El Tao E La Física Tao And The Physique:

El Tao de la Física Fritjof Capra, 2017-02-02 El universo es una eterna danza de partículas subatómicas cuyas relaciones entre sí son al mismo tiempo asombrosamente lógicas y totalmente inexplicables. Los místicos de todas las épocas han intentado captar este universo mediante la interiorización y la meditación. Los físicos nucleares lo exploran a través de la experimentación y la hipótesis. Sus caminos no pueden ser más dispares, sin embargo vemos cómo cada uno a su manera descubre las mismas verdades. Con un lenguaje asequible a todo el mundo y sin complejas fórmulas matemáticas, el doctor Fritjof Capra explora en esta obra ya clásica los principales conceptos y teorías de la física moderna y los compara con las milenarias doctrinas budistas y taoístas. El resultado es un cuadro fascinante. Tanto la ciencia occidental como el misticismo oriental nos revelan una misma y única verdad: el Universo es un Todo íntimamente interconectado, un flujo incesante de energía del que todos formamos parte. Aunque ciencia y misticismo tengan dos maneras distintas de expresar ese conocimiento. *El Mágico de hoy (Tomo I)* Michel Labrèche, 2017-10-25 La vida es una experiencia en la que debemos salir victoriosos sobre aquellas cosas que nos impide manifestar nuestra propia realidad. El autor quiere compartir esta primera versión digital teniendo en cuenta que la colección original en francés para los libros impresos forman parte de un cofre de ocho volúmenes y han sido divididos en 22 tomos para las versiones digitales eBooks. El autor define los seres humanos en el transcurso de la serie completa: nuestro psique y la conexión que existe entre nuestro cuerpo, alma y mente. ¿Responde a las preguntas fundamentales que nos preocupan en lo más profundo de nuestra existencia? ¿Quiénes somos? ¿De dónde venimos? ¿Adónde vamos? Resumen de ciertos temas que encontrarán en la serie de volúmenes: cómo ser objetivo sobre nuestra experiencia subjetiva; difusa y nos explica el origen de la creación del universo, la aparición del hombre y la degradación progresiva que llevará nuestro planeta al final de este mundo. ¿Ir más allá de los límites de la psicología que frenan nuestro intento de comprender tu conciencia verdadera nos muestra cómo la imperfección de nuestro ego es el origen que provoca la esclavitud humana y nos aflige diferentes tipos de emociones, muchas veces devastadora, contra uno mismo y los demás. ¿Explica el fenómeno de la degeneración de nuestro cuerpo físico que nos lleva a la muerte? Nos enseña cómo ralentizar el proceso de la degeneración del cuerpo con la finalidad de revelar cómo superar esa etapa de vida. Sus investigaciones sistemáticas nos permitiera comprender nuestra presencia en el universo, desmitifica el proceso de reencarnación, desenmascarando la realidad de los fenómenos paranormales, nos enseña a liberar y despertar el mágico que se encuentra dormido al interior en cada uno de nosotros. La visión del autor constituye una visión general de la aventura humana, de nuestro destino si alcanzamos el poder de la manifestación y de la voluntad de triunfar por encima de la carga que nos fue impuesta. Los límites que poseemos son aquellos los que no podemos refutar. El autor explora los escenarios del fin de este mundo en relación con la ley de los ciclos que llevan al nacimiento de una nueva civilización donde la ciencia nos sorprende y nos ayuda a explorar nuestra vida. ¿Comparte sus lecciones y experiencias personales de vida contigo, así como también su comprensión de lo que de ello aprendi

nos ofrece las herramientas necesarias para finalmente permitirnos de liberarnos de aquellas fuerzas decadentes con la finalidad de escapar de nuestra prisión sicológica terrestre. Les deseo queridos lectores que las primeras páginas de este cofre les abran las puertas del infinito y libere la magia escondida que se encuentra en cada uno de nosotros. Michel Labrèche. Una búsqueda apasionante por la naturaleza de la mente y la conciencia. Buena magia. Guy Corneau.

La nostalgia de los orígenes Joan Prat, 2018-12-13. El gran mito del origen de Occidente es el libro del Génesis que narra la creación del mundo y de la humanidad con énfasis en tres momentos críticos: la armonía y plenitud de la existencia paradisíaca original, la desobediencia y caída y finalmente la posibilidad de recuperar el paraíso perdido. La nostalgia de los orígenes muestra que existen cuatro grandes vías para retornar a dicho origen: la senda chamánica que persigue fusionar los diferentes mundos y planos en la persona del chamán; la vía gnóstica que es la senda del conocimiento esotérico que conduce a la completitud de los inicios; la vía monástica que es la que busca la salvación a través de la ascesis y la renuncia; y la vía mística que es la que se centra en la unión con lo Absoluto o lo Divino. A pesar de las aparentes diferencias entre el chamán, el gnóstico, el monje y el místico, Prat nos muestra cómo estas figuras persiguen el mismo objetivo: revivir aquella edad de oro y plenitud inicial. La metodología utilizada combina hábilmente los aspectos teóricos con el trabajo de campo antropológico presentado a través de microetnografías y experiencias participantes. El presente texto es la culminación de los intereses teóricos etnográficos que han animado las investigaciones de toda la vida del autor.

