book addresses the high cost of mental illness the organisation of care changes and future directions for the mental health workforce indicators for mental health care and quality and tools for better governance of the system The Economics of Mental Illness Bruce N. Robinson, 1966 *Economics of Mental Illness* Rashi Fein, 1958 **The Economics of Mental Health Care** Ruth F.G Williams, Doessel, 2017 This title was first published in 2001 This original study of mental health care presents a conceptual approach to the nature of the industry's multiple outputs It pays special attention to the economic role of government and also uses conventional economic theory to analyze the fact that the needs and wants of people with mental illnesses and their care givers are frequently neglected Provided by publisher *Economics of Mental Illness* Rashi Fein, 1958 *Essays on the Economics of Mental Illness and Belief Formation* Matthew White Ridley (Scientist in economics), 2022 This thesis consists of three chapters Chapters 1 and 2 study questions relating to the economics of mental illness while Chapter 3 contributes to the literature on the behavioral economics of belief formation The first chapter studies why people who live in poverty are disproportionately affected by mental illness Gautam Rao Frank Schilbach Vikram Patel and I review the interdisciplinary evidence of the bidirectional causal relationship between poverty and common mental illnesses depression and anxiety and the underlying mechanisms Our review shows that mental illness reduces employment and therefore income

and that psychological interventions generate economic gains Similarly negative economic shocks cause mental illness and anti poverty programs such as cash transfers improve mental health A crucial step toward the design of effective policies is to better understand the mechanisms underlying these causal effects In the second chapter I study discrimination against people with common mental illnesses in labor market settings one important mechanism through which mental illness may indirectly cause lower employment and income In an online experiment I find that people pay to avoid depressed or anxious coworkers in a simple communication based problem solving task paying as much to avoid them as they do to work with the college educated A model of earnings maximizing statistical discrimination with correct beliefs cannot explain these preferences depressed or anxious coworkers are equally productive when exogenously assigned Instead I find evidence that discrimination is driven by incorrect beliefs about such coworkers as well as an increase in costly effort when working with them A major motivation for tackling discrimination is often to encourage revelation of mental illness thereby perhaps improving access to treatment or support however I find that people pay to hide mental illness in my setting even when insulated from rejection or any financial consequence of discrimination In the third chapter of my thesis John Conlon Malavika Mani Gautam Rao Frank Schilbach and I study social learning between spouses using an experiment in Chennai India We vary whether individuals discover information themselves or must instead learn what their spouse discovered via a discussion Women treat their own and their husband s information the same In sharp contrast men s beliefs respond less than half as much to information that was discovered by their wife This is not due to a lack of communication husbands put less weight on their wife s signals even when perfectly informed of them In a second experiment when paired with mixed and same gender strangers both men and women heavily discount their teammate s information relative to their own We conclude that people have a tendency to underweight others information relative to their own The marital context creates a countervailing force for women resulting in a gender difference in learning only in the household

*Health in China* Xuezheng Qin,Chee-Ruey Hsieh,2023-08-08 This book uses an economic approach to analyze the socioeconomic causes and consequences of mental health disorders in China with a special focus on mental depression Based on a nationally representative dataset we first investigate the prevalence and distribution of depression and depressive symptoms among China s adult population and then use several econometric methods to estimate the multi dimensional

disease burden of the mental disorder such as its direct medical costs its indirect economic costs and its hidden costs on social trust and life satisfaction In addition we specifically address the socioeconomic determinants of mental health by examining how the relative and absolute economic status may determine people s mental depression Lastly we propose an analytical framework to evaluate the four major hurdles that cause the treatment gaps of mental health care and discuss the policy options to overcome such hurdles and to address the unmet mental healthcare needs in China and other developing countries The book may facilitate our understanding on the complex determinants and implications of the rising prevalence of mental health disorders in developing countries like China In addition to the students teachers and researchers in the fields of health economics and public health the book may also be of interest to health policy makers and non government agencies who are concerned with addressing the global mental healthcare challenges using economic policy tools
