consciousness is moving to a quantum existence of Spirit in Mass God Man realized alive with all the lower species of life specifically the Sheeple of Economic Western Society The Science of Spirit is based on my personal experience my research and my understanding of the ancient philosophy that this work comes from It uses from research the philosophy and experience of other very credible people that have studied different aspects of a Science of Spirit as a philosophy to live by I use this eclectic approach to build an accurate model of reality based in consciousness that allows us to create our own reality once we rid ourselves of the illusions of society This approach gives credibility to my overall viewpoint a modern interpretation of a very old philosophy and way of life A Science of Spirit that is inherent in Mother Nature It goes in depth about understanding What Consciousness Is An Analogical State of Awareness that is continuously evolving faster and faster to the eternal Now Moment It uses the discovery of a new perspective of the Mayan Calendar that is supposed to end in a religious Apocalypse at The Omega Point in time around 2012 as its foundational understanding of an Evolution of Consciousness on earth This philosophy and research show an Evolution of Consciousness a rising of an Analogical Awareness of life revealing a Science to the nature of Spirit It explains from a new perspective this battle between the Forces of Good and Evil at The End of Time This Ancient Science of Spirit philosophy explains how the primeval forces of life Spirit that are inherent in Mother Earth growing for 16 4 billion years are pitted against the dogmatic stagnant god fearing personalities that runs the Engines of Commerce of our Global Society with their focus on monetary control of the people and the planet This is a real life battle between evolving evolutionary beings against the Anti Christ Social Consciousness of The Multi National Corporations Religious dogmas talk about an Apocalypse at the end of time to help warn us of our impending doom the remarkable thing is that the word Apocalypse means the lifting of a veil or a disclosure to certain privileged persons of something hidden from the majority of humankind I will show in this book that the lifting of a veil is a rising of consciousness that knows no fear of the unknown and clarifies ancient predictions of the end days and the real battle of Armageddon This ancient Science      *Space for Mankind's Benefit* Jesco von Puttkamer, Thomas J. *Astronomical Applications of Astrometry* M. A. C. Perryman, 2009 The Hipparcos satellite developed and launched by the European Space Agency ESA in 1989 was the first space mission dedicated to astrometry the accurate measurement of positions distances and proper motions of stars Amongst the key achievements of its measurements are refining the cosmic distance scale characterizing the large scale kinematic motions in the Solar neighborhood providing precise luminosities for stellar modelling and confirming Einstein's prediction of the effect of gravity on starlight This authoritative account of the Hipparcos contributions over the last decade is an outstanding reference for astronomers astrophysicists and cosmologists It reviews the applications of the data in different areas describing the subject and the state of the art before Hipparcos and

summarizing all major contributions to the topic made by Hipparchos. It contains a detailed overview of the Hipparchos and Tycho catalogues, their annexes and their updates. Each chapter ends with comprehensive references to relevant literature.

*Journey of Modern Science* SURYAMANI MISHRA, The scientific revolution 1500 AD onwards was the emergence of modern science during the early modern period when developments in mathematics, physics, astronomy, biology, including human anatomy and chemistry transformed societal views about nature. Scientific Revolution refers to a period roughly from 1500 AD onwards which witnessed fundamental transformations in people's attitudes towards the natural world. The year 1543 is considered the beginning of the scientific revolution when astronomer Copernicus proposed the idea without tools like telescope that planets including Earth revolve around the fixed Sun, an idea that goes against the belief of nearly two thousand years of Sun rotating the fixed Earth concept. Later, after almost 50 years of his death, Galileo using his telescope proved Copernicus' idea as true against the will of the Roman Church. **Paperbound Books In Print, Fall 1981** Bowker Editorial Staff, 1981-11