Cerebro, mente y conciencia Alejandro Melo Florián, Alejandro Melo Florián, 2010-12-30. Es curioso el tiempo que ha debido pasar desde el haber tenido aquella idea sobre comenzar mi propio proceso de búsqueda interior desde diferentes enfoques procurando no ser ajeno al espíritu de los tiempos finiseculares que preconizaban como se advenía un nuevo hombre, un nuevo tipo de hombre con mayor conciencia de sí con mayor conciencia de su entorno que sería como una especie de semilla de redención en la mejoría de un mundo de vivencias experimentales de conglomerados sociales diversos. Desde mi particular provincia del conocimiento que comencé con el aprendizaje de las ciencias místicas de mi tiempo en mis tiempos de juventud con los paralelos procesos de la búsqueda del propio yo como la fuente de la unicidad que me permitiría ser más auténtico y ayudar mejor a otros del tratar de afirmar el rol preestablecido para mí por el orden social que aceptaba sin mayores reticencias pensando que el sistema valía la pena del tratar de mejorar en mi parte académica de preocuparme por lo que iba a hacer en los próximos años de pronto un día comencé mi curiosidad por la conducta humana y asociada a esta su gestor anatómico: el cerebro. De donde surgió este interés en la conducta humana no lo puedo precisar en una coordenada precisa de mis intenciones de aquella época aunque sí sé a qué quería conocer: el por qué de mis actitudes, de mis intereses, el conocerse a sí mismo un poco más y hasta cierto punto conocer sobre la impredecible conducta de otros seres humanos. Quiz de una forma semejante a lo dicho por Confucio aunque uno no sea de los nacidos para conocer la verdad hay que ser un infatigable lector incansable en la búsqueda de ciencia y erudición. Un buen día merodeando por las librerías en busca de material que ampliara mis fronteras de repente descubrí y hasta cierto

punto me parecí paradójico que una de las personas que más información coherente y pertinente clara y fácilmente comprensible podía transmitir era una experta en sociología y comunicación que sabía divulgar sobre los descubrimientos de los científicos a la vanguardia en el campo de las ciencias de la conducta humana y de las neurociencias de la física cuántica de la física cuántica **El tao de la física** Fritjof Capra, 2017-02 El universo es una eterna danza de partículas subatómicas cuyas relaciones entre sí son al mismo tiempo asombrosamente lógicas y totalmente inexplicables Los místicos de todas las épocas han intentado captar este universo mediante la interiorización y la meditación Los físicos nucleares lo exploran a través de la experimentación y la hipótesis Sus caminos no pueden ser más dispares sin embargo vemos cómo cada uno a su manera descubre las mismas verdades Con un lenguaje asequible a todo el mundo y sin complejas fórmulas matemáticas el doctor Fritjof Capra explora en esta obra ya clásica los principales conceptos y teorías de la física moderna y los compara con las milenarias doctrinas budistas y taoístas El resultado es un cuadro fascinante Tanto la ciencia occidental como el misticismo oriental nos revelan una misma y única verdad el Universo es un Todo íntimamente interconectado un flujo incesante de energía del que todos formamos parte aunque ciencia y misticismo tengan dos maneras distintas de expresar ese conocimiento

ajeno o desconocido. El universo proporciona un compendio para hacerse una idea global pero bien cimentada de los conceptos clave de la ciencia moderna y orientarse a través de ellos. Escrita en un lenguaje llano y accesible y libre de términos científicos, ecuaciones o gráficos, esta obra de Elsie Bruch Donald cuyo contenido viene avalado por doce prestigiosos científicos es producto de la curiosidad de su autora y materializa el libro que a ella le habría gustado encontrar. Tiempo y espacio, materia, energía, física de partículas, la vida, la especie humana y su desarrollo son solo algunos de los puntos que toca este librito que iluminado por la ilusión del asombro da cuenta en definitiva del mundo del que inevitablemente formamos parte de, que es de cómo funciona y de nuestro lugar en él.

De la ciencia a la conciencia CECILIA MONTERO, 2016-07-01. Una lectura mágica, encantada y sumamente culta donde nos vemos obligados a reflexionar sobre los alcances de la ciencia de hoy, los límites de una mirada mecanicista del mundo y las posibilidades de la mente humana. Este libro es el relato de una búsqueda personal que llevó a Cecilia Montero a dejar la ciencia en la que durante décadas se desempeñó con gran éxito para buscar un sentido más profundo de la vida mediante un desarrollo espiritual. Y lo hizo tras llegar a la conclusión de que las ciencias están ancladas en un paradigma reduccionista y materialista que ya no es capaz de reflejar la realidad ni solucionar los problemas de hoy. Entre el ensayo y el testimonio, la autora nos lleva de la mano por amplias lecturas científicas y filosóficas y por aventuras personales: son viajes exóticos que nos conducen a ritos desde sus experiencias con plantas sagradas en el Amazonas peruano hasta sesiones de psicología transpersonal en el Yucca Valley de Estados Unidos, desde encuentros de meditación con el maestro zen Thich Nhat Hanh en el sur de Francia hasta un retiro en el silencio con un maestro shivasta desde semanas de permanencia en una comunidad eco-sustentable en Escocia hasta un encuentro en una comunidad en el norte de Chipre con el magnífico sabio sufí Mawlana Sheikh Nassim Al Haqqani.

Danzar con el yin y el yang John Chitty. En esta obra John Chitty integra conceptos de la antigua sabiduría taoísta con nuevos descubrimientos de la neurociencia y técnicas terapéuticas de probada eficacia en un todo dinámico y cohesionado. Entre sus principales aportaciones está el mapa de la jerarquía de relaciones o jerarquía de los campos de acción que produce una honda resonancia porque refleja directamente nuestra experiencia interna, lo que nos mueve y cómo nos mueve. También incluye una explicación simple y coherente de la novedosa Teoría Polivagal de Stephen Porges en la que se expone que el desarrollo de la vida social entre los primates superiores y los seres humanos tiene su reflejo en el desarrollo de un sistema nervioso social. Ante las situaciones estresantes, el sistema nervioso social nos capacita para superar la respuesta de lucha o huida instintiva y estrictamente animal recurriendo al vínculo con nuestros allegados.
