**Ego Ontogenesis and Human Behavior** Kenneth Jerold Comfort, 2007      Law in the Time of Oxymora Rostam J. Neuwirth, 2018-05-16 What do different concepts like true lie bad luck honest thief old news spacetime glocalization symplexity sustainable development constant change soft law substantive due process pure law bureaucratic efficiency and global justice have in common What connections do they share with innumerable paradoxes like the ones of happiness time globalization sex and of free will and fate Law in the Time of Oxymora provides answers to these conundrums by critically comparing the apparent rise in recent years of the use of rhetorical figures called essentially oxymoronic concepts i e oxymoron enantiosis and paradoxes in the areas of art science and law Albeit to varying degrees these concepts share the quality of giving expression to apparent contradictions Through this quality they also challenge the scientific paradigm rooted in the dualistic thinking and binary logic that is traditionally used in the West as opposed to the East where a paradoxical mode of thinking and fuzzy logic is said to have been cultivated Following a review of oxymora and paradoxes in art and various scientific writings hundreds of hard cases featuring oxymora and a comprehensive review of the legal literature are discussed revealing evidence suggesting that the present scientific paradigm of dualism alone will no longer be able to tackle the challenges arising from increasing diversity and complexity coupled with an apparent acceleration of change Law in the Time of Oxymora reaches the surprising conclusion that essentially oxymoronic concepts may inaugurate a new era of cognition involving the ways the senses interact and how we reason think and make decisions in law and in life

*Psychosocial Theories of Human Behavior and Development* Timothy Page, 2024-08-20 Psychosocial Theories of Human Behavior and Development An Evolution of Big Ideas is about the major psychosocial theories of human development that were created in the 20th century drawing from the diverse disciplines of developmental psychology psychiatry cognitive science social psychology sociology ethology and neuroscience A central focus concerns the components of psychological and social development that motivate and influence human behavior over the lifespan The evolution of the major ideas over time their integration and the ways in which their emergence was shaped by their mutual influences is emphasized throughout Several integrative themes are used to provide linkages and contexts for the emergence of the theories particularly the social influences on scientific discoveries the integrative theoretical framework from the National Research Council referred to as the transactional ecological model and an emphasis on the historical evolution of the sources of knowledge on which the theories were based A major goal of the book is to teach in addition to the major concepts of growth and development the historical scientific and social processes by which these organizations of concepts came into being This integrative discussion creates important opportunities for more critical analysis and synthesis of ideas      **Power, Politics and the Ego** Kenneth Jerold Comfort, 1998      **The Evolved Structure of Human Social Behaviour and Personality** Ralf-Peter Behrendt, 2018-04-17 This book concerned with psychoanalytic conceptualisations helps to lay the foundation for a

biologically and evolutionarily sensible model of human social behaviour and personality and also helps to bridge the gap between psychoanalysis and neuroscience

Beneath the Mask Robert N. Sollod,Christopher F. Monte,2008-01-22 Beneath the Mask presents classic theories of human nature much as each theorist might if the theorist were to teach his or her ideas to people encountering them for the first time Through a theorist by theorist approach this Eighth Edition continues to explore the ideas of personality theorists developmentally incorporating the personal origins of ideas to illuminate links between the psychology of each theorist and that theorist s own psychology of persons Beneath the Mask presents the sequence of thinking for more than 20 theorists and demonstrates how the thinking that led to major theories is nested in the life experience of the theorists within the context of the surrounding culture The authors emphasize each theorist s life history as the basis for the ideas that constitute his or her theories making them easier to understand as pictures of human nature John P Wilson has revised the text in a manner that preserves and improves upon the best features of the late Robert N Sollod and Christopher Monte s work

Caliban's Reason Paget Henry,2002-05-03 Paget introduces the general reader to Afro Caribbean philosophy in this ground breaking work Since Afro Caribbean thought is inherently hybrid in nature he traces the roots of this discourse in traditional African thought and in the Christian and Enlightenment traditions of Western Europe

Anthropological Theory Robert Alan Manners,David Kaplan, Anthropological theory has been much discussed in recent years yet the crucial questions still remain how can it be defined how is it developed how is it to be applied and how can one confirm it The editors of Anthropological Theory answer these questions by presenting essays relating to various aspects of anthropological theory Their selections from widely scattered and often difficult to obtain sources present a comprehensive set of writings that describe the current position and issues involved in theory The development of field work in anthropology generated a tremendous emphasis on empirical data and research The plethora of information awaiting collection and the enthusiasm with which the field embraced it so immersed anthropologists that they were unable to relate this new information to the field as a whole Manners and Kaplan believe that this lack of generalization had a profoundly negative effect upon the discipline Therefore they look closely into the relationship between field work and theory in an opening essay and go on to present material that demonstrates the value and the necessity of theory in anthropology Essays by anthropologists and other social scientists deal with explanation evolution ecology ideology structuralism and a number of other issues reflecting throughout the editors conviction that

anthropology is a science the goal of which is to produce generalizations about sociocultural phenomena The book provides necessary perspective for examining and evaluating the crucial intellectual concerns of modern anthropology and will therefore be important for the work of every anthropologist Robert A Manners 1913 1996 received his Ph D from Columbia University and carried on field work in the Caribbean among American Indians in the Southwest and in East Africa He wrote numerous articles and reviews for anthropological journals as well as many books He was professor of anthropology Brandeis University where he started up the department David Kaplan is professor emeritus of anthropology at Brandeis University He has contributed articles and reviews to various journals He has also done field work in Mexico and his areas of specialty include economic anthropology method and theory and peasant culture of Mesoamerica
