Everyday Exchanges Marketwork And Capitalist Common Sense:

Everyday Exchanges Evan Watkins, 1998 Arguing against the perception that the capitalist marketplace permits no alternatives the author shows that a kind of economic common sense conditions how people organize their everyday lives and understand their powers as social agents within markets that are far from monolithic and uniform *Market Sense* Philip Kozel, 2013-09-13 This book concentrates upon the historic associations of the marketplace in the work of Aristotle Adam Smith Karl Marx and demonstrates how what markets were imagined to entail for society was critical to each author's understanding of the central social problems of their time **Making Sense of Race, Class, and Gender** Celine-Marie Pascale, 2013-02-01 Using arresting case studies of how ordinary people understand the concepts of race class and gender Celine Marie Pascale shows that the peculiarity of commonsense is that it imposes obviousness that which we cannot fail to recognize As a result how we negotiate the challenges of inequality in the twenty first century may depend less on what people consciously think about difference and more on what we inadvertently assume Through an analysis of commonsense knowledge Pascale expertly provides new insights into familiar topics In addition by analyzing local practices in the context of established cultural discourses Pascale shows how the weight of history bears on the present moment both enabling and constraining possibilities Pascale tests the boundaries of sociological knowledge and offers new avenues for conceptualizing social change In 2008 Making Sense of Race Class and Gender was the recipient of the Distinguished Contribution to Scholarship Book Award of the American Sociological Association Section on Race Gender and Class for distinguished and significant contribution to the development of the integrative field of race gender and class **The Palgrave Handbook of African Political Economy** Samuel Ojo Oloruntoba, Toyin Falola, 2020-06-23 This handbook constitutes a specialist single compendium that analyses African political economy in its theoretical historical and policy dimensions It emphasizes the uniqueness of African political economy within a global capitalist system that is ever changing and complex Chapters in the book discuss how domestic and international political economic forces have shaped and continue to shape development outcomes on the continent Contributors also provoke new thinking on theories and policies to better position the continent's economy to be a critical global force The uniqueness of the handbook lies in linking theory and praxis with the past future and various dimensions of the political economy of Africa *Class Degrees* Evan Watkins, 2009-08-25 A current truism holds that the undergraduate degree today is equivalent to the high school diploma of yesterday But undergraduates at a research university would probably not recognize themselves in the historical mirror of high school vocational education Students in a vast range of institutions are encouraged to look up the educational social scale whereas earlier vocational education was designed to cool out expectations of social advancement by training a working class prepared for massive industrialization In *Class Degrees* Evan Watkins argues that reforms in vocational education in the 1980s and 1990s can explain a great deal about the changing directions of class formation in the United States as well as how postsecondary educational institutions

are changing Responding to a demand for flexibility in job skills and reflecting a consequent aspiration to choice and perpetual job mobility those reforms aimed to eliminate the separate academic status of vocational education They transformed it from a cooling out to a heating up of class expectations The result has been a culture of hyperindividualism The hyperindividual lives in a world permeated with against all odds plots from beat the odds of long supermarket checkout lines by using self checkout and buying FasTrak transponders to beat the odds of traffic jams to the endless superheroes on film and TV who daily save various sorts of planets and things against all odds Of course a few people can beat the odds only if most other people do not As choice begins to replace the selling of individual labor at the core of contemporary class formation the result is a sort of waste labor left behind by the competitive process Provocatively Watkins argues that in the twenty first century academic work in the humanities is assuming the management function of reclaiming this waste labor as a motor force for the future

World Bank Literature Amitava Kumar, 2003 World Bank literature is more than a concept it is a provocation a call to arms It is intended to prompt questions about each word to probe globalization political economy and the role of literary and cultural studies As asserted in this major work it signals a radical rewriting of academic debates a rigorous analysis of the World Bank and the International Monetary Fund IMF and a consideration of literature that deals with new global realities Made more relevant than ever by momentous antiglobalization demonstrations in Seattle and Genoa World Bank Literature brings together essays by a distinguished group of economists cultural and literary critics social scientists and public policy analysts to ask how to understand the influence of the World Bank IMF on global economic power relations and cultural production The authors attack this question in myriad ways examining World Bank IMF documents as literature their impact on developing nations the relationship between literature and globalization the connection between the academy and the global economy and the emergence of coalitions confronting the new power World Bank Literature shows above all the multifarious and sometimes nefarious ways that abstract academic debates play themselves out concretely in social policy and cultural mores that reinforce traditional power structures

The Knowledge Contract David B. Downing, 2005-01-01 The Knowledge Contract intervenes in the ongoing

debates about the changing conditions of higher education in America with a special focus on English studies and the humanities This highly original study integrates three crucial concerns the economic restructuring of higher education the transformation of disciplinary models of teaching and research and the rise of the academic labor movement Whereas most contemporary critiques of higher education have focused on the impact of global economic forces The Knowledge Contract adds a new dimension to the discussion by addressing the tensions between disciplinary and nondisciplinary forms of academic work David B Downing draws on several traditions of scholarship histories of the university sociological studies of education critiques of disciplinary and interdisciplinary forms of work histories of academic capitalism and the labor movement and field specific analyses of the history of English studies Building on his analysis Downing develops alternative possibilities to the dominance of disciplinary forms of labor and offers scenarios for creating more equitable working and learning conditions for faculty and students

Markets, Class and Social Change B. Crow,2001-10-10 At the beginning of the twenty first century an idealized view of markets informs government policy Real differences in how markets interact with social change are obscured and public action on poverty is constrained Markets Class and Social Change uses a detailed study of the grain trade in Bangladesh to show how socially constrained patterns of market involvement may systematically benefit the rich while disadvantaging the poor More generally the book suggests that markets are implicated in the making of society its divisions identities and directions *Ibss: Sociology: 1998* Compiled by the British Library of Political and Social Science,1999-12-16 Renowned for its international coverage and rigorous selection procedures this series provides the most comprehensive and scholarly bibliographic service available in the social sciences Arranged by topic and indexed by author subject and place name each bibliography lists and annotates the most important works published in its field during the year of 1997 including hard to locate journal articles Each volume also includes a complete list of the periodicals consulted

[The Politics of Economic Life](#) Martin Beckstein,2015-09-07 In recent years economic life has become increasingly politicized now every company has a philosophy promising its customers some ethical surplus in return for buying their products consumers shop for change workers engage in individualized forms of employee activism such as whistleblowing and governments contribute to the re configuration of the economic sphere as a site of political contestation by reminding corporate and private economic actors of their duty to do their bit The Politics of Economic Life addresses this trend by exploring the ways in which practices of consumption work production and entrepreneurship are imbued with political strategy and ideology and assesses the potentials and perils of the politicization of economic activity for democracy in the 21st century
