*Turkic Council Countries: Infrastructure, Trade, Logistics and Transportation* Mahir Humbatov, Kazim Sari, 2017-11-17 The Cooperation Council of Turkic Speaking States the Turkic Council TC was established in 2009 as an intergovernmental organization to promote multilateral cooperation among Turkic Speaking States The four founding member states of the TC are Azerbaijan Kazakhstan Kyrgyzstan and Turkey In addition Uzbekistan and Turkmenistan are two possible future members of the council This study aims to investigate the infrastructural investment trade logistics and transportation potential of the mentioned countries as well as elaborate these activities among the TC s current and possible future members For this purpose firstly present situation of the trade among the Council s current and possible future members has been examined At this point it is made clear that the trade volume among these six states is not as much as expected but it is open to healing Later the opportunities and the last developments that may increase the trade volume among the TC s current and possible future

members in line with advancement of their infrastructural potential are explored In reality the geographic location of these states is very good Namely they are on the old trade route known as the Silk Road channels however this road was not active for a long time Recently this ancient trade route between East and West was aimed to be revived by China Besides India is keen to develop another approach of the Silk Road under the International North South Transportation Corridor INSTC initiative In fact these are great opportunities for the TC s current and possible future members That is there is a very large volume of trade between China and Europe and currently almost all of this trade is done through sea transport Hence if even a small part of this trade is transported by the Chinese Initiative of the Silk Road its contribution to the current and potential future members of the TC and their integration into each other will be great However at this point there are some tasks that current and potential members of the TC must complete to mobilize the Silk Roads In fact opening of Baku Tbilisi Kars BTK rail link recently was an important step to make it active but this is not fully enough In this work it is also aimed to set out these tasks from the perspective of each current and potential member Finally with the help of this review the limitations and problems of each state s infrastructural investment trade transport and logistics system have been put forward for improvement studies

Mark J. Scher, Naoyuki Yoshino, 2015-06-11 Postal savings systems in Asian developing countries play a significant role in social and economic development. In many of these countries and others around the world, postal savings and giro remittances are the only means of providing financial services to all segments of the population, particularly women, rural communities, and the urban poor. Postal savings in many countries also hold the largest share of individual and household savings among competing institutions. This book examines the postal financial systems of some twenty countries visited by the author and also includes case studies by expert authors from different developing nations. Among the topics covered are savings product development, investing mobilized funds, receiving overseas remittances, and utilizing financial technology.

The Central Asian Economies Since Independence Richard Pomfret, 2020-12-08 The 9/11 attacks, the U.S. invasion of Afghanistan, and the oil boom of recent years have greatly increased the strategic importance of resource-rich Central Asia, making an understanding of its economic and therefore political prospects more important than ever. In *The Central Asian Economies Since Independence*, Richard Pomfret provides a concise and up-to-date analysis of the huge changes undergone by the economies of Kazakhstan, the Kyrgyz Republic, Tajikistan, Turkmenistan, and Uzbekistan since the collapse of the Soviet Union in 1991. The book assesses the economic prospects of each country and the likelihood that economic conditions will spur major political changes. With independent chapters on each country and chapters analyzing their comparative economic performance, the book highlights similarities and differences. Facing common problems caused by the breakdown of Soviet economic relations and the hyperinflation of the early 1990s, these countries have taken widely divergent paths in the transition from Soviet central planning to more market-based economies. The book ends in 2005 with the bloodless Kyrgyz revolution and the violence in Uzbekistan, which signaled the end of the region's political continuity. Throughout the book, Pomfret emphasizes the economic forces that foster political instability: from Kazakhstan's resource boom and Turkmenistan's lack of reform to Tajikistan's abject poverty. **Report on the Foreign Policy of the Czech Republic**, 2001-01-01
