Economic Interdependence and War Dale C. Copeland, 2014-11-02 Does growing economic interdependence among great powers increase or decrease the chance of conflict and war Liberals argue that the benefits of trade give states an incentive to stay peaceful Realists contend that trade compels states to struggle for vital raw materials and markets Moving beyond the stale liberal realist debate Economic Interdependence and War lays out a dynamic theory of expectations that shows under what specific conditions interstate commerce will reduce or heighten the risk of conflict between nations Taking a broad look at cases spanning two centuries from the Napoleonic and Crimean wars to the more recent Cold War crises Dale Copeland demonstrates that when leaders have positive expectations of the future trade environment they want to remain at peace in order to secure the economic benefits that enhance long term power When however these expectations turn negative leaders are likely to fear a loss of access to raw materials and markets giving them more incentive to initiate crises to protect their commercial interests The theory of trade expectations holds important implications for the understanding of Sino American relations since 1985 and for the direction these relations will likely take over the next two decades Economic Interdependence and War offers sweeping new insights into historical and contemporary global politics and the actual nature of democratic versus economic peace

Global Interdependence, Decoupling, and Recoupling Yin-Wong Cheung, Frank Westermann, 2013-11-15 Investigations of the propagation and influence of global shocks among the economies of developed and developing countries One lens through which to view global economic interdependence and the spillover of shocks is that of decoupling and then recoupling Decoupling between developed and developing countries can be seen in the strong economic performance of China and India relative to that of the United States and Europe in the early 2000s Recoupling then took place as developing

countries sank along with the developed world during the deepening financial crisis of 2008 This volume examines patterns of global economic interdependence and the propagation of shocks in an increasingly integrated world economy The contributors discuss such topics as the transmission of exogenous shocks causes of business cycle synchronicity the differences between global and regional shocks the South South trade relationship and its effect on decoupling vertical specialization and Mexico s manufacturing exports growth prospects in China the United States and Europe after the financial crisis and the evolving role of the U S dollar in international monetary architecture Contributors Helge Berger Rossella Calvi Yin Wong Cheung Gianluca Cubadda Justino De La Cruz Filippo di Mauro Michael Dooley Eiji Fujii Linda S Goldberg Barbara Guardabascio Alain Hecq Hideaki Hirata Robert B Koopman M Ayhan Kose Marco J Lombardi Steven Lugauer Nelson C Mark Volker Nitsch Christopher Otrók Tuomas Antero Peltonen Gabor Pula Pierre L Siklos Zhi Wang Shang Jin Wei Frank Westermann *The WTO, Economic Interdependence, and Conflict* Marc Lawrence Busch, Edward D. Crescenzi, 2005-01-01 This book explores one of the most important current topics in international relations whether trade diminishes or enhances conflict Mark J C Crescenzi adopts an original perspective arguing that the exit costs confronting states how hard it would be for them to replace the trade they are threatening to cut determines the credibility of the threat and the effect of such trade on the likelihood of political conflict Globalisation and Interdependence in the International Political Economy R. J. Barry Jones, 2013-11-07 Globalisation and Interdependence in the International Political Economy addresses central developments within the contemporary international system The notions of interdependence and globalisation that have accompanied the political discourse of a new world disorder are replete with definitional ambiguities theoretical difficulties and empirical complexities Barry Jones offers a critical review and analysis of these concepts their significance and place within the wider debates of international political economy He argues that contemporary conditions are complex with regionalising tendencies cross cutting those of increasing globalisation and national impulses surviving even in the face of powerful internationalising forces Future developments it is concluded may also be far more uncertain and turbulent than is widely anticipated Written by a leading authority this volume is an effective and compelling introduction to the complex study of international political economy **Power and the Purse** Jean-Marc F.
