World Development Indicators 2012 World Bank,2012-04-18 World Development Indicators 2012 is a compilation of

relevant high quality and internationally comparable statistics about development and the quality of people's lives. Organized around six themes: world view, people, the environment, the economy, states and markets, and global links, it aims to put data into the hands of policy makers, development specialists, students, and the public. The full dataset used to produce World Development Indicators contains more than 1 000 indicators for 216 economies with many time series extending back to 1960. And as a major part of the World Bank's open data initiative, the data are freely available for use and reuse under an open license. A companion printed volume, the little data book 2012, presents a selection of indicators for each economy and the biennial statistics for small states. The book also presents data for less populated developing countries. Any assessment of the Millennium Development Goals must acknowledge that amid all the signs of progress, there are gaps. Some targets will not be reached in this decade or the next. Likewise, the statistical record is still incomplete. Continuing progress will require renewed commitment and careful monitoring.

Procreation and Population in Historical Social Science Daniela Danna, 2021-08-03. The book sees procreation as the forgotten basis of population dynamics and its macrohistorical results through the lenses of world system analysis in a nondogmatic way. This interdisciplinary book sheds light on the historical paths leading to the current unprecedented numbers of humans on the globe, fuelled by the capitalist demand for labor and mediated by the role of women in society. *Procreation and Population* is a critical text opposing the current disciplinary fences that demonstrably hinder our comprehension of social phenomena. Attentive to gender relations, the book boldly tracks the big picture of population dynamics and its most reliable theories in times of postmodernist taboos on generalizations and on the search for the historical laws of human society.
