Elections at Home and Abroad M. Kent Jennings, Thomas E. Mann, 1994 A comprehensive examination of current issues in voting studies

Remaking the Democratic Party Hanes Walton, Pearl K. Ford Dowe, Josephine Allen, Brandon Walton, 2016-08-09 A continuation of Hanes Walton Jr's work on Southern Democratic presidents Remaking the Democratic Party analyzes the congressional and presidential elections of Lyndon Baines Johnson This study builds upon the general theory of the native son phenomenon to demonstrate that a Southern native son can win the presidency without the localism evident in the elections of Bill Clinton and Jimmy Carter Although ridiculed by contemporaries for his apparent lack of control over formal party politics and the national committee Johnson excelled at leading the Democratic Party's policy agenda While a senator and as president Johnson advocated for and secured liberal social welfare and civil rights legislation forcing the party to break with its Southern tradition of elitism conservatism and white supremacy In a way Johnson set the terms for the continuing partisan battle because by countering the Democrats new ideology the Republican Party also underwent a transformation

Regional Dynamics William Field, 2013-01-11 There is a perceived North South divide in British politics In this study William Field points out that this divide marks the resurgence of a core periphery cleavage which was also dominant in British politics in the years before 1914 Other similarities are pointed out

Reelection Hanes Walton (Jr.), Hanes Walton, 2000 This is the first systematic and comprehensive analysis of Clinton as a native son presidential candidate employing local country state and national data to show how elections can be derived from values and beliefs

A Different Democracy Steven L. Taylor, Matthew S. Shugart, Arend Lijphart, Bernard Grofman, 2014-10-28 Four distinguished scholars in political science analyze American democracy from a comparative point of view exploring how the U S political system differs from that of thirty other democracies and what those differences ultimately mean for democratic performance This essential text approaches the following institutions from a political engineering point of view constitutions electoral systems and political parties as well as legislative executive and judicial power The text looks at democracies from around the world over a two decade time frame The result is not only a fresh view of the much discussed theme of American exceptionalism but also an innovative approach to comparative politics that treats the United States as but one case among many An ideal textbook for both American and comparative politics courses

Information, Participation, and Choice Bernard Grofman, 1993 A review of the consequences for political science of Anthony Downs's seminal work

The Roles and Function of Parliamentary Questions Shane Martin, Olivier Rozenberg, 2014-06-03 Parliamentary questions are a feature of almost all national legislatures Despite this we know very little about how questions are used by MPs and what impact questions have on controlling the government This volume advances our theoretical and empirical knowledge of the use of questioning in a number of different parliamentary settings The propensity of parliamentarians to ask questions indicates that the interrogatories are an important tool for measuring an individual legislator's job Ultimately how a parliamentarian

chooses to use the questioning tool provides a unique insight into legislator behaviour and role orientation Many of the chapters in this volume provide new empirical measures of legislator activity and use this data to provide new tests of leading theories of legislator behaviour At an institutional level questions provide an important source of information for the chamber and are a critical tool of government oversight as many of the chapters in the volume indicate Evidence of the impact of questions on executive and bureaucratic oversight challenges conventional views of parliaments as weak and ineffective parts of the political process This book was published as a special issue of the Journal of Legislative Studies

Assessing the Lee Teng-hui Legacy in Taiwan's Politics Bruce Dickson, Chien-Min Chao, 2016-09-16 The 12 years of Lee Teng hui s presidency were marked by a series of contrary trends such as progress in the consolidation of Taiwan s democracy and periodic conflicts with China This book assesses the complex legacy of Lee Teng hui by looking at his accomplishments and setbacks

