Evolution And Christian Faith:

How I Changed My Mind About Evolution Kathryn Applegate, J. B. Stump, 2016-05-09 Perhaps no topic appears as potentially threatening to evangelicals as evolution. Yet many evangelicals have reconciled their firm beliefs in God and the Bible with the conclusions of science. Here are the stories of over two dozen evangelical scientists, pastors, biblical scholars, and theologians who have come to embrace both evolution and faith. *Evolution and Christian Faith* Bolton Davidheiser, 1969

The Evolution of Faith Thomas R. McFaul, Al Brunsting, 2021-07-21 A new understanding is developed in this book about the relationship between the Christian faith, modern science, and the world religions. The authors call their new position Evolutionary Pluralism. By combining the Christian faith with modern science and the global growth of religious diversity, Evolutionary Pluralism provides Christians with an alternative to current interpretations such as Young Earth Creationism, Old Earth Creationism, Intelligent Design Creationism, and Evolutionary Creationism. This new understanding stands solidly within the history and traditions of the Christian faith and builds on the life and ministry of Jesus Christ.

Evolution and Christian Faith Joan Roughgarden, 2006-08-01 *Evolution and Christian Faith* distills complex arguments into everyday understanding. The result is an accessible and intelligent context for a Christian vision of the world that embraces science.

Four Views on Creation, Evolution, and Intelligent Design Zondervan, 2017-11-21 Evolution or the broader topic of origins has enormous relevance to how we understand the Christian faith and how we interpret Scripture. *Four Views on Creation, Evolution, and Intelligent Design* presents the current state of the conversation about origins among evangelicals, representing four key positions: Young Earth Creationism (Ken Ham), Answers in Genesis (Old Earth), Progressive Creationism (Hugh Ross), and Reasons to Believe (Evolutionary Creation). Deborah B. Haarsma (BioLogos), Intelligent Design (Stephen C. Meyer, The Discovery Institute). The contributors offer their best defense of their position, addressing questions such as: What is your position on origins, understood broadly to include the physical universe, life, and human beings in particular? What do you take to be the most persuasive arguments in defense of your position? How do you demarcate and correlate evidence about origins from current science and from divine revelation? What hinges on answering these questions correctly? This book allows each contributor to not only present the case for his or her view but also to critique and respond to the critiques of the other contributors, allowing you to compare their beliefs in an open forum setting to see where they overlap and where they differ.

Christians and Evolution R. J. Berry, 2014-11-19 The debate surrounding creation and evolution divides Christians, particularly evangelicals. It has been a stumbling block for young Christians and a point of contention for the new Atheists. Professor R. J. Berry assembles a wide range of distinguished contributors, all convinced, committed, and orthodox Christian believers, each of whom has undertaken a conceptual journey based on sound science and careful theology from a creationist position to one in which God's creation and the processes of evolution are properly and credibly integrated. *Christians and Evolution* is a luminous volume that offers a pathway for doubters, sceptics, and conservative Christians to embrace the

overall scientific consensus of the evolutionary approach while holding solidly and without reservation to the doctrines of God's creation and God's omnipotence This text is a must read for anyone interested in the creation v evolution debate

The Evolution of Christianity Lyman Abbott,1925 *The Prism and the Rainbow* Joel W. Martin,2010-06-01 God or Darwin It is one of the most contentious conflicts of our time It is also completely unnecessary according to Joel W Martin an evolutionary biologist and ordained elder in the Presbyterian Church USA In this slim but powerful book Martin argues that it is not contradictory to be a practicing faithful Christian who accepts the science of evolution Martin finds that much of the controversy in the United States over evolution is manufactured and predicated on a complete and sometimes willful misapprehension of basic science Science and religion he says serve different purposes and each seeks to answer questions that the other need never address He believes that many of the polarizing debates about evolution distract from the deeper lessons of Christianity and that literal fundamentalist readings of the Bible require the faithful to reject not just evolution but many of science's greatest discoveries Just as the scientific explanation of rainbows is not meant to refute the biblical rainbow story of God's promise evolutionary theory is not a ploy to disavow the divine Indeed Martin shows that the majority of Christians worldwide accept the theory of evolution He urges his fellow Christians to refuse to participate in the intellectually stifling debate over evolution and creationism intelligent design Evolutionary Creation Denis O

Lamoureux,2009-02-26 In this provocative book evolutionist and evangelical Christian Denis O Lamoureux proposes an approach to origins that moves beyond the evolution versus creation debate **Can You Believe in God and Evolution?**

