## **Evolution Educational Video:**

**Video in the Age of Digital Learning** Jonas Köster, 2018-08-28 Although video is now ubiquitous in education its full potential is oftentimes not fully understood nor is it used to utmost potential This timely volume seeks to address this gap by providing educators and instructional designers with a comprehensive and in depth understanding of video production processes and methods for designing effective instructional videos From its discussion of the significance of digital learning and impact of instructional video to its unique focus on the best design and production techniques that make video an effective teaching tool this book offers applicable and tested strategies for creating quality instructional video The accompanying website which allows readers to see sample videos and access additional online resources underscores the book s practitioner focus Among the topics covered Instructional videos for teaching and learning Design and interactivity of instructional videos Production distribution and integration of instructional videos The future of instructional video Video in the Age of Digital Learning is an important practical contribution to the scholarship exploring methods for sharing and acquiring knowledge in the digital age It promises to be a valuable resource for educators instructional designers instructional media producers and educational technology professionals *Evolution Education in the American South* Christopher D. Lynn, Amanda L. Glaze, William A. Evans, Laura K. Reed, 2017-03-08 This volume reaches beyond the controversy surrounding the teaching and learning of evolution in the United States specifically in regard to the culture politics and beliefs found in the Southeast The editors argue that despite a deep history of conflict in the region surrounding evolution there is a wealth of evolution research taking place from biodiversity in species to cultural evolution and human development In fact scientists educators and researchers from around the United States have found their niche in the South where biodiversity is high culture runs deep and the pace is just a little bit slower Digital Video for Teacher Education Brendan Calandra, Peter J. Rich, 2014-08-07 Digital video use is becoming prevalent in teacher education as a tool to help improve teaching and learning and for assessing effective teaching Timely and comprehensive this volume brings together top scholars from multiple disciplines to provide sound theoretical frameworks research based support and clear practical advice on a variety of unique approaches to using digital video in teacher education programs Part I deals with the use of video for teacher learning Part II focuses on the role played by those other than teachers in the effective use of digital video in teacher education programs Part III addresses how to administer video for teacher education Exploring the complexities of effectively and appropriately integrating digital video into teacher development at various stages this book is a must have resource for scholars and professionals in the field Evolution and Religion in American Education David E. Long, 2011-08-03 Evolution and Religion in American Education shines a light into one of America s dark educational corners exposing the regressive pedagogy that can invade science classrooms when school boards and state overseers take their eyes off the ball It sets out to examine the development of college students attitudes towards biological evolution through their

lives The fascinating insights provided by interviewing students about their world views adds up to a compelling case for additional scrutiny of the way young people s educational experiences unfold as they consider and indeed in some cases reject one of science s strongest and most cogent theoretical constructs Inevitably open discussion and consideration of the theory of evolution can chip away at the mental framework constructed by Creationists eroding the foundations of their faith The conceptual battleground is so fraught with logical challenges to Creationist dogma that in a number of cases students exposure to such dangerous ideas is actively prevented This book provides a detailed map of this astonishing struggle in today s America a struggle many had thought was done and dusted with the onset of the Enlightenment

**Evolving germs - Antibiotic resistance and natural selection in education and public communication** Gustav Bohlin, 2017-10-20 Bacterial resistance to antibiotics threatens modern healthcare on a global scale Several actors in society including the general public must become more involved if this development is to be countered The conveyance of relevant information provided through education and media reports is therefore of high concern Antibiotic resistance evolves through the mechanisms of natural selection in this way a sound understanding of these mechanisms underlies explanations of causes and the development of effective risk reduction measures In addition to natural selection functioning as an explanatory framework to antibiotic resistance bacterial resistance as a context seems to possess a number of qualities that make it suitable for teaching natural selection a subject that has been proven notoriously hard to teach and learn A recently suggested approach for learning natural selection involves so called threshold concepts which encompass abstract and integrative ideas The threshold concepts associated with natural selection include among others the notions of randomness as well as vast spatial and temporal scales Illustrating complex relationships between concepts on different levels of organization is one of several areas where visualizations are efficient Given the often imperceptible nature of threshold concepts as well as the fact that natural selection processes occur on different organizational levels visual accounts of natural selection have many potential benefits for learning Against this background the present dissertation explores information conveyed to the public regarding antibiotic resistance and natural selection as well as investigates how these topics are presented together by scrutinizing media including news reports websites educational textbooks and online videos The principal method employed in the media studies was content analysis which was complemented with various other analytical procedures Moreover a classroom study was performed in which novice pupils worked with a series of animations explaining the evolution of antibiotic resistance Data from individual written assignments group questions and video recorded discussions were collected and analyzed to empirically explore the potential of antibiotic resistance as a context for learning about evolution through natural selection Among the findings are that certain information that is crucial for the public to know about antibiotic resistance was conveyed to a low extent through wide reaching news reporting Moreover explanations based on natural selection were rarely included in accounts of antibiotic resistance in any of the examined media Thus it is highly likely that a large proportion of the population is never exposed to explanations for resistance development during education or through newspapers Furthermore the few examples that were encountered in newspapers or textbooks were hardly ever visualized but presented only in textual form With regard to videos purporting to explain natural selection it was found that a majority lacked accounts of central key concepts Additionally explanations of how variation originates on the DNA level were

