improving socio economic conditions The analysis addresses a gap in the literature on violence which mainly posits high violence rates after economic downturns Specifically it investigates social capital s moderating effect between Caracas political and economic structures and high violence rates This book concludes that perverse social capital found in the barrios of Caracas helps explain high violence rates while socio economic indicators improved until the early 2010s Students and researchers interested in security studies or Latin America will benefit from this book because of its extensive theoretical discussions use of primary sources and unique multidisciplinary analysis of urban violence **Handbook of Latin**
