Effective English Teaching Concept Research And Practice:

Effective English Teaching William H. Peters, 1987 Noting that teaching requires more than just knowledge of one's subject this book analyzes the host of variables that affect the quality of English instruction and offers an organic field model of classroom English instruction Following an introduction by Bruce Appleby Chair of the Conference on English Education the first chapter of the book presents the model which shows how the content the substance skills and processes of English interacts with the context of teaching factors such as class size parental and community attitudes socioeconomic status the teacher's personality and background and the philosophy of school administrators The remaining four chapters illustrate the subtle ways that context governs the teacher's classroom options as follows 1 Research on Teaching Presage Variables William H Peters 2 The Context Variable of the Organic Field Model Faye Louise Grindstaff 3 Research on Teaching Products and Processes Miles C Olson and 4 Teacher Effectiveness Research Inferences for In Service and Staff Development Richard L Hanzelka HTH *Methods of Research on Teaching the English Language Arts* James Flood, Diane Lapp, James R. Squire, Julie Jensen, 2005-01-15 This text makes available in a concise format the chapters comprising the research methodology section of the Handbook of Research on Teaching the English Language Arts Second Edition An introduction designed to give K-12 teachers an understanding of the basic categories and functions of research in teaching is followed by chapters addressing teacher professionalism and the rise of multiple literacies empirical research longitudinal studies case studies ethnography teacher research teacher inquiry into literacy social justice and power synthesis research fictive representation and contemporary methodological issues and future direction in research on the teaching of English *Methods of Research on Teaching the English Language Arts* is well suited for use in upper level undergraduate and graduate level literacy research methods courses *Teaching Secondary English* Daniel Sheridan, 2013-03-07 This new edition of *Teaching Secondary English* is thoroughly revised but its purpose has not changed Like the popular first edition it balances content knowledge with methodology theory with practice and problem posing with suggested solutions The tone and format are inviting while addressing student readers on a professional level Rather than attempting to cover everything the text provides a framework and materials for teaching a secondary English methods course while allowing considerable choice for the instructor The focus is on teaching literature writing and language the basics of the profession Attention is given to the issues that arise as one seeks to explore what it means to teach English The problems and tensions of becoming a teacher are discussed frankly in a manner that helps students figure out their own attitudes and solutions Features Focuses on a few central concepts in the teaching of secondary English Provides an anthology of 22 readable and challenging essays on key topics allowing students to hear a variety of voices and opinions Includes an applications section for each reading that extends the discussion and asks students to explore problems and grapple with important issues related to the articles Offers short writing assignments in questions that follow the readings and in brief writing tasks in the applications and a longer

writing assignment at the end of each chapter Addresses student readers directly without talking down to them New in the Second Edition This edition is shorter tighter and easier to use The opening and concluding chapters more directly address the concerns of new teachers The anthology is substantially updated of the 22 articles included 14 are new to this edition Each essay is preceded by a brief introduction and followed by questions for further thought There are fewer applications but these are more extensive and more fully integrated within the text A writing assignment is provided at the end of each chapter Interviews with college students before and after student teaching are included in Chapters 1 and 6 The bibliographies at the end of each chapter are fully updated

Resources in Education ,2000-10 **Handbook of Research on Teaching the English Language Arts** James Flood,1991 Jointly sponsored by the International Reading Assn and the Natl Council of Teachers of English the Handbook contains some 70 original articles by authorities in the field of language arts The articles are organized into five sections theoretical bases for English language arts teaching method **Teaching Literacy Effectively in the Primary School** Richard Fox,Jane Medwell,Louise Poulson,David Wray,2003-09-02 This book discusses the implications arising from the authors research into what constitutes an effective teacher of literacy They have been able to identify what effective teachers know understand and do which enable them to put effective teaching of literacy into practice in the primary phase By identifying the strategies used by these teachers the authors show how these can be applied by other primary teachers to improve their teaching of literacy *The English Record* ,1986 *American Book Publishing Record* ,2007 English Teaching Forum ,2000 Pacific Rim Objective Measurement Symposium (PROMS) 2012 Conference Proceeding Quan Zhang,Hong Yang,2013-06-13 Entrusted by the Board of Management of the Pacific Rim Objective Measurement Symposium PROMS PROMS2012 is held in Jiaxing China from August 6 9 2012 Over the past years PROMS has been hosted in many parts of the Pacific Rim in Singapore Malaysia Hong Kong Taiwan and Tokyo which has greatly promoted the research of and contributed to the development of Rasch Model in one way or another As early as in 1980s the ideas and concepts regarding IRT was first introduced into China by Prof Gui Shichun my Ph D supervisor and it is Prof Gui who first conducted with great success the ten year long 1990 1999 Equating Project for Matriculation English Test MET in China MET is the most influential entrance examination for higher education administered annually to over 3 3 million candidates then The Equating Project won recognition by Charles Alderson and other foreign counterparts during 1990s Academically those were Good Old Days for Chinese testing experts and psychometricians Then for certain reasons the equating practice abruptly discontinued Therefore in China nowadays the application of IRT based software like BILOG Parscale Iteman 4 and others to real testing problem solving is confined to an extremely small band of people In this sense PROMS2012 meets an important need in that it provides an excellent introduction of IRT and its application And anyone who is seriously interested in research and development in the field of psychometrics or language testing will find such a symposium and related workshops to be an excellent source of information about the application of Rasch Model

PROMS2012 focuses on recent advances in objective measurement and provides an international forum on both the latest research in using Rasch measurement and non Rasch practice

Threshold Concepts on the Edge Julie A. Timmermans,Ray Land,2019-12-30 Since the first literature about the Threshold Concepts Framework was published in 2003 a considerable body of educational research into this topic has grown internationally across a wide range of disciplines and professional fields Successful negotiation of a threshold concept can be seen as crossing boundaries into new conceptual space or as a portal opening up new and previously inaccessible ways of thinking about something In this unfamiliar conceptual terrain fresh insights and perceptions come into view and access is gained to new discourses This frequently entails encounters with troublesome knowledge knowledge which provokes a liminal phase of transition in which new understandings must be integrated and importantly prior conceptions relinquished There is often double trouble in that letting go of a prevailing familiar view frequently involves a discomfiting change in the subjectivity of the learner We become what we know It is a space in which the learner might become stuck Threshold Concepts on the Edge the fifth volume in a series on this subject discusses the new directions of this research Its six sections address issues that arise in relation to theoretical development liminal space ontological transformations curriculum interdisciplinarity and aspects of writing across learning thresholds
