Economics Society And Values:

Economics, Society, and Values Owen Nankivell, 1995 **Proceedings of the Conferences, Agricultural Economics Society** Agricultural Economics Society (Great Britain), 1928 The Theory of Value and Distribution in Economics Pierangelo Garegnani, Paul Samuelson, 2012-08-21 This new volume explores two alternative economic theories the classical theory and the marginalist or neoclassical theory through a discussion between two eminent economists Pierangelo Garegnani and Paul Samuelson The key themes of the volume are the difference in approaches to the explanation of the distribution of income and relative prices and therefore different approaches to all other economic problems in particular capital accumulation and economic growth The book discusses whether there is a classical approach to the theory of value and distribution at the core of economic theory that is fundamentally different from the later marginalist or neoclassical theory In the volume the late Pierangelo Garegnani argues for the validity of Piero Sraffa's position on this issue whilst the late noble laureate Paul Samuelson vehemently contests it At a time of economic crisis the future of the discipline is far from certain and so it is extremely important to bring these debates back into the light by reproducing them together for the first time A comprehensive introduction by Heinz Kurz sets the debate in this context and provides crucial background to the arguments Historical materialism and the economics of Karl Marx Benedetto Croce, 2019-11-27 In *Historical Materialism and the Economics of Karl Marx* Benedetto Croce offers a profound analysis of Marxian economics through the lens of historical materialism a framework that prioritizes social and economic factors in understanding historical development Croce engages with Marx's work dissecting its philosophical underpinnings and advocating for a synthesis of idealism and materialism His incisive prose weaves rigorous philosophical argument with historical context illustrating how economic structures influence societal evolution As a philosopher with a passion for intertextual dialogue Croce situates Marx's theories within the broader tapestry of European intellectual history critiquing and contextualizing them against the backdrop of contemporary socio-political climates A prominent figure in Italian philosophy Benedetto Croce was deeply influenced by his early exposure to Hegelian idealism and later Marxist thought As a historian politician and cultural commentator his experiences during tumultuous periods in Italy including the rise of Fascism informed his writings Croce sought to reconcile idealist philosophy with tangible social realities leading him to explore Marx's economic theories critically while grappling with their implications Croce's *Historical Materialism and the Economics of Karl Marx* is essential reading for scholars and students alike offering a comprehensive understanding of Marx's economics through a philosophical lens This book is a valuable resource for those seeking to contextualize Marxist theory within modern philosophical discourse enhancing the reader's appreciation of the complexities of socio-economic analysis **Values and Valuables** Cynthia Ann Werner, Duran Bell, 2004 This volume brings together anthropologists and economists to discuss the complex ways in which different cultures imbue material objects with symbolic qualities whose value cannot be reduced to material or monetary

equivalents **Facts, Values and Objectivity in Economics** José Castro Caldas,Vítor Neves,2012-03-22 Is Economics an objective or positive science independent of ethical and political positions The financial crisis that began in 2007 gave rise to renewed doubts regarding the objectivity of economics and brought into the public arena a debate that was previously confined to academia A remarkable feature of the public debate on the value neutrality of economics since then was that it not only involved indictments of ideological biases in economic theory but also the attribution of the crisis itself to the unethical orientation of economic agents of economists acting as experts and of economic science itself The contributors to this volume believe that economists of all persuasions are once again compelled to probe the normative foundations of their discipline and give a public account of their doubts and conclusions Institutional Economics Wendell Gordon,2014-07-03 Wendell Gordon presents the philosophy of economic institutionalism clearly and evocatively in the tradition of the pragmatism of Peirce James and Dewey In Gordon s view the institutionalism of Veblen and Ayres the only indigenous American school of economic thought offered the most hope for understanding and solving the economic problems of the twentieth century The institutional approach long known as the Texas School looks at social order as ongoing process The effort to explain how our attitudes have developed and how they are changed is central to this approach Gordon argues that the dynamics of technical change the institutionalism of behavior norms human biology and the resource endowment of the universe interact to create and change these attitudes Gordon thoroughly analyzes both orthodox and Marxist economic approaches with regard to institutional economics He also examines such other radical approaches as underconsumption and the single tax There is a discussion of the procedures and problems involved in testing for the validity of institutional theory and the analysis of economic problems in the institutional frame of reference In addition inflation energy multinationals property rights business organization unemployment and other issues are considered from an institutional perspective

Political Economy of Eco-sustainable Alternatives Richard Westra, 2025-08-22 Westra recounts how the unceremonious collapse of Soviet style socialism coupled with mounting

awareness of unfolding environmental destruction and irreversible climate change opened the door to a new wide ranging social change literature In this exciting book he begins by tracing out the case for the Anthropocene He then provides an unparalleled inclusive critical exploration of the plurality of progressive designs on offer These include the Green New Deal nowtopias of cooperative solidarity and commoning economies ecofeminism Degrowth society as well as ecosocialism and democratic socialism Westra firstly explains why the Green New Deal program to sustainably develop capitalism is unworkable given the boundedness of resources necessary to generalize the advanced economy way of life it seeks to maintain Secondly while he concurs with much that the new social change literature offers his concern is with the way it abandons a major caution that had been leveled at so called utopian socialists in the past To be sure the problem does not reside with bursts of creative future directed thinking in themselves Rather where difficulties arise is over the paucity of attention devoted to questions of economic coordination and principles of economic viability Westra explains how only by combining several economic principles each operating at a determinate scale and devoted to specific elements of human social and material reproduction will the promise of an equitable eco sustainable human future be realized This unique volume will be of interest to academic specialists and students of political economy economics environmental sustainability sociology and political science Progressive policymakers and social activists will also find its arguments refreshing and compelling

Marx's Theory of Value at the Frontiers Güney Işıkara,Patrick Mokre,2025-09-30 Why do humans produce the things they do in the way they do it As this book shows the classical political economics approach to value and prices has fundamental implications for analyzing the historical trajectory of capitalism It demonstrates that the classical political economists approach to value and prices which finds its most advanced formulation in Marx sheds light on the source of profits exploitation whether equivalents are exchanged in trade dynamics of asymmetric and uneven accumulation and the relationship of production to non human natures at large Understanding these phenomena

is key to understanding the economic regularities underlying the key issues facing the world in the twenty first century imperialism and ecological breakdown It argues powerfully that deviations between market prices production prices and labor values are central to understanding international value transfers due to differential capital compositions and rates of exploitation as well as the central role of rent and accumulation in capitalism induced ecological crisis The book is structured to provide an understandable introduction to the classical approach to value and prices and its modern expression in empirical applications making it of great interest to readers in Economics Political Economy Politics and Sociology
