Economics Of Special Privilege And Rent Seeking:

The Economics of Special Privilege and Rent Seeking G. Tullock, 2013-03-14 As the reader of this book probably already knows I have devoted a great deal of time to the topic which is rather unfortunately named rent seeking Rent seeking the use of resources in actually lowering total product although benefiting some minority is unfortunately a major activity of most governments As a result of this I have stumbled on a puzzle The rent seeking activity found in major societies is immense but the industry devoted to producing it is nowhere near as immense In Washington the rent seeking industry is a very conspicuous part of the landscape On the other hand if you consider how much money is being moved by that industry then it is comparatively small The first question that this book seeks to answer is How do we account for the disparity A second problem is that almost all rent seeking is done in what superficially appears to be an extremely inefficient way I recently got estimates of the net cost to the public of the farm program and its net benefit to the farmers The first is many times the second Indeed it is not at all obvious that in the long run today's farmers are better off than they would be if the program had never been implemented Of course in any given year cancelling the program would be quite painful The first section of this book then is devoted to this problem

Economic Hierarchies, Organization and the Structure of Production G. Tullock, 2012-12-06 Economics has been basically a study of the interactions between organizations with some organizations being so small we only have one person in them The internal organization of the largest hierarchies has indeed been looked at but a good reason for working less on these organizations is that the internal reactions are much harder to understand It is sensible to solve the problems we can solve and put the others off until later The author's basic purpose here is to look at these larger hierarchical organizations and develop a scientific account of them In *Economic Hierarchies Organization and the Structure of Production* Gordon Tullock examines the internal functioning and organization of the corporation In the author's personal tradition the book relies on narrative analysis rather than mathematical complexity to convey insights into the functioning of the corporation

The Encyclopedia of Public Choice Charles Rowley, Friedrich Schneider, 2008-01-25 The Encyclopedia

provides a detailed and comprehensive account of the subject known as public choice. However the title would not convey sufficiently the breadth of the Encyclopedia's contents which can be summarized better as the fruitful interchange of economics, political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible. This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume, Adam Ferguson and Adam Smith contributed to all these fields and more. However as intellectual specialization gradually replaced broad based scholarship from the nineteenth century onwards it became increasingly rare to find a scholar making major contributions to more than one. Once Alfred Marshall defined economics in neoclassical terms as a narrow positive discipline the link between economics, political science and moral philosophy was all but severed and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial, benevolent and omniscient governments in their attempts to promote the public interest. This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War.

Radical Islam and International Security Efraim Inbar, Hillel Frisch, 2007-12-12

Radical Islam poses a political challenge in the modern world which is like that of no other radical religious movement. Ideologically it is perceived by Western policy makers as threatening the liberal democratic ideology by which most states in the West abide and which most other states rhetorically espouse. This book serves as a welcome addition to the intellectual and policy debate on the nature of the radical Islam phenomenon and how to respond to it. The collection is divided into three parts: the first part seeks to understand the Islamic challenge in broad comparative and historical terms while the second part deals with specific regional case studies which seek to identify patterns of uniformity and variation in radical Islam across a wide swath of terrain. The third part is policy oriented suggesting possible responses to the Islamic challenge. The contributors include distinguished researchers

from Europe North America and the Middle East This book will be of much interest to students of Islamism political violence international security and Middle Eastern politics

studies especially the relationship with political science The few intuitive ideas include the separation between ex ante situations and ex post outcomes the difference between endowment differences and unequal outcomes and the role of economics as a vehicle in the delivery of numerous social and political activities The discussion extends to cover an analysis on human values and concludes with a recommendation on the functionality of civic capitalism With intuition and analytical reasoning within economics and with other social sciences Conceptual Economics can become a new branch in economic study where scholars analysts and intellectuals could think outside the box by liaising a wider economic perspective and or amalgamating non economic aspects into their analysis This shall provide a new dimension to solving human economic problems and possibly area of intellectuality

Capitalism from Below Victor Nee, Sonja Oppenheimer, 2012-06-19 Over 630 million Chinese escaped poverty since the 1980s, the largest decrease in poverty in history. Studying 700 manufacturing firms in the Yangtze region, the authors argue that the engine of China's economic miracle, private enterprise, did not originate at the top but bubbled up from below, overcoming initial obstacles set up by the government.

On the Trail of Homo Economicus Gordon Brady, Robert D. Tollison, 1994-08-26 This collection of previously unpublished expository writings by Gordon Tullock on themes ranging from game theory, externalities, public choice, rent seeking, law and economics and economic progress is representative of the breadth of Tullock's career. As co-founder of Public Choice, Tullock has been a major contributor to our understanding of the logic of collective choice and the politics of collective action. Tullock's insights have helped establish the unambiguous message that political, social and economic institutions affect individual behavior, whether in economics or political markets. Tullock's hypotheses, proposed laws and paradoxes have shaped the development of public choice as well as charting new areas in law, economics and sociobiology. In sorting through Tullock's personal papers, the editors learned and here present the many dimensions of the man and the breadth of his interests. From the papers we can piece together much of Tullock's personal history. For example, there are myths surrounding Gordon Tullock that can be laid to rest: his birthplace, the lack of a baccalaureate degree, the one course that marks his formal training in economics and his career prior to his academic emergence in the mid 1950s.
