Books in Print, 1987 **Bridging the Gap Between AI, Cognitive Science, and Narratology With Narrative Generation** Ogata, Takashi, Ono, Jumpei, 2020-09-25 The use of cognitive science in creating stories languages visuals and characters is known as narrative generation and it has become a trending area of study Applying artificial intelligence AI techniques to story development has caught the attention of professionals and researchers however few studies have inherited techniques used in previous literary methods and related research in social sciences Implementing previous narratology theories to current narrative generation systems is a research area that remains unexplored Bridging the Gap Between AI Cognitive Science and Narratology With Narrative Generation is a collection of innovative research on the analysis of current practices in narrative generation systems by combining previous theories in narratology and literature with current methods of AI The book bridges the gap between AI cognitive science and narratology with narrative generation in a broad sense including other content generation such as a novels poems movies computer games and advertisements The book emphasizes that an important method for bridging the gap is based on designing and implementing computer programs using knowledge and methods of narratology and literary theories In order to present an organic systematic and integrated combination of both the fields to develop a new research area namely post narratology this book has an important place in the creation of a new research area and has an impact on both narrative generation studies including AI and cognitive science and narrative studies including narratology and literary theories It is ideally designed for academicians researchers and students as well as enterprise practitioners engineers and creators of diverse content generation fields such as advertising production computer game creation comic and manga writing and movie production **Research Approaches**

to Movement and Personality Philip Eisenberg, Irmgard Bartenieff, Martti Takala, 1972 **Handbook of the History of Social Psychology** Arie W. Kruglanski, Wolfgang Stroebe, 2012-10-12 For the first time in the history of social psychology we have a handbook on the history of social psychology In it leading luminaries in the field present their take on how research in their own domains has unfolded on the scientists whose impact shaped the research agendas in the different areas of social psychology and on events institutions and publications that were pivotal in determining the field s history Social psychology s numerous subfields now boast a rich historical heritage of their own which demands special attention The Handbook recounts the intriguing and often surprising lessons that the tale of social psychology s remarkable ascendance has to offer The historical diversity is the hallmark of the present handbook reflecting each of this field s domains unique evolution Collectively the contributions put a conceptual mirror to our field and weave the intricate tapestry of people dynamics and events whose workings combined to produce what the vibrant discipline of social psychology is today They allow the contemporary student scholar and instructor to explore the historical development of this important field provide insight into its enduring aims and allow them to transcend the vicissitudes of the zeitgeist and fads of the moment The Handbook of the History of Social Psychology provides an essential resource for any social psychologist s collection Multimodality and Classroom Language Dynamics Dan Shi, 2021-09-27 This practical analytical guide to classroom language dynamics in L2 tertiary classrooms integrates multimodality sociological theory of education and ecosocial semiotic perspectives It offers a theoretical and methodological framework for conducting multimodal analysis of meaning making processes in different pedagogical settings The multimodal investigation of real time classroom interactivity showcases an embodied coordination of vocalization and gesticulation in classroom interactions where it varies from students solo speech in individual presentations to teacher student interactions in group discussions and to student student interactions in role play With a unified conceptual framework articulating both the macro and micro analysis this book proposes more ecological based approaches to language and unpacks a multi scalar analytical framework to open up for an embodied analysis of meaning making processes in multimodal interaction analysis The rich systematic analysis built upon the ecosocial semiotic approach illustrates in practice how theoretical frameworks link to empirical data analysis through exemplified analytical processes and practices and demonstrates the value of how multimodal interaction analysis contributes to the understanding of the cognitive dynamics of languaging activities that take place in L2 educational contexts The book provides not only a practical methodological guide to multimodal interaction analysis but also hands on analytical references to multimodal classroom research in the field In addition to early career scholars and PhD students this volume will be valuable for international academics looking for complementary frameworks or approaches to multimodality particularly in the L2 Asian contexts

Approaches to Social Research Alys Young, Bogusia Temple, 2014 In this book Alys Young and Bogusia Temple explore the relationship between key methodological debates in social research and the special context of studies concerning deaf people

