Evidence, Inference and Enquiry Philip Dawid, William Twining, Mimi Vasilaki, 2011-12-01 Scholars in diverse academic disciplines discuss the ways in which evidence is conceived used and manipulated in their own fields They explore the possibilities for cross disciplinary fertilisation and ask if it is possible or desirable to develop general multidisciplinary criteria and methods for studying and handling evidence Material Evidence Robert Chapman, Alison Wylie, 2014-12-05 How do archaeologists make effective use of physical traces and material culture as repositories of evidence Material Evidence takes a resolutely case based approach to this question exploring instances of exemplary practice key challenges instructive failures and innovative developments in the use of archaeological data as evidence The goal is to bring to the surface the wisdom of practice teasing out norms of archaeological reasoning from evidence Archaeologists make compelling use of an enormously diverse range of material evidence from garbage dumps to monuments from finely crafted artifacts rich with cultural significance to the detritus of everyday life and the inadvertent transformation of landscapes over the long term Each contributor to Material Evidence identifies a particular type of evidence with which they grapple and considers with reference to concrete examples how archaeologists construct evidential claims critically assess them and bring them to bear on pivotal questions about the cultural past Historians cultural anthropologists philosophers and science studies scholars are increasingly interested in working with material things as objects of inquiry and as evidence and they acknowledge on all sides just how challenging this is One of the central messages of the book is that close analysis of archaeological best practice can yield constructive guidelines for practice that have much to offer archaeologists and those in related fields
