Economics Crosscurrents Of The American Dream:

Economics STARreview Paul Stich, George Habib, 2002-03 Correlates with national standards for functioning as economically literate citizens Engages students with cooperative discussion questions Motivates with engaging reading writing and critical thinking activities Challenges students with major portfolio projects and authentic assessment Explores basic economic theory and issue oriented discussion on business entrepreneurship the enterprise system governmental roles and personal finance Lincoln and the Economics of the American Dream G. S. Boritt, 1994 This unique exploration of Lincoln's economic beliefs shows how they helped shape his view of slavery his conduct of the war and most fundamentally his understanding of what the United States was and could become **Black Community Uplift and the Myth of the American Dream** Lori Latrice Martin, 2018-10-26 The book uses the politics of respectability concept as an appropriate framework to show why racial disparities between black and white people in America persist The politics of respectability originated with black Baptist women in the late 19th and early 20th centuries Sadly the politics of respectability is under utilized and often confused with respectability politics The book using the politics of respectability to examine three important myths the myth of the American Dream the myth of America as a meritocracy and the model minority myth Additionally the politics of respectability is used to understand BlackLivesMatter and recent NFL protests led by Colin Kaepernick **Cavaliers and Economists** Katharine A. Burnett, 2019-05-15 Offering a compelling intervention in studies of antebellum writing Katharine A Burnett's *Cavaliers and Economists* Global Capitalism and the Development of Southern Literature 1820-1860 examines how popular modes of literary production in the South emerged in tandem with the region's economic modernization In a series of deeply historicized readings Burnett positions southern literary form and genre as existing in dialogue with the plantation economy's evolving position in the transatlantic market before the Civil War The antebellum southern economy comprised part of a global network of international commerce driven by a version of laissez faire liberal capitalism that championed unrestricted trade and individual freedom to pursue profit Yet the economy of the U S South consisted of large scale plantations that used slave labor to cultivate staple crops including cotton Each individual plantation functioned as a racially and socially repressive community a space that seemingly stood apart from the international economic networks that fueled southern capitalism For writers from the South fiction became a way to imagine the region as socially and culturally progressive while still retaining hallmarks of traditional southern culture namely plantation slavery in the context of a rapidly changing global economy Burnett excavates an elaborate network of transatlantic literary exchange operating concurrently with the region's economic expansion in which southern writers adopted popular British genres such as the historical romance and the seduction novel as models for their own representations of the U S South Each chapter focuses on a different genre pairing largely under studied southern texts with well known British works Ranging from the humorous sketch to the imperial adventure tale and the social problem novel

Cavaliers and Economists reveals how southern writers like Augusta Jane Evans Johnson Jones Hooper Maria McIntosh William Gilmore Simms and George Tucker reworked familiar literary forms to reinvent the South through fiction By considering the intersection of economic history and literary genre Cavaliers and Economists provides an expansive study of the means by which authors created southern literature in relation to global free market capitalism showing that in the process they renegotiated and rejustified the institution of slavery

Knowledge and Power in the Global Economy David Gabbard, 2017-07-05 Advancing a three fold political agenda this volume illuminates how the meanings assigned to a whole vocabulary of words and phrases frequently used to discuss the role and reform of U S public schools reflect an essentially economic view of the world contends that education or educational reform conducted under an economized worldview will only intensify the effects of the colonial relations of political and economic domination that it breeds at home and abroad and offers a set of alternative concepts and meanings for reformulating the role of U S public schools and for considering the implications of such a reformulation more generally for the underlying premises of all human relationships and activities Toward these ends the authors in Part I critically examine many of the most commonly used terms within the rhetoric of educational reform since the early 1980s and before Part II links today s economized worldview to curricular and instructional issues These essays are especially important for comprehending how the organization of school curriculum privileges those disciplines deemed most central to market expansion math and science and how the political centrality of the economic sphere influences the nature of the knowledge presented in specific content areas Given that language constrains as well as advances human thought the twin tasks of de economizing education and decolonizing society will require a vocabulary that transcends the familiar terminologies addressed in Parts I and II The entries in Part III cultivate the beginnings of such a vocabulary as the authors elucidate innovative concepts which they view as central to the creation of truly alternative educational visions and practices

A History of American Economic Thought Samuel Barbour, James Cicarelli, J. E. King, 2017-10-04 This vital addition to the Routledge History of Economic Thought series surveys arguably the most important country in the development of economics as we know it today the United States of America A History of American Economic Thought is a comprehensive study of American economics as it has evolved over time with several singularly unique features including a thorough examination of the economics of American aboriginals prior to 1492 a detailed discussion of American economics as it has developed during the last fifty years and a generous dose of non mainstream American economics under the rubrics Other Voices and Crosscurrents It is far from being a native American community and numerous social reformers and those with alternative points of view are given as much weight as the established figures who dominate the mainstream of the profession Generous doses of American economic history are presented where appropriate to give context to the story of American economics as it proceeds through the ages from seventeenth century pre independence into the twentieth first century packed full of influential figures including John Bates Clark Thorstein Veblen Irving Fisher Paul Samuelson and John Kenneth Galbraith to name but a few This volume has something for everyone interested in the history of economic thought the nexus of American economic thought and American economic history the fusion of American economics and philosophy and the history of science