Bibliographic Guide to Education ,1978 lists publications cataloged by Teachers College Columbia University supplemented by The Research Libraries of The New York Public Library *Autism: The Movement Perspective* Elizabeth B Torres, Anne M Donnellan, 2015-05-19 Autism Spectrum Disorders ASD is portrayed as cognitive and social disorders Undoubtedly impairments in communication and restricted repetitive behaviors that now define the disorders have a profound impact on social interactions But can we go beyond the descriptive observational nature of this definition and objectively measure that amalgamate of motions and sensations that we call behavior In this Research Topic we bring movement and its sensation to the forefront of autism research diagnosis and treatment We gather researchers across disciplines with the unifying goal of recognizing movement and sensory disturbances as core symptoms of the disorder We also hear confirmation from the perspective of autism self advocates and parents Those important sources of evidence along with the research presented in this topic demonstrate without a doubt that profound movement and sensory differences do exist in ASD and that they are quantifiable The work presented in this Research Topic shows us that quantifiable differences in movements have a better chance than current observational techniques to help us uncover subtle solutions that the nervous system with autism has already spontaneously self discovered and utilized in daily living Where the naked eye would miss the unique subtleties that help each individual cope instrumentation and fine kinematic analyses of motions help us uncover inherent capacities and predispositions of the person with autism The work presented in this topic helps us better articulate through the voices of parents and self advocates those sensory motor differences that current inventories could not possibly uncover These differences are seldom perceived as they take place at timescales and frequencies that fall largely beneath our conscious awareness To the person in the spectrum living with this disorder and to the caregiver creating accommodations to help the affected loved one these subtleties are very familiar though Indeed they are often used in clever ways to facilitate daily routines We have waited much too long in science to listen to the very people that we are trying to define understand and help Being autism a social problem by definition it is remarkable that not a single diagnosis inventory measures the dyadic social interaction that takes place between the examiner and the examinees Indeed we have conceived the autistic person within a social context where we are incapable by definition of accepting those differences The burden is rather placed on the affected person to whom much too often we refer to in the third person as non verbal without intentionality without empathy or emotions without a theory of mind among other purely psychological guesses It is then too easy and shockingly allowed to reshape that person to mold that person to better conform to our social expectations and to extinguish behaviors that are socially unacceptable even through the use of aversive punishing reinforcement techniques if need be And yet none of those techniques have had a single shred of objective scientific evidence of their effectiveness We have not objectively measured once nor have we physiologically characterized once any of those perceived features that we so often use to observationally define what we may think the autistic phenotype may be We have not properly quantified

beyond paper and pencil methods the effectiveness of interventions in autism Let us not forget when we do our science that we are all part of the broad human spectrum **Nonverbal Communication** Judith A. Hall, Mark L. Knapp, 2013-01-30 The current volume featuring 28 contributions from cutting edge researchers emphasizes uses purposes origins and consequences of nonverbal communication in the lives of individuals dyads and groups in other words the behaviour of human beings As such the volume as a whole is not just about communication systems per se nor the impact on humans of the physical environment whether built or natural Instead the volume focuses on humans engaging in nonverbal communication and the communicative and psychological aspects of this behaviour Nonverbal behaviour is an inclusive category and includes all emitted nonverbal behaviour that may be subject to interpretation by others whether the behaviour is intentionally produced or not This panoramic volume edited by two of the world's leading authorities on nonverbal communication contains 28 essays presenting the state of the art in the domain of nonverbal behaviour study Reginald B Adams Jr Tamara D Afifi Peter Andersen Sarai Blincoe Ross W Buck Peter Bull Judee K Burgoon Vanessa L Castro Ga tan Cousin Amanda Denes M Robin DiMatteo John P Doody John F Dovidio Marshall Duke Hilary Anger Elfenbein Jos Miguel Fernandez Dols Mark G Frank Jillian Gannon Robert Gifford Laura K Guerrero Sarah D Gunnery Amy G Halberstadt Judith A Hall Jinni A Harrigan Monica J Harris Hyisung C Hwang Jessica Kalchik Arvid Kappas Mark L Knapp Eva Krumhuber Ravi S Kudesia Dennis Kster Marianne LaFrance Jessica L Lakin Leslie Martin David Matsumoto Joann M Montepare Anthony J Nelson Stephen Nowicki Alison E Parker Sona Patel Miles L Patterson Stacie R Powers Kevin Purring Klaus Scherer Marianne Schmid Mast Michael A Strom Elena Svetieva Joseph B Walther Benjamin Wiedmaier Leslie A Zebrowitz