Political Representation and Legitimacy in the European Union Hermann Schmitt, Jacques Thomassen, 1999-06-10 How severe a problem is what many call the democratic deficit of the European Union Despite a voluminous theoretical literature dealing with this question there is hardly any systematic empirical investigation of the effectiveness of the system of political representation in the EU and of the legitimacy beliefs of EU citizens that spring from it This volume elaborates a conceptual framework for the empirical analysis of the alleged democratic deficit Four dimensions of legitimacy beliefs are identified and analysed the European political community the scope of EU government the institutions and processes of EU government and EU policies Based upon large scale representative surveys among the mass publics and different strata of the political elite of the EU and its member states the book examines the conditions of political representation in the EU The results demonstrate by and large that legitimacy beliefs of EU citizens are the more positive the less specific the object of identification and evaluations is and that the process of political representation works pretty well as long as issues other than European Union issues are concerned These findings are finally discussed in view of familiar strategies for institutional reform of the European Union

Personality Politics? Marina Costa Lobo, John Curtice, 2015 Personality Politics assesses the role that voters perceptions and evaluations of leaders play in democratic elections The book presents evidence from an array of countries with diverse historical and institutional contexts and employs innovative methodologies to determine the importance of leaders in democracies worldwide Addressing such questions as Where do leaders effects come from In which institutional contexts are leader effects more important and To which kinds of voters are leaders a more prominent factor for voting behaviour the authors seek to determine whether the roles leaders play enhances or damages the electoral process and what impact this has on the quality of democracy in electoral democracies today

Realignment Theodore Rosenof, 2003-05-07 Realignment The Theory that Changed the Way We Think About American Politics tells the dramatic story of how a new approach to American politics emerged in the aftermath of Harry Truman s stunning 1948 election upset victory This approach realignment theory held that critical elections such as those of the Civil

War era the 1890 s and the 1930 s shaped politics for decades to come Theodore Rosenof details how realignment theory emerged as the predominant explanation of electoral change and how after decades of analysis it remains a subject of continuing influence and controversy The first history of this important theory Realignment weaves history and political science into a compelling look at American elections **Mapping Policy Preferences from Texts** Andrea Volkens, Judith Bara, Ian Budge, Michael D. McDonald, Hans-Dieter Klingemann, 2013-11 The book is primarily concerned with ensuring the quality of the CMP MARPOR data and ways of assessing and using them Dustjacket *Research Handbook on Political Partisanship* Henrik Oscarsson, Sören Holmberg, 2020-05-29 Based on cutting edge global data the Research Handbook of Political Partisanship argues that partisanship is down but not out in contemporary democracies Engaging with key scholarly debates from the rise of right wing partisanship to the effects of digitalization on partisanship contributions highlight the significance of political partisanship not only in the present but in the future of democracies internationally **The European Voter** J. J. A. Thomassen, 2005-07-28 This is the first book length comparison of the dynamics of electoral behaviour across a wide range of European countries over the past forty years Leading scholars come together to assess how voting patterns have changed in six established democracies Britain Germany The Netherlands Sweden Denmark and Norway *The British Presidency* Michael Foley, 2000 The Premiership of Tony Blair has not only reaffirmed previous trends towards leader centered parties and governments it has provided a decisive change in the development of a British presidency The strategies and techniques designed to secure and expand Blair s public outreach together with the priority attached to the prime minister s personal pledges and individual vision have propelled the office into new dimensions of independence Michael Foley argues that the ascendancy of Blair is not an aberration but rather a culmination of trends that have established vigorous leadership as a key criterion of political evaluation and governing competence This edition is completely up to date including the first convincing analysis of Tony Blair s leadership style *The Latin American Voter* Ryan E Carlin, Matthew M Singer, Elizabeth J Zechmeister, 2015-07-21 In this volume experts on Latin American public opinion and political behavior employ region wide public opinion studies elite surveys experiments and advanced statistical methods to reach several key conclusions about voting behavior in the region s emerging democracies In Latin America to varying degrees the average voter grounds his or her decision in factors identified in classic models of voter choice Individuals are motivated to go to the polls and select elected officials on the basis of class religion gender ethnicity and other demographic factors substantive political connections including partisanship left right stances and policy preferences and politician performance in areas like the economy corruption and crime Yet evidence from Latin America shows that the determinants of voter choice cannot be properly understood without reference to context the substance specific cleavages campaigns performance and the structure fragmentation and polarization that characterize the political environment Voting behavior reflects the relative youth and fluidity of the region s party systems as parties emerge and splinter to a far greater

degree than in long standing party systems Consequently explanations of voter choice centered around country differences stand on equal footing to explanations focused on individual level factors

