Economy And Environment In The Caribbean:

Economic Policy and the Environment Mark D. Griffiths, Bishnodat Persaud, 1995 *Economy and Environment in the Caribbean* Bonham C. Richardson, 1997 Bearing in mind the recent renewed interest in the economic and environmental problems of small islands everywhere this is a highly appropriate time to bring back to world attention the issues of that time which served in large measure to define the patterns of development in Barbados Grenada St Lucia and St Vincent in the early decades of the twentieth century A book especially to be welcomed David Watts University of Hull England A seminal contribution Lucid erudite and highly readable David Barker University of the West Indies Mona Jamaica In this historical geography of the British colonies of Barbados and the Windwards St Lucia St Vincent and Grenada Bonham C Richardson describes the economies environments and societies of the four geographically dissimilar islands and outlines the severe economic depression they experienced following the 1884 plunge in London sugar prices and the exacerbating effects of two catastrophes a massive hurricane in 1898 and a volcanic eruption in 1902 In response to these problems the British parliament created the 1897 West India Royal Commission to outline a new policy for the islands development Concentrating on the years between 1880 and 1905 Richardson makes use of unpublished archival records local newspapers and records of the Royal Commission to explain the enormous changes in land use patterns in the British Caribbean In a novel approach Richardson emphasizes the effects of the islands physical environments and devotes chapters to climate waters lowlands and highlands He also demonstrates how these environmental zones and resources were contested by different socioeconomic groups leading him to one of his most provocative arguments that depression induced demonstrations and riots in the islands in the late 1890s in large part precipitated the Royal Commission's wise decision to advocate the break up of sugarcane plantations into smaller shareholds Thus Richardson demonstrates the ways in which working people far from being victims of colonialism managed to influence British decision makers such that each island developed a unique adaptation to the economic and geophysical stresses placed on it proving fruitless the British attempts to regionalize the islands under a single policy Throughout Richardson's discussion of insularity and islandness is important to understanding problems in the Caribbean today a century later and will be of interest to geographers and historians of the Caribbean and to anyone with an interest in small island economics Bonham C Richardson is professor of geography at Virginia Polytechnic Institute and State University His most recent book *The Caribbean in the Wider World* 1492-1992 received the Gordon K Lewis Award in 1993 from the Caribbean Studies Association *The Economics of Sustainable Development in Small Caribbean Islands* Dennis Pantin, 1994 [Economic valuation and policy priorities for sustainable management of coral reefs](#) Mahfuzuddin Ahmed, Chiew Kieok Chong, Herman Cesar, Herman S. J. Cesar, 2004 **The Caribbean Blue Economy** Peter Clegg, Robin Mahon, Patrick McConney, Hazel A. Oxenford, 2020-10-22 The Blue Economy is emerging on the global scene as a powerful and persuasive new concept for sustainable development based on economic activities associated with the ocean Several

regions globally have adopted this concept at national and regional levels including the Caribbean Given the complex multisectoral and multilevel nature of the Blue Economy it is clear that different approaches will be needed for different regions Hence this volume explores the opportunities threats and risks involved in operationalising the Blue Economy in the Wider Caribbean Region defined as northern Brazil to the USA and all mainland and island countries and territories in between The first part of the book looks at where the region stands in the global picture regarding adoption of the Blue Economy and what is planned The second set of chapters examines key crosscutting issues such as ecosystem services climate change and governance at national and regional levels that could make or break the Blue Economy initiative The book then goes on to explore the main sectoral activities that will constitute the Blue Economies in the region fisheries tourism shipping and transport renewable energy oil and gas seabed mining and waste management are all considered The book ends with a synthesis of the political and technical requirements to overcome threats and take advantage of opportunities in the Blue Economy *CARICOM Single Market and Economy* Kenneth O. Hall, Myrtle Chuck-A-Sang, 2007

