country's main problems lie in the disregarding of the essential needs of the people. There have been major failures both to foster participatory growth and to make good use of the public resources generated by economic growth to enhance people's living conditions. Social and physical services remain inadequate from schooling and medical care to safe water, electricity and sanitation. In the long run, even high economic growth is threatened by the underdevelopment of infrastructure and the neglect of human capabilities in contrast with the holistic approach pioneered by Japan, South Korea and China. In a democracy, addressing these failures requires not only significant policy change but also a clearer public understanding of the abysmal extent of deprivation in the country. Yet public discussion in India tends to be constricted to the lives and concerns of the relatively affluent. This book presents a powerful analysis not only of India's deprivations and inequalities but also of the restraints on addressing them and of the possibility of change through democratic practice. Rationality and Freedom Amartya Sen, 2002. Rationality and freedom are among the most profound and contentious concepts in philosophy and the social sciences. In this, the first of two volumes, Amartya Sen brings clarity and insight to these difficult issues.