Political Representation in France and Germany Oscar W. Gabriel, Eric Kerrouche, Suzanne S. Schüttemeyer, 2018-06-28 Notwithstanding its contemporary critics political representation remains at the core of democratic politics Based on a comparative research project that gathered data from observations surveys experiments and expert interviews this book examines the process and the quality of political representation in France and Germany from a dual perspective First it analyzes MPs behavior during their district activities Second it investigates the perceptions and evaluations of the represented the French and German citizens In ten chapters different facets of MPs activities as well as citizens attitudes are comparatively investigated The book is relevant for Politics scholars and practitioners at national parliaments to better understand representative democracies and it may also contribute to improve representation itself

Democracy, Intermediation, and Voting on Four Continents Richard Gunther, Jose Ramon Montero, Hans-Jürgen Puhle, 2007-02-08 This book presents the results of systematic comparative analyses of electoral behavior and support for democracy in 13 countries on four continents It is based on national election surveys held in old and new democracies in Europe Germany Britain Spain Greece Italy Portugal Bulgaria North and South America the United States Chile and Uruguay and Asia Hong Kong between 1990 and 2004 It is methodologically innovative notwithstanding the fact that its core concern with political intermediation i e the flow of political information from parties and candidates to voters through the mass communications media membership in secondary associations and direct face to face contacts within interpersonal networks was first introduced to the study of electoral behavior by Paul Lazarsfeld and his collaborators in the 1940s In addition to reviving that long neglected analytical framework this book breaks new ground by systematically exploring the impact of socio political values on electoral behavior It also analyzes the role of political intermediation in forming basic attitudes towards democracy which are crucial for the consolidation of new democracies and in turn channeling those orientations into various forms of political behavior Some of the findings presented in this volume are dramatic and clearly reveal that these channels of information are among the most powerful factors influencing the development of political attitudes and partisan electoral behavior So too are socio political values in some countries particularly the United States This volume is the first book length product of the now 18 country Comparative National Elections Project

Leaders without Partisans Diego Garzia, Frederico Ferreira da Silva, Andrea de Angelis, 2021-09-01 Leaders without Partisans examines the changing impact of party leader evaluations on voters behavior in parliamentary elections The decline of traditional social cleavages the pervasive mediatization of the political scene and the media s growing tendency to portray politics in personalistic terms all led to the hypothesis that leaders matter more for the way individuals vote and often the way elections turn out This study offers the most comprehensive longitudinal assessment of this hypothesis so far The authors develop a composite theoretical framework based on currently disconnected strands of

research from party media and electoral studies and test it empirically on the most encompassing set of national election study datasets ever assembled The labor intensive harmonization effort produces an unprecedented dataset pooling information for a total of 129 parliamentary elections conducted between 1961 and 2018 in 14 West European countries The book provides evidence of the longitudinal growth in leader effects on vote choice and on turnout The process of partisan dealignment and changes in the structure of mass communication in Western societies are identified as the main drivers of personalization in voting behavior *Opposing Europe in the European Parliament* Nathalie Brack, 2017-10-20 The book provides an in depth analysis of Eurosceptics strategies in the European Parliament It explores the paradoxical situation of Eurosceptic MEPs particularly successful during EP elections how then once elected do they operate in a political system they oppose This book analyses how Eurosceptic MEPs conceive and carry out their mandate within the institution On the basis of more than 100 interviews it proposes a typology of four strategies developed by these actors It also explains the diversity of Eurosceptics strategies showing the relevance of the interaction between the institutional context and the individuals preferences With the growing success of Eurosceptic parties and the challenges they pose to the future of integration this study also reflects on the consequences of their presence for the EP and for the legitimacy of the EU This book will be of interest to students and scholars of European politics European integration comparative politics legislative studies and political parties