Ted Peters,Martinez Hewlett,2008 You decide Can you believe in God and Evolution Three Views on Creation and Evolution James Porter Moreland,John Mark Reynolds,1999 Three views on creation and evolution are presented in this popular format whereby the contributors provide their own articles and respond to those of their peers Saving Darwin Karl Giberson,2008-06-10 Is it possible to still be a Christian and support the idea of evolution Giberson explores the history of the controversy that swirls around evolution and shows why and how it is possible to believe in God and evolution at the same time **The Evolution of Christianity** Lyman Abbott,2021-03-10 Lyman Abbott was an American liberal theologian and a confidant of Theodore Roosevelt He was a moderate man who sought to re-establish Christian faith among the

American people in a period of change This book first published in 1893 argued that spiritual experience is always new and therefore every age requires a new expression for it A believer in the possibility of harmonious coexistence between the Church and evolutionary theory Abbott proposed a more intelligible and credible religion that endeavoured to sustain faith by expressing it in contemporary terms He maintained that science and faith were compatible and that both natural and spiritual elements belonged to a shared kingdom governed by the law of progress Blending faith in historical Christianity with belief in progress and evolutionary theory Abbott aimed to provide a bridge between religious life and late nineteenth century philosophical thought *Redundant God? Christian Faith in the Light of Evolution* David de Pomerai,2020-11-24

Does evolution make faith superfluous Part One of this book looks across the whole spectrum of biology from molecules to ecosystems to human societies and at the fossil history of life on earth concluding that evolution is the only explanatory concept that makes sense of it all Doesn't this demolish the core Christian claim that God created the entire universe Part Two explores whether God might instead embrace that universe with love and compassion without micromanaging or interfering Jesus bears witness to such a God in his kingdom teaching calling Christians to follow his example of humility serving others and valuing what the world considers unimportant This suggests paths of repentance and restraint that are urgently needed in a world facing rapid climate change and likely mass extinction

Evolution and the Christian Faith Philip Bell, 2018-07-07 **Christianity and Evolution** George Matheson, 1887 **Confluence of Evolutionary Science**

and Christian Faith Joseph Fortier, 2011-11-15 In this book I have attempted to chart a path for the reader toward understanding how rigorous empirical scientific thought and solid informed as well as inspired religious faith are in fact congruent with respect to evolution The instruments that are used in this book to chart this path include 1 the findings of scripture scholars regarding the Genesis creation narratives 2 the basic biology of evolution and genetics 3 the basics of the sciences of complexity 4 the philosophy and theology behind the positions people take with respect to evolution and religious faith 5 the thinking of Pierre Teilhard de Chardin on evolution and God and 6 the evolutionary theology of John Haught In the remote wilderness there are two clearwater streams that at close range apparently flow from different mountaintops but which when viewed from farther away can be seen to flow from two ridges of the same mountain Somewhere in the wilds the two streams join become confluent The purpose of this book is to find this confluence

Monkey Trials and Gorilla Sermons Peter J. Bowler, 2009-04-20 Bowler doesn't minimize the hostility of many of the faithful toward evolution but he reveals the less well known existence of a long tradition within the churches that sought to reconcile Christian beliefs with evolution by finding reflections of the divine in scientific explanations for the origin of life

The Evolution of Christianity Lyman Abbott, 2019-10-04 Lyman Abbott was an American liberal theologian and a confidant of Theodore Roosevelt He was a moderate man who sought to re-establish Christian faith among the American people in a period of change This book first published in 1893 argued that spiritual experience is always new and therefore every age requires a new expression for it A believer in the possibility of harmonious coexistence between the Church and evolutionary theory Abbott proposed a more intelligible and credible religion that endeavoured to sustain faith by expressing it in contemporary terms He maintained that science and faith were compatible and that both natural and spiritual elements belonged to a shared kingdom governed by the law of progress Blending faith in historical Christianity with belief in progress and evolutionary theory Abbott aimed to provide a bridge between religious life and late nineteenth century philosophical thought

Human Evolution and Christian Ethics Stephen J. Pope, 2007-12-20 Can the origins of morality be explained entirely in evolutionary terms If so what are the implications for Christian moral theology and ethics Is the latter redundant as socio biologists often assert Stephen Pope

argues that theologians need to engage with evolutionary theory rather than ignoring it. He shows that our growing knowledge of human evolution is compatible with Christian faith and morality provided that the former is not interpreted reductionistically and the latter is not understood in fundamentalist ways. Christian ethics ought to incorporate evolutionary approaches to human nature to the extent that they provide helpful knowledge of the conditions of human flourishing both collective and individual. From this perspective a strong affirmation of human dignity and appreciation for the theological virtues of faith, hope, and charity is consistent with a revised account of natural law and the cardinal virtues.