The Caribbean Social Justice Agenda Marlon Anatol, Mark Kirton, Ashaki L. Dore, 2023-04-04 This book is committed to the issues related to social justice in the Caribbean and seeks to increase dialogue among practitioners unions labor activists academics policy makers and other individuals from across the social sciences and humanities It is purposely multidisciplinary in orientation intending to cover issues related to work workers labor and related topics as well as social organizational and institutional aspects of work and industrial relations It aims to set the tone for discourse on a wide range of issues related to the future of work and sustainable Caribbean development social justice industrial relations governance systems social protection social dialogue cooperatives and community empowerment the future of education migration and security among others nationally and regionally This work represents contemporary scholarly contributions from researchers presenting original and innovative research that contribute to the theory practice and public policy dimensions of work migration labor industrial relations and related issues *Agriculture and the Environment* Ernst Lutz, 1998-01-01

Agriculture in developing countries has been remarkably productive during the last few decades however the production levels were achieved at the cost of placing more stress on natural resources and the environment This volume brings together state of the art applied practical research related to agriculture development and the environment in the developing world It attempts to distill current knowledge and to summarize it in readable form for development practitioners Where possible authors use specific examples to indicate which approaches have worked and which have not under which conditions and why [Globalization, Agriculture and Food in the Caribbean](#) Clinton L. Beckford, Kevon Rhiney, 2016-04-21 The last decade has seen a growing body of research about globalization and climate change in the Caribbean This collection is a significant addition to the literature on a topic that is of critical importance to the region It explores research from a number of Caribbean islands dealing with a range of issues related to agriculture and food in the context of globalization and

climate change Using a broad livelihoods perspective the impacts on rural livelihoods are explored as well as issues related to community level resilience adaptability and adaptations The volume is strengthened by gendered analyses of issues and discussions informed by a diverse range of research methods and methodologies Scholars of Caribbean studies and studies pertaining to social cultural economic and environmental issues facing Small Island Developing States SIDS will greatly benefit from this book *Environmental Issues in Latin America and the Caribbean* Romero Aldemaro, Sarah E.

West, 2005-10-13 This book is a collection of readings that explore environmental issues in Latin America and the Caribbean using natural science and social science methods These papers demonstrate the value of interdisciplinary approaches to analyze and solve environmental problems The essays are organized into five parts conservation challenges national policies local communities and rural development market mechanisms for protecting public goods public participation and environmental justice and the effects of development policies on the environment *Tourism Economics, the Environment*

and Development Clement Allan Tisdell, 2001 This work analyzes market and political failures in relation to tourism development and the environment and the implications of those for national gains from international tourism for public finance and policy and for the sustainability of tourism *Socioeconomic and Geopolitical Aspects of Global Climate Change*

Leonidas Osvaldo Girardin, 2024-03-21 This book discusses climate change from an academic point of view centered on and from Latin America Although climate change is a global issue there has been a notable lack of input from the Latin American perspective which means that many Latin American intellectuals often bring ideas tools and potential solutions proposed by external international research centers or organizations to the region This book embraces a Latin American viewpoint to critically engage the problem and many of the concepts used in the analysis of climate change The text emphasizes heterogeneity as an essential factor that cannot be absent in the analysis of how to understand and face the challenges posed by climate change This heterogeneity refers not only to the magnitude of the impact that different regions will experience including in their productive activities ecosystems and social groups but also to their contexts and capacities Different countries and regions historical accumulated emissions the primary cause of the current atmospheric concentrations of greenhouse gases can inform current responsibilities and their diverse productive structures will also contribute to different baselines in energy agriculture and other sectors Asymmetries in economic technological and political capacities to face climate related challenges will influence the social and economic costs of potential adaptation and mitigation measures Using this conceptual approach the book focuses on some of the main climate change linked impacts expected in the region such as effects on semi arid ecosystems and feasible sector specific adaptation measures Furthermore it contextualizes mitigation measures that appear on the international agenda including the utilization of economic instruments to flexibilize the fulfillment of climate commitments in the Latin American region *Socioeconomic and Geopolitical Aspects of Global Climate Change An Intersectorial Vision from the South of the South* offers socioeconomic and geopolitical analysis from the

