Confronting Challenges to the Liberal Arts Curriculum Patti McGill Peterson, 2012-03-15 Comparative research on higher education in developing and transitional countries is often focused on such issues as access finance student mobility and the impact of globalization but there has been little attention to curriculum and the forces that shape it **Confronting Challenges to the Liberal Arts Curriculum** fills an important gap in the literature by examining the context content challenges and successes of implementing liberal arts coursework within undergraduate curriculum In order to fully understand the place of liberal education in each location chapter authors have employed a wide lens to investigate the influences upon curricular content in China India Mexico Pakistan Poland Russia South Africa and Turkey Thus this volume explores how curricular content is decided how educational programs are being structured and whether countries are viewing higher education as more than just the preparation of students for specialized knowledge By providing detailed case studies of these countries at crucial transition points in their higher education systems each chapter outlines the state of higher education system and the government's role the impact of imported models the presence of a liberal education the curricular formation and best examples of successful programs Ultimately this volume depicts how global influences have come to rest in developing countries and how market forces far removed from faculty and students have shaped the undergraduate curriculum This valuable book is of interest to scholars and researchers in Higher Education as well as practitioners working to foster student and faculty exchange and raise awareness of curricular issues Education, Skills and International Cooperation Kenneth King, 2019-10-15 This book highlights some of Kenneth King's diverse contributions to international and comparative education African studies and development studies over more than four decades From his pioneering work on the first educational commissions to Africa through his research on skills training in the informal sector and on to his critical analysis of education analysis in development agencies this book makes influential materials available in one place Appropriately it illustrates his career long connections with Kenya but also his more recent engagement with Japan China and India It is the first CERC volume to pay significant attention to the policies and politics of skills development Kenneth King is an Emeritus Professor of the University of Edinburgh He was based in and directed its Centre of African Studies for many years and lectured on international perspectives in education and training in its School of Education His research interests have addressed the politics and planning of skills development including in the informal sector of the economy aid policies towards education of both Western and Asian donors and higher education cooperation He founded NORRAG the
