Leonardo and the Last Supper Ross King, 2012-01-01 Milan 1496 and forty four year old Leonardo da Vinci has a reputation for taking on commissions and failing to complete them He is in a state of professional uncertainty and financial difficulty For eighteen months he has been painting murals in both the Sforza Castle in Milan and the refectory of the convent of Santa Maria delle Grazie The latter project will become the Last Supper a complex mural that took a full three years to complete on a surface fifteen feet high by twenty feet wide Not only had he never attempted a painting of such size but he had no experience whatsoever in painting in the physically demanding medium of fresco For more than five centuries the Last Supper has been an artistic religious and cultural icon The art historian Kenneth Clark has called it the keystone of European art and for a century after its creation it was regarded as nothing less than a miraculous image Even today according to Clark we regard the painting as more a work of nature than a work of man And yet there is a very human story behind this artistic miracle which was created against the backdrop of momentous events both in Milan and in the life of Leonardo himself In *Leonardo and the Last Supper* Ross King tells the complete story of this creation of this mural the adversities suffered by the artist during its execution the experimental techniques he employed the models for Christ and the Apostles that he used and the numerous personalities involved everyone from the Leonardo s young assistants to Ludovico Sforza the Duke of Milan who commissioned the work Ross King s new book is both a record of Leonardo da Vinci s last five years in Milan and a biography of one of the most famous works of art ever painted

When the Machine Made Art Grant D. Taylor, 2014-04-10 *When the Machine Made Art* covers the reception and criticism of computer art from its emergence in 1963 to its crisis in 1989 when ideological differences fragment the art movement The text begins by identifying the various divisions between the humanistic and scientific cultures that inform early criticism The fact that the first computer art has military origins and is imbued with various techno science mythologies places the movement at odds with artworld orthodoxy Yet while mainstream art critics reproach computerized art a comparison between similar art forms of the era such as conceptual art reveals that the criticism of computer art was motivated more by the fear of the machine than by aesthetics Dr Grant Taylor shows that social anxiety often fueled by Cold War dystopianism posited the computer as a powerful instrument in the overall subordination of the individual to the emerging technocracy But even though anti computer sentiment abated in the late 1970s computer art did not find acceptance The book illustrates how computer art s exponents desiring artworld legitimacy traced its lineage back to modernism Conversely in the 1980s art theorists employing the latest critical theory began critiquing the

assumptions of modernism and thus viewed computer art's modernist history as hopelessly outdated. And yet other critics reconciled computer technology with the critical insights of postmodernism, viewing the computer as a pluralistic agent that could challenge modernist conventions. Nonetheless, while postmodernist criticism enabled the formation of new discourses for emerging digital arts, it left computer art, which was committed to modernist and techno-science philosophies, in a state of crisis.

Creativity and Art Margaret A. Boden, 2012-10-25 Margaret Boden presents a series of essays in which she explores the nature of creativity in a wide range of art forms. Creativity in general is the generation of novel, surprising, and valuable ideas, conceptual, theoretical, musical, literary, or visual. Boden identifies three forms of creativity: combinational, exploratory, and transformational. These elicit differing forms of surprise and are defined by the different kinds of psychological process that generate the new ideas. Boden examines creativity not only in traditional fine art but also in craftworks and some less orthodox approaches, namely conceptual art and several types of computer art. Her Introduction draws out the conceptual links between the various case studies, showing how they express a coherent view of creativity in art.

Generative Systems Art Francesca Franco, 2017-10-05 In this unique book, the author explores the history of pioneering computer art and its contribution to art history by way of examining Ernest Edmonds' art from the late 1960s to the present day. Edmonds' inventions of new concepts, tools, and forms of art, along with his close involvement with the communities of computer artists, constructive artists, and computer technologists, provides the context for discussion of the origins and implications of the relationship between art and technology. Drawing on interviews with Edmonds and primary research in archives of his work, the book offers a new contribution to the history of the development of digital art and places Edmonds' work in the context of contemporary art history.

Digital Currents Margot Lovejoy, 2004-08-02 Digital Currents explores the growing impact of digital technologies on aesthetic experience and examines the major changes taking place in the role of the artist as social communicator. Margot Lovejoy recounts the early histories of electronic media for art-making: video, computer, the internet. In this richly illustrated book, she provides a context for the works of major artists in each media, describes their projects, and discusses the issues and theoretical implications of each to create a foundation for understanding this developing field. Digital Currents fills a major gap in our understanding of the relationship between art and technology and the exciting new cultural conditions we are experiencing. It will be ideal reading for students taking courses in digital art and also for anyone seeking to understand these new creative forms.

