Egyptology Intro History:

History of Ancient Egypt Erik Hornung, 1999 This volume presents an introduction to Egyptian history reflected by the author's treatment of religious developments and their relationship to current Egyptian society, ethics and politics. He begins his account by taking a brief look at the prehistoric era in Egypt. He then focuses on political events during the period beginning with the reign of Menes and closing with the conquest by Alexander the Great. Building on insights drawn from the civilization's surviving texts and monuments, he also describes significant cultural developments such as changes in burial customs and the building of the Great Pyramids and Sun Temples. **Egyptology** James Putnam, 1996 An illustrated overview of ancient Egyptian life.

An Introduction to the History of Modern Arabic Literature in Egypt J. Brugman, 2023-10-16 Arabic literature is noted for its tradition-conscious consistency and sophistication. In the classical period, poetry and prose reached a high level of refinement and attained standards which are still being applied in the modern Arab world today. The literature of the modern post-classical period is no less sophisticated, being a vibrant and flourishing expression of the continued Arabic tradition. The series *Studies in Arabic Literature Supplements to the Journal of Arabic Literature*, founded in 1971, is concerned with all kinds of literary expression in Arabic, including the oral and vernacular traditions of both the modern and the classical periods. Studies in the series can be literary, historical, analytical or comparative in nature and can treat of individual works, authors and genres as well as literary traditions in a wider context. Studies dealing with the social, political and philosophical backgrounds of Arabic literature are particularly welcome in the series. The series comprises monographs, thematic collections of articles, handbooks, textual editions and annotated translations. Text editions are as a rule accompanied by a translation on facing pages; both text editions and translations should include comprehensive critical introductions which give a full and proper appreciation of the text or texts in question.

A History of World Egyptology Andrew Bednarski, Aidan Dodson, Salima Ikram, 2021-05-27 A History of World Egyptology is a ground-breaking reference work that traces the study of ancient Egypt over the past 150 years. Global in purview, it enlarges our understanding of how and why people have looked and continue to look into humankind's distant past through the lens of the enduring allure of ancient Egypt. Written by an international team of scholars, the volume investigates how territories around the world have engaged with and have been inspired by ancient Egypt and its study and how that engagement has evolved over time. Chapters present a specific territory from different perspectives, including institutional and national, while examining a range of transnational links as well. Shotwell, 1922. An introduction to the history of documenting history and historians. Beginning with early myths and then looking at Jewish, Greek, Roman, and Christian historians. **Introduction to the History of Communication** Terence P.

Moran, 2010. An Introduction to the History of Communication: Evolutions and Revolutions provides a comprehensive overview of how human communication has changed and is changing. Focusing on the evolutions and revolutions of six key changes in the history of communication: becoming human, creating, writing, developing print, capturing the image, harnessing electricity, and exploring cybernetics, the author reveals how communication was generated, stored, and shared. This ecological approach provides a comprehensive understanding of the key variables that underlie each of these great evolutions/revolutions in human communication. Designed as an introduction for history of communication classes, the text examines the past, attempting to identify the key dynamics of change in these human, technical, semiotic, social, political, economic, and cultural structures in order to better understand the present and prepare for possible future developments. **BOOK JACKET**

The ancient Egyptians are an enduring source of fascination: mummies and pyramids, curses and rituals have captured the imagination of generations. We all have a mental picture of ancient Egypt, but is it the right one? How much do we really know about this great civilization? In this absorbing introduction, Ian Shaw describes how our current ideas about Egypt are based not only on the thrilling discoveries made by early Egyptologists but also on fascinating new kinds of evidence produced by modern scientific and linguistic analyses. He also explores the changing influences on our responses to these finds through such media as literature, cinema, and contemporary art. Each chapter deals with a different aspect of ancient Egypt, from despotic pharaohs to dismembered bodies and from hieroglyphs to animal-headed gods. **ABOUT THE SERIES** The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area.