perspective of a region that is going to suffer impacts disproportionately greater than its historical and current responsibility in triggering this global environmental threat *Building Industries at Sea - 'Blue Growth' and the New Maritime Economy* Kate Johnson,Ian Masters,Gordon Dalton,2022-09-01 Throughout the world there is evidence of mounting interest in marine resources and new maritime industries to create jobs economic growth and to help in the provision of energy and food security Expanding populations insecurity of traditional sources of supply and the effects of climate change add urgency to a perceived need to address and overcome the serious challenges of working in the maritime environment Four promising areas of activity for Blue Growth have been identified at European Union policy level including Aquaculture Renewable Energy offshore wind wave and tide Seabed Mining and Blue Biotechnology Work has started to raise the technological and investment readiness levels TRLs and IRLs of these prospective industries drawing on the experience of established maritime industries such as Offshore Oil and Gas Shipping Fisheries and Tourism An accord has to be struck between policy makers and regulators on the one hand anxious to direct research and business incentives in effective and efficient directions and developers investors and businesses on the other anxious to reduce the risks of such potentially profitable but innovative investments The EU H2020 MARIBE Marine Investment for the Blue Economy funded project was designed to identify the key technical and non technical challenges facing maritime industries and to place them into the social and economic context of the coastal and ocean economy MARIBE went on to examine with companies real projects for the combination of marine industry sectors into multi use platforms MUPs The purpose of this book is to publish the detailed analysis of each prospective and established maritime business sector Sector experts working to a common template explain what these industries are how they work their prospects to create wealth and employment and where they currently stand in terms of innovation trends and their lifecycle The book goes on to describe progress with the changing regulatory and planning regimes in the European Sea Basins including the Caribbean where there are significant European interests The book includes Experienced chapter authors from a truly multidisciplinary team of sector specialisms First extensive study to compare and contrast traditional Blue Economy with Blue Growth Complementary to EU and National policies for multi use of maritime space **Climate Change 2014 - Impacts, Adaptation and Vulnerability: Regional Aspects** Christopher B. Economic Development of Caricom Winston H. Griffith, 2021-10-12 It has been suggested that if CARICOM nations wish to accelerate their development they should embrace laissez faire economic policies However laissez faire economic policies have reinforced the very economic and social structures that have contributed to their low level of development furthermore laissez faire economic policies ignore social attitudes that can

greatly influence a nation's development. Moreover, low skilled labor intensive production processes which once propelled growth in CARICOM nations will no longer perform a similar role because production processes are becoming more and more knowledge skills intensive and nations wishing to attract foreign manufacturing investment or high tech services may not be able to do so without an adequate pool of the necessary knowledge skills. CARICOM nations must therefore try to accumulate a pool of knowledge skills that can help their economies become internationally competitive. *The Global Economic Crisis and the Developing World* Ashwini Deshpande, Keith Nurse, 2012. The world economy is currently in the throes of a global economic crisis reminiscent of the great depressions of the 1930s and the 1870s. As back then the crisis has exposed the major structural imbalances in financial and credit markets in addition to global trade forcing many governments developed and developing to impose debilitating austerity measures that are exacerbating the structural weaknesses that caused the crisis in the first place. This volume offers historical insights into the origins of the contemporary crisis as well as detailed analyses of the financial and trade dimensions, an assessment of the technological and innovation context along with perspectives on the implications for unemployment and gender imbalances. Global Change and Caribbean Vulnerability Duncan F. M. McGregor, David Dodman, David Barker, 2009. The Caribbean region is facing many challenges in the early years of the twenty first century including global warming, population growth, globalization and trade liberalization. This volume makes a significant contribution to the literature with a range of authors from geography and other disciplines showing how current research is addressing rapid change in the region. This is the fourth volume in a series published by the University of the West Indies Press that has focused on the search for development strategies that address the social and economic needs of the people without further deterioration of the region's fragile environmental resource base. This volume focuses upon the vulnerabilities of peoples and their environments and emphasizes the importance of a multidisciplinary approach in this applied research field. Among the issues examined are climate change, sustainable food production systems, urban planning and community development and coastal management. The editors conclude the volume by developing the critical research agenda on these and other issues. Book jacket.