Cross Currents Cindy Scheopner, Ian M. Sullivan, 2014-07-24 Philosophy begins with a question The same question is often asked in different languages Comparative philosophy is a project that engages thinkers from all areas of the world and approaches common problems from different perspectives The conversations look at not only interactions between cultures but also the relationships among humans animals and nature But the many languages and unfamiliar terms can seem intimidating even to those with formal philosophical training This book provides an approachable survey of current topics from some of the newest comparative philosophers as they enter the field Arising out of a graduate student philosophy conference at the University of Hawai i these selected papers were revised to respond to the suggestions and challenges presented during the conference For this volume foreign terms are translated and introductions and editors notes give context to the individual chapters Ignoring the traditional divisions of academic philosophy this anthology focuses rather on the common search for answers by bringing thinkers from what are labeled eastern and western philosophy into conversation with one another as members of the global community

Critical Social Issues in American Education H. Svi Shapiro, David E. Purpel, 2004-09-22 This text reader brings together powerful readings that critically situate issues of education in the context

of the major cultural moral political economic ecological and spiritual crises that confront us as a nation and a global community It provides a focus and a conceptual framework for thinking about education in light of these issues Readers are exposed to the thinking of some of the best and most insightful social and educational commentators Critical Social Issues in American Education Democracy and Meaning in a Globalizing World Third Edition is intended to work on two levels First it helps readers to develop an awareness of how education is connected to the wider social structures of cultural political and economic life Second it encourages not only a critical examination of our present social reality but also a serious discussion of alternatives of what a transformed society and educational process might look like The editors goal is to deliberately engage readers in connecting the work of teachers to an ethically committed politically charged pedagogy The assumption on which they base the text is that educators must see their work as inextricably linked to the broader conflicts stresses and crises of the social world it is not otherwise possible to make sense of what is happening educationally What happens in school or as part of the educational experience reflects expresses and mediates profound questions about the direction and nature of the society we inhabit The text is organized thematically into five sections which address respectively social justice and democracy consumerism culture and public education marginality and difference moral and spiritual perspectives on education and globalization and education Each section is preceded by a brief essay that introduces the readings This Third Edition includes many new readings and addresses issues that have more recently emerged as especially significant such as concerns about the implications of globalization and the post 9 11 world commercialism violence and the ever increasing influence of high stakes testing This compelling text is relevant for a wide range of courses in educational foundations educational policy curriculum studies and multicultural education that address the social context of education cultural and political change and public policy

Non-Western Educational Traditions Timothy G. Reagan, 2004-09-22 This text provides a brief yet comprehensive overview of a number of non Western approaches to educational thought and practice Its premise is that understanding the ways that other people educate their children as well as what counts for them as education may help us think more clearly about some of our own assumptions and values and to become more open to alternative viewpoints about important educational matters The value of this informative mind opening text for preservice and in service teacher education courses is enhanced by Questions for Discussion and Reflection and Recommended Further Readings included in each chapter New in the Third Edition Chapter 2 Conceptualizing Culture I We and The Other is new to this edition It is a response to feedback about the problems inherent in our general discourse about culture and in addition provides an example of a culture that is near to us but nevertheless alien the culture of the Deaf World Chapter 9 which deals with Islam and traditional Muslim education has been substantially revised The subtitle of the Third Edition has been changed to Indigenous Approaches to Educational Thought and Practice reflecting not so much a change in the emphases found in the book but rather a recognition of the growing scholarly interest in indigenous peoples their languages cultures and histories

Various points throughout the text have been expanded and clarified and chapters have been updated as needed

Cross Currents Sanford N. Katz, John Eekelaar, Mavis Maclean, 2000 This unique contribution to comparative law brings together dedicated essays on a comprehensive range of issues in family law in the United States and England showing how they stand at the beginning of the new century and how they reached there This provides an unparalleled opportunity to examine how family law has reacted to a period of change in family life widely held to be without precedent The legal analyses are set within critical accounts of wider social and family policy and against a fully explored demographic background provided by leading scholars in these areas Readers will be challenged to understand the nature of contemporary family law and its possible future direction

Globalization of Education Joel Spring, 2008-11-19 Continuing Joel Spring's reportage and analysis of the intersection of global forces and education this text offers a comprehensive overview and synthesis of current research theories and models related to the topic Spring introduces readers to the processes institutions and forces by which schooling has been globalized and examines the impact of these forces on schooling in local contexts Designed for courses on globalization and education international and comparative education educational foundations multicultural education and educational policy the text is written in a clear narrative style to engage readers in thoughtful consideration of topics discussed Each chapter includes Key Points that summarize the content and suggest issues and questions for critical analysis discussion and debate

