Creating Consilience Edward Slingerland, Mark Collard, 2012-01-19 Calls for a consilient or vertically integrated approach to the study of human mind and culture have for the most part been received by scholars in the humanities with either indifference or hostility One reason for this is that consilience has often been framed as bringing the study of humanistic issues into line with the study of non human phenomena rather than as something to which humanists and scientists contribute equally The other major reason that consilience has yet to catch on in the humanities is a dearth of compelling examples of the benefits of adopting a consilient approach Creating Consilience is the product of a workshop that brought together internationally renowned scholars from a variety of fields to address both of these issues It includes representative pieces from workshop speakers and participants that examine how adopting such a consilient stance informed by cognitive science and grounded in evolutionary theory would concretely impact specific topics in the humanities examining each topic in a manner that not only cuts across the humanities natural science divide but also across individual humanistic disciplines By taking seriously the fact that science humanities integration is a two way exchange this volume takes a new approach to bridging the cultures of science and the humanities The editors and contributors formulate how to develop a new shared framework of consilience beyond mere interdisciplinarity in a way that both sides can accept **Evolutionary Biology—A**

Transdisciplinary Approach Pierre Pontarotti, 2020-10-29 This book includes 16 selected contributions presented at the 23rd Evolutionary Biology Meeting which took place in Marseille in September 2019 The annual Evolutionary Biology Meetings in Marseille serve to gather leading evolutionary biologists and other scientists using evolutionary biology concepts e g for medical research The aim of these meetings is to promote the exchange of ideas to encourage interdisciplinary collaborations Offering an up to date overview of recent findings in the field of evolutionary biology this book is an invaluable source of information for scientists teachers and advanced students *Scientific Gestalt* Ray Edwards, 2012-08-15

Goldstein Koffka Khler Lewin and Wertheimer were scientists who at the turn of the 20th century founded the gestalt approach in psychology Fritz Perls 1944 recognized the potential of the gestalt approach in psychotherapy and founded what is now the widespread system of gestalt therapy Perls understanding of gestalt theory was broadened by Zinker with recognition of stages of development of each gestalt so that what is now termed the Cleveland cycle of experience was recognized Ray Edwards has proposed two innovations First it is shown that completion and grounding of the gestalt cycle of events facilitates re energization of depressed people Second attention to Gendlins felt senses aided by use of David Groves clean subset of language facilitates freeing post trauma patients from the effect of recurrent nightmares and or flash backs The relevant felt senses are termed proto figures and are usually phenomena like butterflies in the stomach lumps in the

stomach or throat and or clouds are hanging over me This present book sets these innovations in full historical context and reveals the gestalt system to be scientific in character Malcolm Parlett Ph D First Editor of the British Gestalt Journal commented on an earlier version of this book This is a thought provoking read a quirky and vividly argued alternative version of gestalt therapy that challenges most of the assumptions of contemporary Gestalt psychotherapy and will send many a reader fl ying to a computer to type a rebuttal But Ray Edwards book is defi nitely worth a look at not least for its acerbic criticisms and references to our past traditions I recommend the self published manuscript by an impressive maverick octagenarian gestalt thinker with strong opinions complete with its copious spelling errors and other forgiveable self indulgences
