Mohrman, 1989-08-07 The impact of environment The

impact of people Strategies for large scale organizational change **Effecting Organizational Change at the Macro Level of Professions** Robert Anthony Green,2017 Much has been written in academic and popular publications about organizational change Topics have ranged from case studies to anecdotal stories of how leaders can change an organization There is little written on changing the culture and vision of a profession at the macro level This dissertation shows that one key to effecting change within a profession is to educate those at the entrant level and thereby effect change with the profession Over time these new entrants to the profession will rise to senior positions and be able to effect greater change through the hiring training and mentoring processes inherent in the professions and the organizations for which they work One way to effect change in these entrants is through education in college and professional schools This study is specifically focused on effecting change in the interdisciplinary field of engineering and public policy Public policy involves countless infrastructure issues at all levels of government Engineers are well versed in dealing with the technical issues of infrastructure but their voice is often lacking at the policy level Similarly political scientists are well versed in policy but are often lacking in a thorough understanding of the technical aspects of the policy Through an introductory course in engineering and public policy undergraduate students from the seemingly disparate fields of engineering and political science were placed in a common classroom and through lectures writings presentations and guided discussions their attitudes on key areas were changed Areas studied were professional interest legitimacy deference the public policy process and education outside of a specific field Through the process of education changes in each of these areas was possible Further the movement was towards making students in each discipline more open to the input opinions and attitudes of others and specifically in shifting engineers toward a more positive view of the public policy process Being exposed to these topics and to each other s thought processes changes in professional attitudes were made While there is not a specific profession for which any research has been done the military is used in places as an analog to the profession of engineering

Mackenzie,2011-06-28 Previously the conventional wisdom about organizations was If it s not broken then don t fix it Today the new dictum seems to be If it works make it work better There is a shift from a posture of reaction to one that embraces change The prevailing wisdom is changing because many of our organizations are now or will soon be in a state of crisis Every day we read about a proud old firm going bankrupt manufacturers who must cut costs and retrench in order to survive and failures in our governmental agencies Who s next Many organizations are failing but others are doing well All wonder if something terrible could happen to their organization Thus it seems prudent to anticipate and proactively manage change rather than to passively sit by until some crisis strikes All of us know that any organization can be improved There will always be a gap between some desired state and our current reality There will always be differences among people about what is desirable and what is not Every change energizes these gaps Because there are so many changes taking place it is no wonder that there is continuous clamor for organizational change These gaps and differences are the source of problems Once a problem is recognized and agreed to efforts are made to generate a solution to it Every solution has both its intended and unintended consequences Organizational Change for Corporate Sustainability Suzanne Benn,Melissa Edwards,Tim Williams,2018-07-11 Since this classic book was first published in 2003 sustainability has increasingly been accepted as standard business practice for leading corporations while the science itself has revealed how human activity has become the dominant force influencing irreversible changes in the planetary systems The fourth edition of this trailblazing book on corporate sustainability provides new insights into how organizations can transition towards a more responsible way of conducting their business It charts new thinking on value creation business models and organizational purpose as the basis of a broader based transition to a sustainable society The sustainability phase model has been substantially revised to incorporate emergent approaches in sustainable supply chain management strategic sustainability sustainability oriented
