Electrical Technology In Mining The Dawn Of A New Age:

Electrical Technology in Mining Alan Victor Jones, Renold P. Tarkenter, 1992 A consideration of the early development of electricity in a major British coalfield and an investigation into how such a well established labour intensive industry upon which the prosperity of the local community depended was able to respond to the challenge of new technology *Dawn of the Electronic Age* Frederik Nebeker, 2009-03-30 A comprehensive and fascinating account of electrical and electronics history Much of the infrastructure of today's industrialized world arose in the period from the outbreak of World War I to the conclusion of World War II It was during these years that the capabilities of traditional electrical engineering generators power transmission motors electric lighting and heating home appliances and so on became ubiquitous Even more importantly it was during this time that a new type of electrical engineering electronics emerged Because of its applications in communications both wire based and wireless entertainment notably radio the phonograph and sound movies industry science and medicine and the military the electronics industry became a major part of the economy Dawn of the Electronic Age explores how this engineering knowledge and its main applications developed in various scientific economic and social contexts and explains how each was profoundly affected by electrical technologies It takes an international perspective and a narrative approach unfolding the story chronologically Though a scholarly study with sources of information given in endnotes for engineers and historians of science and technology the book is intended for the general public Ultimately it tells the story of the development of a new realm of engineering and its widespread applications during the remarkable and tragic period of two world wars and the decades in between *Utilities and Industrial History* John F. Wilson, Steven Toms, Ian G. Jones, 2022-08-19 This shortform book presents key peer reviewed research selected by expert series editors and contextualised by new analysis on the industrial history of delivering utilities With contributions on the strengths and weaknesses of the creation of electricity networks the organisation and performance of Britain's nationalised gas industry and the environmental impact of delivering water and removing waste water this volume provides an array of fascinating insights into industrial history Of interest to business and economic historians this shortform book also provides analysis and illustrative case studies that will be valuable reading across the social sciences *The Life and Times of Sir Goldsworthy Gurney* Dale Porter, 1998 Dale H Porter has combined recent research by local Cornish historians with his own investigations of nineteenth century London politics and society to reconstruct Goldsworthy Gurney's remarkable life Spacecraft Technology Mark Williamson, 2006-02-23 This book covers the development of space technology in the late 1950s and 1960s from the launch of Sputnik 1 in October 1957 to the landing of men on the moon in 1969 The text begins by looking at the challenge of getting into space and the development of the launch of the space launch vehicle and moves on to discussion of unmanned satellites and spaceprobes and the first capsules deployed in Earth orbit and the Apollo missions to the moon Communications R.