The End of Evangelicalism? Discerning a New Faithfulness for Mission David E. Fitch, 2011-02-04 Why are evangelicals perceived as arrogant exclusivist duplicitous and dispassionate by the wider culture Diagnosing its political cultural presence via the ideological theory of Slavoj Žižek Fitch argues that evangelicalism appears to have lost the core of its political Jesus Christ In so doing its political has become empty Its witness has been rendered moot The way back to a vibrant political presence is through the corporate participation in the triune God's ongoing work in the world as founded in the Incarnation

Teaching for EcoJustice Rebecca A. Martusewicz, Jeff Edmundson, John Lupinacci, 2011-05-20 This text offers a powerful model for cultural ecological analysis and pedagogy of responsibility providing educators with information and classroom practices they need to educate future citizens for diverse democratic and sustainable communities

The Great American Education-Industrial Complex Anthony G. Picciano, Joel Spring, 2013-05-07 The Great American Education Industrial Complex examines the structure and nature of national networks and enterprises that seek to influence public education policy in accord with their own goals and objectives In the past twenty years significant changes have taken place in the way various interest groups seek to influence policies and practices in public education in the United States No longer left to the experience and knowledge of educators American education has become as much the domain of private organizations corporate entities and political agents who see it as a market for their ideas technologies and ultimately profits Picciano and Spring posit that educational technology is the vehicle whereby these separate movements organizations and individuals have become integrated in a powerful common

entity and detail how the educational industrial complex has grown and strengthened its position of influence This timely carefully documented well argued book brings together Picciano s perspective and expertise in the field of technology and policy issues and Spring s in the history and politics of education in a unique critical analysis of the education industrial complex and its implications for the future **Deculturalization and the Struggle for Equality** Joel Spring,2016-02-26

Joel Spring s history of school polices imposed on dominated groups in the United States examines the concept of deculturalization the use of schools to strip away family languages and cultures and replace them with those of the dominant group The focus is on the education of dominated groups forced to become citizens in territories conquered by the U S including Native Americans Enslaved Africans Chinese Mexicans Puerto Ricans and Hawaiians In 7 concise thought provoking chapters this analysis and documentation of how education is used to change or eliminate linguistic and cultural traditions in the U S looks at the educational legal and social construction of race and racism in the United States emphasizing the various meanings of equality that have existed from colonial America to the present Providing a broader perspective for understanding the denial of cultural and linguistic rights in the United States issues of language culture and deculturalization are placed in a global context The major change in the 8th Edition is a new chapter Global Corporate Culture and Separate But Equal describing how current efforts at deculturalization involve replacing family and personal cultures with a corporate culture to increase worker efficiency Substantive updates and revisions are made throughout all other chapters *A Critical Examination of STEM* Chet Bowers,2016-04-28 This critical examination of STEM discourses highlights the imperative to think about educational reforms within the diverse cultural contexts of ongoing environmental and technologically driven changes Chet Bowers illuminates how the dominant myths of Western science promote false promises of what science can achieve Examples demonstrate how the various science disciplines and their shared ideology largely fail to address the ways metaphorically layered language influences taken for granted patterns of thinking and the role this plays in colonizing other cultures thus maintaining the myth that scientific inquiry is objective and free of cultural influences Guidelines and questions are included to engage STEM students in becoming explicitly aware of these issues and the challenges they pose *Invisible Children in the Society and Its Schools* Sue Books,2015-04-24 The authors in this book use the metaphors of invisibility and visibility to explore the social and school lives of many children and young people in North America whose complexity strengths and vulnerabilities are largely unseen in the society and its schools These invisible children are socially devalued in the sense that alleviating the difficult conditions of their lives is not a priority children who are subjected to derogatory stereotypes who are educationally neglected in schools that respond inadequately if at all to their needs and who receive relatively little attention from scholars in the field of education or writers in the popular press The chapter authors some of the most passionate and insightful scholars in the field of education today detail oversights and assaults visible and invisible but also affirm the capacity of many of these young people to survive flourish and

often educate others despite the painful and even desperate circumstances of their lives By sharing their voices providing basic information about them and offering thoughtful analysis of their social situation this volume combines education and advocacy in an accessible volume responsive to some of the most pressing issues of our time Although their research methodologies differ all of the contributors aim to get the facts straight and to set them in a meaningful context New in the Third Edition Chapters retained from the previous edition have been thoroughly revised and updated and five totally new chapters have been added on the topics of young people pushed into the school to prison pipeline the environmental landscape of two out of school Mexican migrant teens in the rural Midwest the perceptions and practices in and outside schools that construct African American boys as school failures negative portrayals of blackness in the context of understanding the collateral damage of continued white privilege and working class pregnant and parenting teens efforts to create positive identities for themselves Of interest to a broad range of researchers students and practitioners across the field of education this compelling book is accessible to all readers It is particularly appropriate as a text for courses that address the social context of education cultural and political change and public policy including social foundations of education sociology of education multicultural education curriculum studies and educational policy Labor Literature
