

Present Tendencies in the Electrical Industry

H. D. SHUTE

Vice-President, Westinghouse Electric & Mfg. Co.

THE electrical industry embraces a wide and rapidly growing field. Nearly 7000 central stations distribute power to industrial concerns, railways, homes and farms. Probably two-thirds of the people in this country are within reach of the manifold service made available by an immense network of electric wires. To supply the apparatus and devices needed, there have grown up something like 4000 enterprising manufacturing concerns, who turn out from their shops the multitudinous varieties of product needed in the chain from the prime movers to current consuming devices located in homes, factories and thoroughfares. The growth of this immense industry has been rapid but sound. Each step has been the result of research work by field and factory engineers who, with tireless energy and painstaking care, have sought new and better ways of supplying the people's needs. The possibilities for further growth are almost boundless. As this development takes place it will be conducted with the same high quality of engineering and business judgment which has characterized its past course.

The situation with the public service companies furnishing light and power is promising. Their load is keeping up very closely to that of 1920 and, in general, their net income has been increased, due largely to their successful efforts in reducing the cost of producing power. The public demand upon them for electrical energy due to the necessary uses of this form of power continues to grow, almost in spite of business conditions. There is nothing today relatively so cheap as electrical power.

At present there is a power generating shortage in the whole country, which is gradually being overcome by the enlargement of existing stations and the construction of new stations. Our water power resources have been developed to only a small percentage of that available, but this development is rapidly increasing, due both to a more favorable attitude on the part of the Federal government and to the improved facilities for transmission of power to great distances afforded by the development of equipment suitable for 220,000 volt service. Two long lines at this voltage are now being installed in California, while an experimental transformer capable of supplying one million volts to ground, equivalent to two million volts between the terminals

of two similar units, has recently been constructed and tested.

There is continuing a tendency toward the interconnection of large power systems, with the resultant improvement in reliability with smaller amounts of standby equipment, as well as material operating economies, of which the "Super Power Survey," whose report has recently been published, is an outgrowth. The concentration of large amounts of power produced by such interconnections, as well as the growth to enormous size of many of the larger power plants, makes the reliability of relay and circuit breaker equipment of primary importance, and this equipment has been improved until it is fully capable of withstanding the tremendous strains which are imposed upon it during emergency conditions.

In the supply and merchandising fields, the prospects are now much brighter than they have been for some time. Manufacturers, jobbers and dealers are beginning to recover from the disastrous effects of falling prices, with consequent shrinkage of assets and of reduced volume of business and reduced margin of profits, all of which they have had to contend with during the entire year of 1921. They are also now realizing that they must reduce their overhead expenses and are acting accordingly. Merchandise stocks have been well liquidated; such replenishing as has been done has been on a hand-to-mouth basis throughout the year. The type of optimism so loudly expressed six months ago was based on fright, but today's optimistic utterances have an undertone of confidence, which comes from the knowledge that liquidation has gone a long way, though not, of course, to its final destination. Even hand-to-mouth buying in this great country runs into big figures and at this time, when stocks are practically exhausted, this facts constitutes the strength of the situation. When labor is further liquidated to a point where construction work really starts again, as it may in the Spring, there will be a satisfying demand for all lines of electrical supplies and merchandise.

The keynote of the industrial power field is reduction of production costs. This attitude is favorable to the central station business, and offsets to some extent the fact that few increases in plant size are being undertaken. The economy of motor drive, both from the

Electric Journal September 19 Introduction

In the digital age, access to information has become easier than ever before. The ability to download Electric Journal September 19 has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Electric Journal September 19 has opened up a world of possibilities. Downloading Electric Journal September 19 provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Electric Journal September 19 has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Electric Journal September 19. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Electric Journal September 19. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Electric Journal September 19, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Electric Journal September 19 has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it

offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
