Evolution and Ecology Julian Haynes Steward,1977 Scenes from the High Desert Virginia Kerns,2010-10-01 If a religion cannot attract and instruct young people it will struggle to survive which is why recreational programs were second only to theological questions in the development of twentieth century Mormonism In this book Richard Ian Kimball explores how Mormon leaders used recreational programs to ameliorate the problems of urbanization and industrialization and to inculcate morals and values in LDS youth As well as promoting sports as a means of physical and spiritual excellence Progressive Era Mormons established a variety of institutions such as the Deseret Gymnasium and camps for girls and boys all designed to compete with more worldly attractions and to socialize adolescents into the faith Kimball employs a wealth of source material including periodicals diaries journals personal papers and institutional records to illuminate this hitherto underexplored aspect of the LDS church In addition to uncovering the historical roots of many Mormon institutions still visible today Sports in Zion is a detailed look at the broader functions of recreation in society , An Introduction to Theory in Anthropology Robert Layton,1997 In this innovative introduction Robert Layton reviews the ideas that have inspired anthropologists in their studies of societies around the world An Introduction to Theory in Anthropology provides a clear and concise analysis of the theories and traces the way in which they have been translated into anthropological debates The opening chapter sets out the classical theoretical issues formulated by Hobbes Rousseau Marx and Durkheim Successive chapters discuss Functionalism Structuralism Interactionist theories and Marxist anthropology while the final chapters address the competing paradigms of Socioecology and Postmodernism Using detailed case studies Professor Layton illustrates the way in which various theoretical perspectives have shaped competing or complementary accounts of specific human societies La antropología cultural Manuel María Marzal,1996 Visions of Culture Jerry D. Moore,2008-07-25 This new edition of Jerry D Moore s Visions of Culture presents introductory anthropology students with a brief readable and balanced treatment of theoretical developments in the field The key ideas of major theorists are briefly described and unique to this textbook linked to the biographical and fieldwork experiences that helped shape their theories The impact of each scholar on contemporary anthropology is presented along with numerous examples quotes from the theorists writings and a description of the broader intellectual setting in which these anthropologists worked **Social Change in Aegean Prehistory** Corien Wiersma,Sofia Voutsaki,2016-11-30 This volume brings together papers that discuss social change The main focus is on the Early Helladic III to Late Helladic I period in southern Greece but also touches upon the surrounding islands This specific timeframe enables us to consider how mainland societies recovered from a crisis and how they eventually developed into the differentiated culturally receptive and competitive social formations of the early Mycenaean period Material changes are highlighted in the various papers ranging from pottery and burials to domestic architecture and settlement structures followed by discussions of how these changes relate to social change A variety of factors is thereby

considered including demographic changes reciprocal relations and sumptuary behavior household organization and kin structure age and gender divisions internal tensions connectivity and mobility As such this volume is of interest to both Aegean prehistorians as to scholars interested in social and material change The volume consists of eight papers preceded by an introduction and concluded by a response The introduction gives an overview of the development of the debate on the explanation of social change in Aegean prehistory The response places the volume in a broader context of the EH III LH I period and the broader discussion on social change

Social Change Theories in Motion Thomas C.

Patterson,2018-02-01 This book assesses how theorists explained processes of change set in motion by the rise of capitalism It situates them in the milieu in which they wrote They were never neutral observers standing outside the conditions they were trying to explain Their arguments were responses to those circumstances and to the views of others commentators living and dead Some repeated earlier views others built on those perspectives a few changed the way we think While surveying earlier writers the author s primary concerns are theorists who sought to explain industrialization imperialism and the consolidation of nation states after 1840 Marx Durkheim and Weber still shape our understandings of the past present and future Patterson focuses on explanations of the unsettled conditions that crystallized in the 1910s and still persist the rise of socialist states anti colonial movements prolonged economic crises and almost continuous war After 1945 theorists in capitalist countries influenced by Cold War politics saw social change in terms of economic growth progress and modernization their contemporaries elsewhere wrote about underdevelopment dependency or uneven development In the 1980s theorists of postmodernity neoliberalism globalization innovations in communications technologies and post socialism argued that they rendered earlier accounts insufficient Others saw them as manifestations of a new imperialism capitalist accumulation on a global scale environmental crises and nationalist populism