especially scarce These and other findings coming from the content analyses are discussed through the lens of scientific literacy and could be used to inform and strengthen teaching and scientific curricula with regards to both antibiotic resistance and evolution Furthermore several factors of interest for using antibiotic resistance in the teaching of evolution were identified from the classroom study These involve among others how learners perception of threshold concepts such as randomness and levels of organization in space and time are affected by the bacterial context Learning across Contexts in the Knowledge Society Ola Erstad,Kristiina Kumpulainen,Åsa Mäkitalo,Kim Christian Schrøder,Pille Pruulmann-Vengerfeldt,Thuridur Jóhannsdóttir,2016-02-10 Developments within the knowledge society especially those resulting from technological innovation have intensified an interest in the relationship between different contexts and multiple sites of learning across what is often termed as formal non formal and informal learning environments The aim of this book is to trace learning and experience across multiple sites and contexts as a means to generate new knowledge about the borders and edges of different practices and the boundary crossings these entail in the learning lives of young people in times of dynamic societal environmental economic and technological change The empirical research discussed in this book has grown out of a Nordic network of researchers The research initiatives in the Nordic countries tend to avoid the more spectacular debates over the future of the educational institutions that tend to dominate and obscure discussions on education in the knowledge society and which look to models of informal learning whether in the learning communities of workplaces and families or in the new socio technical spaces of the Internet as a source of alternative educational strategies Rather Nordic researchers more modestly ask whether it is possible to envisage new models of teaching and learning which take seriously both the responsibility to social justice and social wellbeing which at least rhetorically underpinned a commitment to mass education of the 20th century as well as to the radical challenges to traditional educational models offered by the new socio technical spaces and practices of the 21st century , *The Great Adventures of Sea Worthy with the I Can Crew* Diana De Valor,2011-05 Sea Worthy and Sam are abandoned and disabled companions the I Can Crew of an old sea Captain A blustery storm blows Worthy s little schooner out to sea where they are ship wrecked on an island with pirates and treasure Sea worthy and the I Can Crew are off on a fun filled pirate adventure to try to save Sweedy s fishing boat the Float n Star This is an adventure that the whole family will enjoy *Science Culture, Language, and Education in America* Emily Schoerning,2018-05-31 Can the culture and language of science be an alienating force that discourages marginalized people from identifying with scientists and pursuing higher education in the sciences More broadly does an education system which unwittingly presents science as a distinct culture result in a population susceptible to doubt confusion and denial This volume explores how this culture of science is reflected and transmitted in the classroom and how this can have wide reaching and often negative implications for science education and science literacy Well intentioned efforts to bring hands on scientific experiences into the classroom must also take into account how students perceive the

culture of science Areas of potential conflict include linguistic and cultural behaviors misconceptions about science and the nature of science and in some cases religious worldviews Once recognized these conflicts are resolvable and valid methods exist to reduce alienation broaden participation and ensure that all students whether or not they pursue STEM careers leave school knowing that science is something that they can trust

**New Ways of Communicating Archaeology in a Digital World** Sofia Fonseca, Ben Thomas, Aurélia Basterrechea, 2024-10-30 This book examines the communication and interaction between archaeologists and the non archaeological public in a digital age Moving beyond traditional methods the book focuses on communication through new YouTube MOOCs TEDx etc and alternative media virtual and augmented reality video games comics etc that connect a traditional archaeological world to a modern digital one By featuring case studies that make this point the volume argues for the need to integrate new technologies and media like online education storytelling podcasting and augmented and virtual reality into archaeologists efforts to communicate their work to the broader society Drawn from a session at the European Association of Archaeologists Annual Conference in 2018 the book was expanded and enhanced by the inclusion of presentations from the 2020 conference and additional invited papers The volume presents a variety of approaches to archaeological education that highlight the need for creativity and resourcefulness in re thinking archaeological presentations in a digital and virtual environment This volume is of interest to archaeologists as well as researchers and practitioners in museology and heritage and serves as a guide for archaeologists interested and involved in the world of non academic communication This book invites the reader to be part of a movement that is redefining the dialogue between our past and the future of communication learning and digital storytelling
