The Political Economy of Institutional Change in the Electricity Supply Industry Carlos Rufin, 2003-01-01 Through a variety of analytical lenses formal modeling econometrics and case study comparisons Carlos Rufin fills a gap in the political economy of second wave or microeconomic reforms around the world More specifically he does so in the context of the electricity supply industry where such reforms have been as problematic as they have been widespread The author shows that ideological considerations and bargaining over the distribution of economic rents accruing from certain institutional arrangements are powerful shapers of institutional change At the same time the legacy of the past does not appear to have a clear or systematic effect on the direction of second wave reforms that seek to transform existing economic institutions If distributional conflicts can be resolved these conclusions provide grounds for optimism about the ability to create new institutions even in countries where little favorable precedent exists

advance analysis on Negotiated Environmental Agreements NEAs in a multi disciplinary and co ordinated way The authors advocate increased use of NEAs as policy instruments to deal with environmental problems The book analyses both theoretically and through the example of existing European agreements the critical factors that can influence the performance of a negotiated environmental agreement Negotiating Environmental Agreements in Europe contains 12 case studies analysing 12 different negotiated agreements in European countries These are analysed comparatively in order to examine to what extent the different hypotheses postulated in the book are valid *The Political Economy of Privatization* Thomas Clarke,Christos Pitelis,2005-08-17 This book considers the many facets of the privatization process in advanced industrialised countries along with the marketization of Eastern Europe and the pressures on developing countries to adopt privatization as the route to growth **Transforming Electricity** Walt Patterson,2013-11-19 This text reassesses the basic premises that have guided electricity development for more than a century in the light of new understanding pressures and opportunities It investigates the changes already in progress and those that may yet follow their interactions and their implications for policy As the world pursues sustainable development what might sustainable electricity mean and how can it be achieved Electricity transmission access United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Energy and Power,1989 **Economic Regulation and Its Reform** Nancy L. Rose,2014-08-29 The past thirty years have witnessed a transformation of government economic intervention in broad segments of industry throughout the world Many industries historically subject to economic price and entry controls have been largely deregulated including natural gas trucking airlines and commercial banking However recent concerns about market power in restructured electricity markets airline industry instability amid chronic financial stress and the challenges created by the repeal of the Glass Steagall Act which allowed commercial banks to participate in investment banking have led to calls for renewed market intervention Economic Regulation and Its Reform collects research by a group of distinguished scholars who explore these and other issues surrounding government economic intervention Determining the consequences of such intervention requires a careful assessment of the costs and benefits of imperfect regulation Moreover government interventions may take a variety of forms from relatively nonintrusive performance based regulations to more aggressive antitrust and competition policies and barriers to entry This volume introduces the key issues surrounding economic regulation provides an assessment of the economic effects of regulatory reforms over the past three decades and examines how these insights bear on some of today s most significant concerns in regulatory policy **Electric Power Services: Recent Reforms in Selected Foreign Markets, Inv. 332-411** , **The Oxford Handbook of Business and Government** David Coen,Wyn Grant,Graham K. Wilson,2010-02-25 Business is one of the major power centres in modern society The state seeks to check and channel that power so as to serve broader public policy objectives However if the way in which business is governed is ineffective or over burdensome it may become more difficult to achieve desired goals such as economic growth or higher levels of employment

In a period of international economic crisis the study of how business and government relate to each other in different countries is of more central importance than ever. These relationships have been studied from a number of different disciplinary perspectives: business studies, economics, economic history, law and political science, and all of these are represented in this handbook. The first part of the book provides an introduction to the ways in which five different disciplines have approached the study of business and government. The second section on the firm and the state looks at how these entities interact in different settings, emphasising such phenomena as the global firm and varieties of capitalism. The third section examines how business interacts with government in different parts of the world, including the United States, the EU, China, Japan and South America. The fourth section reviews changing patterns of market governance through a unifying theme of the role of regulation. Business-government relations can play out in divergent ways in different policy areas, and the fifth section examines the contrasts between different key arenas such as competition policy, trade policy, training policy and environmental policy. The volume provides an authoritative overview with chapters by leading authorities on the current state of knowledge of business-government relations, but also points to ways in which this work might be developed in the future, e.g. through a political theory of the firm.

Electric power wheeling and dealing, 1989 **Challenging Neighbours** CPB Netherlands Bureau for Economic Policy Analysis, 2012-12-06

Challenging Neighbours provides wide coverage of the German and Dutch economies from an institutional point of view. Pensions, competition policy, labour relations, corporate governance and health care are among the topics for which the institutional setting and performance of Germany and the Netherlands are compared. The difficulties and successes the countries have in facing pressures from aging population, developments in technology and global competition are traced back to their institutional roots and lead to mutual lessons for institutional reform for German and Dutch policy makers.

Deregulation of Electric Utilities Georges Zaccour, 2012-12-06

Deregulation of Electric Utilities reviews the main issues relating to the changing environment in the utility industry. Topics covered in depth include compensation for stranded costs, efficiency gains, institutional design, pricing, economics of scale and network externalities. In addition, this book assesses early experiences in electricity deregulation in continental Europe, New Zealand, North America and the United Kingdom.
