

El efecto invernadero

Parte de la radiación solar es reflejada por la Tierra y la atmósfera.

Parte de la radiación infrarroja atraviesa la atmósfera. Una parte es absorbida y reemitida en todas las direcciones por las moléculas de los gases de efecto invernadero. El efecto de esto es calentar la superficie de la Tierra y la atmósfera inferior.

La mayor parte de la radiación es absorbida por la superficie de la Tierra y la calienta.

El calentamiento global es uno de los mayores desafíos que enfrenta la humanidad con profundas consecuencias ambientales y sociales La explicación científica dominante culpa a la quema de combustibles fósiles que incrementa el efecto invernadero atrapando el calor infrarrojo en la atmósfera Sin embargo esta teoría del efecto invernadero presenta inconsistencias con las leyes fundamentales de la física y la termodinámica Por ejemplo ignora el papel de la conducción y convección en la transferencia de calor asume erróneamente que la radiación infrarroja equivale al calor y no explica adecuadamente el origen de la energía térmica atmosférica Este libro realiza un riguroso análisis crítico de la teoría del efecto invernadero explorando sus fundamentos termodinámicos el comportamiento cinético de los gases y sus modos de transferencia de calor Identifica fallas conceptuales como la confusión entre temperatura y calor el énfasis excesivo en la radiación y la ignorancia de los principios de conducción y convección térmica En este libro presenta evidencia matemática y conceptual de que el CO₂ no juega un papel muy importante en la temperatura atmosférica Sobre esta base el libro plantea la necesidad de elaborar un nuevo paradigma más integral para entender la compleja física de la atmósfera terrestre Una teoría renovada requerir incorporar los aportes de la termodinámica clásica la mecánica de fluidos y la teoría cinética de gases Solo así podremos construir explicaciones más coherentes del calentamiento global que trasciendan las limitaciones de la visión actual del efecto invernadero , *¡La catástrofe ecológica global ha comenzado!* Stefan Engel,Gabi Fechtner,Monika Gärtner-Engel,2024-02-08