Explorations in Art and Technology Linda Candy, Ernest Edmonds, 2012-12-06 Explorations in Art and Technology is about the creative process in action through the eyes of practitioners and researchers. The book explores the fascinating relationship between artist and technologist through studies of innovative projects that push the boundaries of digital art. The research sheds new light on the nature of interaction between people and computers and provides insight into the characteristics of environments in which creativity can be enhanced. In doing so, it presents a case for organisations to develop strategies for offering environments in which collaborative, sustainable partnerships can

thrive What emerges is a compelling story of new visions and new forms in a field that is set to transform traditional norms in both art and technology as we move through the 21st Century Additional information and links are available at <http://www.creativityandcognition.com>

1478, a Year in Leonardo da Vinci's Career Edoardo Villata, 2021-03-01 1478 was the year in which Leonardo da Vinci aged 26 obtained his first official commission and witnessed the Pazzi Conspiracy against the Medici family In that year he probably opened his independent workshop leaving that of his master Andrea del Verrocchio and in its final months he began to paint two paintings representing the Virgin Mary One of these paintings is very likely the Benois Madonna at the State Hermitage St Petersburg a work that marks a strong change in Leonardo's style and power of expression and his representation of light and human emotions This book provides an in depth analysis of Leonardo's growth as an artist in this year detailing his training his culture his collaboration with Verrocchio and his engagement in the artistic and cultural life of 1460s and 1470s Florence

What If Leonardo da Vinci Was Born in the 21st Century? VIRUTI SHIVAN, What if one of history's most celebrated polymaths Leonardo da Vinci was born in the modern era Would he be as iconic as Elon Musk or Steve Jobs or perhaps even transcend them Would his artistic brilliance find new expression through digital media Would his scientific pursuits lead to breakthroughs in fields like AI biotechnology or renewable energy This book aims to answer these questions and more by diving into the world of the 21st century da Vinci a world brimming with technological marvels digital landscapes and innovative possibilities We explore the hypothetical journey of this legendary man navigating the realms of art science engineering and philosophy in our contemporary society Discover what mediums and techniques da Vinci might adopt for his art in the era of Photoshop augmented reality and 3D printing Learn how the modern scientific landscape could supercharge his insatiable curiosity and inventive brilliance Explore the ethical philosophical and societal implications of da Vinci's works in today's complex world Join us as we reimagine the life and legacy of Leonardo da Vinci sculpted anew by the 21st century canvas Through speculative essays expert interviews and thought experiments we construct an illuminating narrative that transcends time revealing how genius can flourish in any epoch

The Fabrication of Leonardo da Vinci's Trattato della pittura (2 vols.) Claire Farago, Janis Bell, Carlo Vecce, 2018-01-29 The basis for our understanding of Leonardo's theory of art was for over 150 years his Treatise on Painting which was issued in 1651 in Italian and French This present volume offers both the first scholarly edition of the Italian editio princeps as well as the first complete English translation of this seminal work In addition It provides a comprehensive study of the Italian first edition documenting how each editorial campaign that led to it produced a different understanding of the artist's theory What emerges is a rich cultural and textual history that foregrounds the transmission of artisanal knowledge from Leonardo's workshop in the Duchy of Milan to Carlo Borromeo's Milan Cosimo I de' Medici's Florence Urban VIII's Rome and Louis XIV's Paris

Re-Reading Leonardo Claire Farago, 2017-07-05 For nearly three centuries Leonardo da Vinci's work was known primarily through the abridged version of his Treatise on Painting first published in Paris in 1651 and soon

translated into all the major European languages Here for the first time is a study that examines the historical reception of this vastly influential text This collection charts the varied interpretations of Leonardo's ideas in French Italian Spanish English German Dutch Flemish Greek and Polish speaking environments where the Trattato was an important resource for the academic instruction of artists one of the key sources drawn upon by art theorists and widely read by a diverse network of artists architects biographers natural philosophers translators astronomers publishers engineers theologians aristocrats lawyers politicians entrepreneurs and collectors The cross cultural approach employed here demonstrates that Leonardo's Treatise on Painting is an ideal case study through which to chart the institutionalization of art in Europe and beyond for 400 years The volume includes original essays by scholars studying a wide variety of national and institutional settings The coherence of the volume is established by the shared subject matter and interpretative aim to understand how Leonardo's ideas were used With its focus on the active reception of an important text overlooked in studies of the artist's solitary genius the collection takes Leonardo studies to a new level of historical inquiry Leonardo da Vinci's most significant contribution to Western art was his interpretation of painting as a science grounded in geometry and direct observation of nature One of the most important questions to emerge from this study is what enabled the same text to produce so many different styles of painting