Development Betrayed Richard B Norgaard,2006-05-18 Modernity promised control over nature through science material abundance through technology and effective government through rational social organization

Instead of leading to this promised land it has brought us to the brink of environmental and cultural disaster Why has there been this gap between modernity s aspirations and its achievements Development Betrayed offers a powerful answer to this question Development with its unshakeable commitment to the idea of progress is rooted in modernism and has been betrayed by each of its major tenets Attempts to control nature have led to the brink of environmental catastrophe Western technologies have proved inappropriate for the needs of the South and governments are unable to respond effectively to the crises that have resulted Offering a thorough and lively critiques of the ideas behind development Richard Norgaard also offers an alternative co evolutionary paradigm in which development is portrayed as a co evolution between cultural and ecological systems Rather than a future with all peoples merging to one best way of knowing and doing things he envisions a future of a patchwork quilt of cultures with real possibilities for harmony

Law's Anthropology Paul Burke,2011-11-01 Anthropologists have been appearing as key expert witnesses in native title claims for over 20 years Until now however there has been no theoretically informed detailed investigation of how the expert testimony of anthropologists is formed and how it is received by judges This book examines the structure and habitus of both the field of anthropology and the juridical field and how they have interacted in four cases including the original hearing in the Mabo case The analysis of background material has been supplemented by interviews with the key protagonists in each case This allows the reader a unique insider s perspective of the courtroom drama that unfolds in each case The book asks given the available ethnographic research how will the anthropologist reconstruct it in a way that is relevant to the legal doctrine of native title when that doctrine gives a wide leeway for interpretation on the critical questions

Games Against Nature Robert W. Harms,Robert Harms,1987 Africa s equatorial rain forests cover an area roughly the size of continental Western Europe and yet the history of this area remains

largely unexplored Robert Harms makes an important advance in this book toward recovering that history by telling the story of the Nunu who live in and around the swampy floodplains of the middle Zaire River A key element in Nunu history has been the small scale short distance migrations that continually led individuals and groups into new micro environments When an increasing population impinged upon the limits of available resources in the late eighteenth century a crisis characterized by drastic change and incessant conflict ensued The Nunu abandoned their ancestral estates to take up new forms of competition in river towns causing a conflict of identity which culminated in civil war in the 1960s

Soundscapes of Wellbeing in Popular Music Gavin J. Andrews, Paul Kingsbury, Robin Kearns, 2016-04-01 Unearthing the messy and sprawling interrelationships of place wellbeing and popular music this book explores musical soundscapes of health ranging from activism to international charity to therapeutic treatments and how wellbeing is sought and attained in contexts of music Drawing on critical social theories of the production circulation and consumption of popular music the book gathers together diverse insights from geographers and musicologists Popular music has become increasingly embedded in complex and often contradictory discourses of wellbeing For instance some new genres and sub cultures of popular music are associated with violence drug use and the angst of living yet simultaneously define the hopes and dreams of millions of young people At a service level popular music is increasingly used as a therapeutic modality in holistic medicine as well as in conventional health care and public health practice The genre of popular music then is fundamental to human wellbeing as an active and central part of people s emotional lives By conceptually and empirically foregrounding place this book demonstrates how music whether from particular places about particular places or played in particular places is a crucial component of health and wellbeing

From Desert to Town Dr. Tomer Mazarib, 2021-01-12 From Desert to Town sheds light on the sedentarisation and integration of Bedouin living in fellahin towns and villages in the Galilee between 1700 and 2020 The purpose is to analyse the dynamics of the factors and circumstances that led to this migration Official history has always lacked data on the Bedouin population in Palestine Historians have recorded the biography of particular elites and especially in the context of local warfare and tribal antagonisms but have hitherto neglected ongoing migration from desert life to town life of Bedouin in the Galilee The historical record is further complicated by the Bedouin themselves who over time have been reluctant to register with governmental authority whether Ottoman British or Israeli This book brings together the available historical information combined with ethnographic data from which it is possible to derive analyse and infer much information about Bedouin life in the Galilee over the past three hundred years The move from rural to town for populations world wide has dominated twentieth century migration patterns The move from desert life as opposed to the move from rural life has distinctive features making the Bedouin case unique in its social complexity from change in the use of language to the economic underpinning of intermarriage A comprehensive understanding of the process of Bedouin settlement and integration into urban society has major social cultural and economic implications for the wider Israeli society The work is a
